Vol. 21 No. 19 | Lancaster Farming, Saturday, March 27, 1976 | $3.00 Per Year

Pork honors awarded

By MELISSA PIPER

BLUE BALL — Pork producers from the Berks - Lehigh Area and in Lancaster County recently named the winners of their spring carcass contest which was held at the Hatfield Packing Co.

Otto Schick, Kutztown R2, exhibited the grand champion animal in the Berks - Lehigh contest. The champion crossbred barrow weighed 195 pounds and recorded statistics of .8 inch backfat, 5.26 inches of loineye, 33.6 percent ham - loin percentage with a length of 30.6 inches.

Reserve champion honors went to a crossbred animal exhibited by Herbert Schick of Kutztown R2. Schick's reserve animal weighed in at 230 pounds with the following statistics: one inch backfat; 5.8 inches loineye; 32 percent ham-loin percentage and a length of 31.6 inches.

Other top breeders included Mike Moore, Reading R2 and Paul Gansinger, Kutztown R2. Both men exhibited top placing animals.

Winners in the Lancaster spring show were announced at a banquet held last Friday evening at the Fire Hall

[Continued on Page 14]

Lancaster County Pork Producers recently honored for their exhibits in the carcass contest were (clockwise) John Strawbridge - Fall champion; Dale Nolt - Spring champion; George Getz - Fall reserve champion and Gehman's Mill - Spring reserve champion.

'Homeless' milk possible

By DIETER KRIEG

NEW HOLLAND — Reports about there being so much milk around this spring that some will have to be dumped are erroneous, reports Lisle Dutton, PR man for Eastern Milk Producers Cooperative, the largest such organization in the Northeast and within Pennsylvania. But there will be some "homeless" milk around, as he called it, due to steadily increasing production which could leave some independent producers without a market. He sees no such problem for dairymen who belong to dairy cooperatives and adds that "Eastern assures a continuous market and guaranteed milk check ... never in 54 years have members been without a market."

The Eastern executive, speaking here before a group of dairymen, also cautioned members of Federal Order 2 against some of the dangers which currently exist within that marketing order. He explained that there has been some pressure by NEDCO, Dairylea, some milk handlers, and the NFO that the Order be amended. Eastern opposes all of the proposals, claiming that such a move would result in milk prices 23 to 25 cents below those obtained otherwise. Singling out the proposals made by the NFO, Dutton said: "The NFO proposals would have been

Candidates speak up

By DIETER KRIEG

LANCASTER — Ten Republican congressional candidates addressed themselves to the Lancaster County Farmers' Association a week ago during a "Meet the Candidates Night" here at the Farm and Home Center. Lasting for more than three hours, the affair allowed each candidate to present a maximum length of five-minutes talk; answer seven general questions; and one specifically for him. An 11th candidate was also present to the surprise of the other office-seekers as well as the audience. He was Martin Ross, a self-proclaimed communist, who is running on the Labor Party ticket.

The event was marked by several outbursts of dissatisfaction, particularly by State Representative Marvin Miller, who thought the last question was unfair. He advised that such "cheap shots" be omitted from further political engagements because "every cheap shot that a candidate takes here tonight is a cheap shot the Democrat is going to give us in November." Several other candidates also expressed dissatisfaction. No apologies were made by the LCFA, sponsors of the event.

We present each of the 10 Republican candidates running for retiring Ed Eshleman's seat in alphabetical order, and then Ross, the Labor Party candidate. Each segment begins with that respective candidate's five-minute or less talk, followed by answers to the above seven questions, an answer to a specific question, and finally a closing statement. The complete story begins on page 50.

Judy Mitchell

Eugene Blevins, York County peach grower, points out how blossoms on his trees have advanced. There had been some fear of frost-kill, but a feeling of optimism is now prevalent. It won't be safe until mid-April however.

Weather favorable to area peach growers

By DIETER KRIEG

STEWARTSTOWN — "There's still plenty of time for 'em to freeze, but so far we're still counting on a 90 per cent crop," the Blevins Brothers of Blevins' Orchard, here, exclaimed happily.

William and Eugene Blevins, life-long fruit growers in southern York County, expressed some concern, however, over the pleasant weather we've been having. It's pushed the peach blossoms out about two weeks ahead of schedule and could result in disaster if temperatures drop into the teens some night. "We've had killing frosts as late as May 10, and we normally don't consider things 'safe'

[Continued on Page 11]

Free markets wanted

CHICAGO, Ill. — An international food policy which encourages the production and movement of food without political manipulation is the only way the world can feed itself in the opinion of Allan Grant, president of the American Farm Bureau Federation.

Speaking here on Wednesday to a joint meeting of the United States - Japan Trade Council and the Chicago Association of Commerce and Industry, Grant said, "Our past experiences in America of the government trying to manage food supplies should convince any reasoning person that political control of food supplies is not only a failure, but actually contains the seeds of disaster."

Noting that the problems of feeding the world's hungry are infinitely more complex

[Continued on Page 13]

Meet our Berks correspondent

Lancaster Farming's new Berks County correspondent, Judy Mitchell, lives in Stony Run, Pennsylvania, with her husband Stan and children David and Wendy. The Mitchells moved to Pa. a couple of years ago from their native South-Central New Jersey when Stan decided to take a job offered him by Confer-Smith, Hamburg. Judy claims that the tiny village where they live now is the closest the family has ever come to living in a town, but adds that they love this part of Pennsylvania because it seems so much more like "country" than their homeland did. Although they lived in rural New Jersey, she says that the farms were rapidly disappearing and you could feel civilization crowding in on all sides.

Judy says that the question she is asked most often by people she comes in contact with on her job is how she

Local Grain

Friday, March 26

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Friday, Mar. 26, are as follows:

	Bid+	Offered+
Ear Corn	62.33	70.33
Shelled Corn	2.69	2.80½
Barley	1.88	2.08
Oats		
Local	1.48½	1.71½
Western	1.80	1.97
Wheat		
Millers	3.37½	3.51
Soybeans	4.60	——
Soybean Meal		173.50

Some actors think that if part of their costume is yellow, they will have bad luck.

PROGRESSIVE FARMERS WANT PROFESSIONAL CONSULTATION

1. Is pH a false indicator of calcium levels in your soils?
2. Is sulphur holding back the yield, protein content and digestibility of your crops?
3. Is excessive magnesium what makes your land so wet and late?

If your present soil tests don't answer these questions, you will profit by our technical help. SOIL TESTS ARE DIFFERENT! Our complete soil analysis will help you balance soil fertility, which means more efficient cropping and feeding - less bought feed and fertilizer - more yield and profit.

WE SELL NO PRODUCTS — ONLY RECOMMENDATIONS

There is a reason why progressive farmers with sharp pencils hire us year after year for soil analyses and recommendations. We save them dollars. Balance makes crops to be proud of. Now is the time to talk it over with:

THE WORD'S OUT!

DEKALB LAYERS ARE MAKING NEWS

WILLIAM KNITTER
Plainfield Poultry Farm
Pen Argyl, PA
36,000 DK-137 Layers

Bill talks about the DEKALB K-137 layer:

"I can count on consistent production peaks from 87%-90%. After 8 periods of production my last flock of Moyer's DK-137's haven't dropped below 78%. Their excellent shell quality also allows me to follow a 14 period laying schedule."

Moyer's CHICKS, INC.

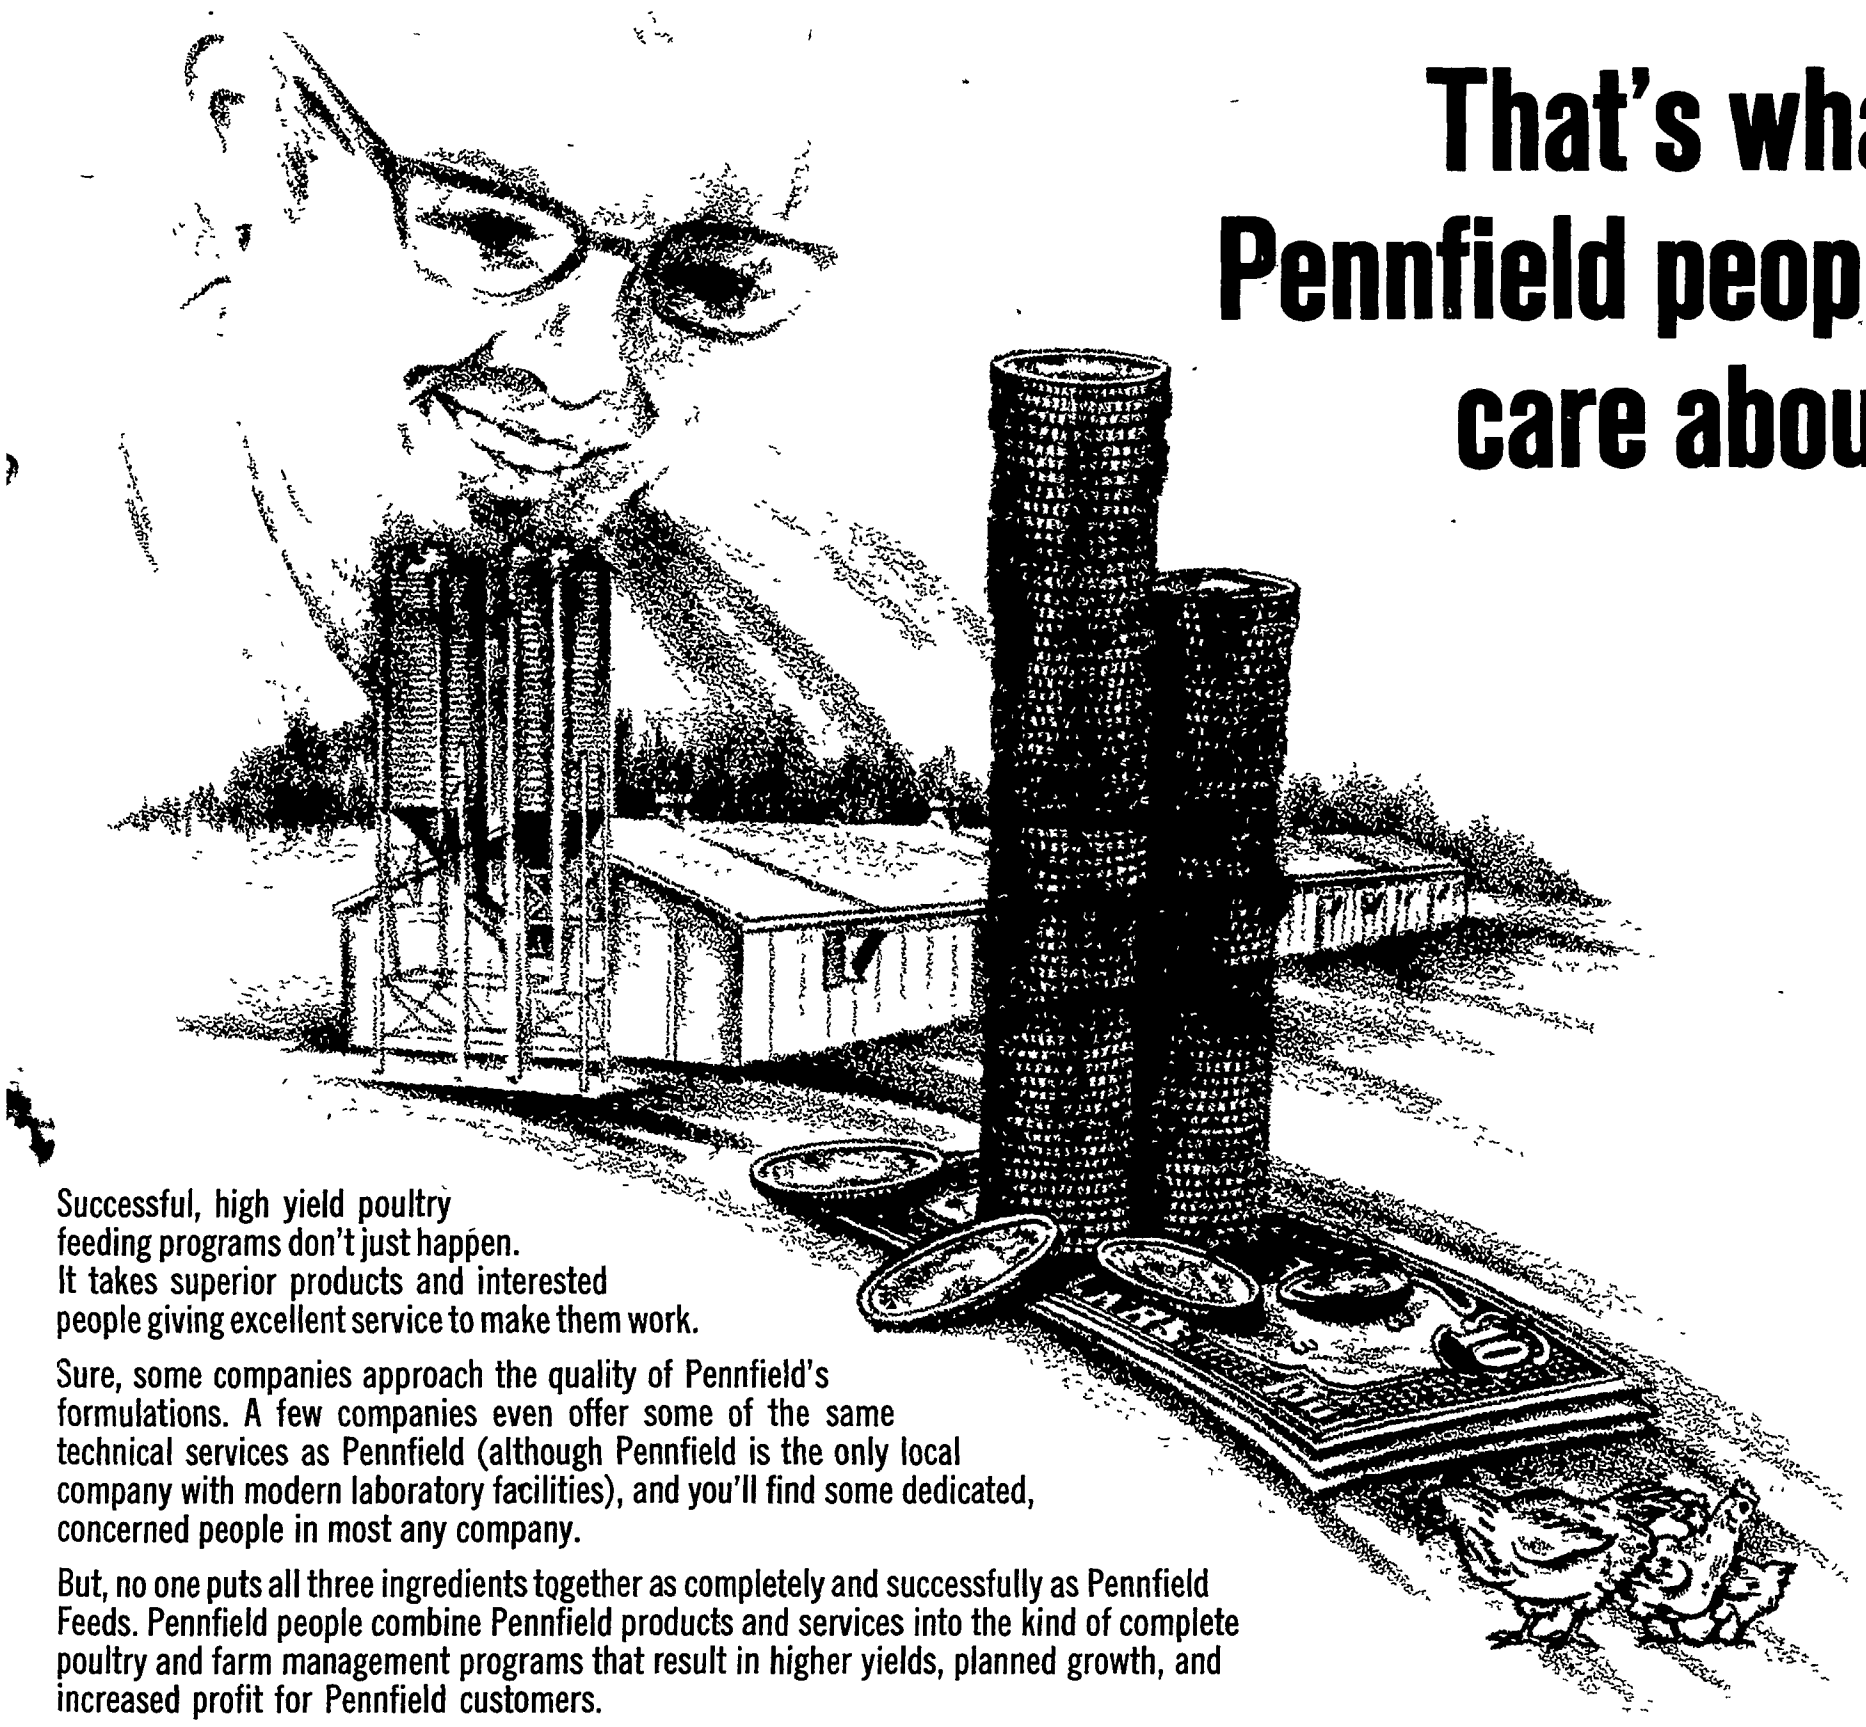
Your POULTRY PRODUCTIVITY, your PROFITABILITY.

That's what Pennfield people care about.



Successful, high yield poultry feeding programs don't just happen. It takes superior products and interested people giving excellent service to make them work.

Sure, some companies approach the quality of Pennfield's formulations. A few companies even offer some of the same technical services as Pennfield (although Pennfield is the only local company with modern laboratory facilities), and you'll find some dedicated, concerned people in most any company.

But, no one puts all three ingredients together as completely and successfully as Pennfield Feeds. Pennfield people combine Pennfield products and services into the kind of complete poultry and farm management programs that result in higher yields, planned growth, and increased profit for Pennfield customers.

Chemists, nutritionists, production personnel, veterinarians, computer technicians, business and marketing analysts, deliverymen, quality control specialists, financial experts, and more . . . led by your Pennfield Area Manager who can put them all together to develop and service a customized, profit-oriented program for you. These are Pennfield people. And, Pennfield people make Pennfield Feeds a better buy.

Want to know how Pennfield people can work for you to improve your yields and profit? Complete and mail this coupon for a no obligation survey.

Livestock market and auction news

Belleville

March 24, 1976

CATTLE 173. Compared with last Wednesday's market, slaughter cows $1.50 to $2.50 lower. Few Standard slaughter steers 31.60-33.20, few Utility 28.10-30.20. Few Utility slaughter heifers 28.00-30.75. Utility & High Dressing Cutter slaughter cows 26.00-28.50, Cutters 25.00-26.50, Canners 23.00-25.10, Shells down to 19.75. Couple Utility slaughter bullocks at 29.00. Few Yield Grade No. 1 1300-1650 lbs. Slaughter bulls 28.50-32.90. One lot Good 500 lbs. feeder steers 36.75; few Good & Choice 450-700 lbs. feeder bulls 31.00-33.00.

CALVES 191. Vealers grading Utility 50 cents to $2.50 lower. Few Choice vealers 65.00-69.50, Good 45.00-64.00, Standard 35.00-44.00, Utility 90-110 lbs. 21.50-26.00, 70-85 lbs. 19.50-21.50. Farm calves, holstein bulls 90-120 lbs. 22.00-36.00; few holstein heifers 90-115 lbs. 44.00-55.00.

HOGS 226. Barrows & Gilts 25 cents to $1 lower. US No. 1-2 200-225 lbs. barrows & gilts 46.80-48.20, No. 1-3 190-225 lbs. 45.90-46.60, No. 2-3 230-240 lbs. 44.50-46.00. US No. 1-3 350-575 lbs. sows 40.50-43.50. Few Boars 28.00-33.50.

FEEDER PIGS 329. US No. 1-3 20-35 lbs. feeder pigs 26.50-40.00 per head, No. 1-3 35-50 lbs. 34.00-53.00, one lot No. 1-3 110 lbs. 60.50 per head.

SHEEP 13. Few Choice 20-60 lbs. spring slaughter lambs 53.00-56.00. Few Slaughter ewes 13.00-15.00.

Omaha Cattle

March 25
Weekly 51 Cattle

Compared with the previous week's close — slaughter steers and heifers mainly 25-75 cents higher with Choice and Prime showing much of the full advance although consignments qualified for Canadian shipment no better than steady with late previous week as outlet for these narrowed. Cows 1.00-1.50 lower and bulls 1.00-2.00 lower.

Four day receipts 16,100 as compared 17,100 previous week and 13,800 a year ago. Slaughter steers approximately 46 pct., heifers 35 pct. liberal percentage Choice steers and several loads Choice and Prime, large share of heifer run high-Good to average-Choice. Cows 11 pct., feeders little more than 5 pct.

Fed cattle trade followed somewhat uneven course as demand surted and ebbed in a sensitive reflection of carcass trading. An increasing volume cattle qualified for Canadian shipment more than sufficient to meet a curtailed demand from that source. Most interests in need of cattle for current requirements but as same time, concerned over stability of carcass prices. However late, trading brisk and sharp price advances more than sufficient to offset mild early downturns.

STEERS: Several loads Choice and Prime 3-4, 1095-1217 lbs. 35.75-36.00 during week, load 1249 lbs. predominantly 4 35.25. Choice 2-4 975-1275 lbs. closed 34.25-35.75, many 35.00-35.50, some Good and Choice 2-3 1050-1100 lbs. 35.00-35.25 for Canadian shipment. Mixed Good and Choice 2-4 950-1225 lbs. 33.75-34.75. Good 2-3 32.50-34.00. Standard and Good 2-3 31.00-32.50.

Average of LS-214, detailed quotations, for Choice 900-1100 lb. steers this week 35.05, Choice 1100-1300 lbs. 34.72. Average weight all steers this week 1110 lbs., previous week 1130 lbs. Average weight heifers 974 lbs., previous week 991 lbs.

HEIFERS: Several loads Choice and Prime 3-4 969-1100 lbs. 33.75-34.00 fore part of week. At close Choice 2-4 875-1050 lbs. 33.25-34.50. Mixed Good and Choice 2-3 800-1000 lbs. 32.50-33.50. Good 2-3 30.00-32.00. Small lots Standard and Good 2-3 28.50-30.00.

COWS: Utility and Commercial 2-3 25.00-27.00. Canner and Cutter 19.00-25.00, Mixed Cutter and Utility 25.25-25.50.

BULLS: Yield Grade 1-2 1400-1800 lbs. 28.00-33.00, few yield grade 1 34.00.

Baltimore USDA

March 22, 1976

CATTLE 500. Slaughter steers & heifers 50 cents to $1 lower. Cows uneven, averaging weak to 25 cents lower. Bulls firm to 50 cents higher; feeders steady. Supply 40 percent slaughter steers & heifers; 40 percents cows; 15 percent feeder cattle, balance bulls.

STEERS: Choice yield grade 2-4 1075-1250 lbs. 36.00-37.00, Good & Choice yield grade 2-4 990-1200 lbs. 35.00-36.00, Good yield grade 2-4 975-1350 lbs. 32.00-35.00, Standard & Good holsteins yield grade 2-3 970-1265 lbs. 29.75-32.50. HEIFERS: High Good & Choice yield grade 2-4 885-1015 lbs. 33.00, Good yield grade 2-3 900-950 lbs. 29.50-32.00. COWS: Utility & Commercial yield grade 2-4 27.50-31.25, Cutters 24.50-28.50, Canner & Low Cutter 21.50-24.50. BULLS: Yield Grade No. 1 1400-1600 lbs. 34.00-36.50, 1050-1400 lbs. 32.50-35.75.

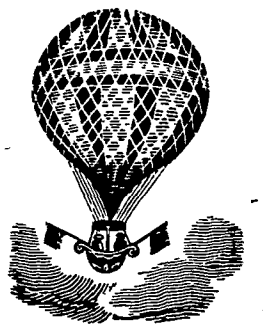
THE OLD FARMER'S ALMANAC

MARCH 29-APRIL 4, 1976

Spring green begins to peep forth.

Clean your cellar and repair your tools George Washington given Harvard degree April 3, 1776 New moon March 30 Don't get fooled April 1 Average length of days for the week, 12 hours, 45 minutes Meat rationed March 29, 1943 First pencil with eraser appeared March 30, 1858 *The moment of recognizing your own lack of talent is a flash of genius*



Old Farmer's Riddle: Which President killed a man in a duel? (Answer below)

Ask the Old Farmer: My father has a hardtack cracker with an inscription that reads, "Marvin's US Hardtack" Can you tell if it is from WWI or WWII, and if it might have any value at all? R W, Galveston, Texas

Depends on the size If it is about two and a half inches square, it is not very old If it is four inches square, it could date back considerably Probably not valuable though

Home Hints: When ironing woolen garments always leave the wool slightly damp and then hang at once **Riddle answer:** Andrew Jackson killed a young Nashville lawyer, Charles Dickinson, who had disparaged Mrs Jackson's marital reputation

OLD FARMER'S WEATHER FORECASTS

New England: Heavy thundershowers at first, snow in north; week ends unseasonably cold with some rain, snow at higher elevations

Greater New York-New Jersey: Week begins with gale winds and heavy rain, then clearing and mild, sunny and mild latter part, then cold with some rain and snow by week's end

Middle Atlantic Coastal: Severe thunderstorms to start, then clearing, light rain and mild latter part, then very cold and windy weekend

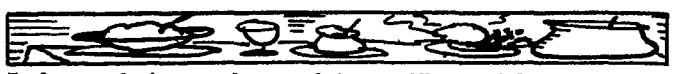
CALVES 186. Vealers mostly 50 cents to $4, spots $7 lower. Few Choice vealers 60.00-69.50, Good 49.00-58.00, Standard 35.00-45.00, few Utility 115-120 lbs. 29.00-30.50, 85-110 lbs. 24.50-29.00, 60-85 lbs. 17.00-24.50. Farm calves, holstein bulls 90-120 lbs. 29.00-33.00.

HOGS 269. Barrows & Gilts mostly 25 cents to 50 cents higher. US No. 1-2 205-230 lbs. barrows & gilts 47.85-48.25, No. 1-3 200-245 lbs. 47.50-47.85, No. 2-3 195-255 lbs. 46.00-47.50, few No. 2-4 245-270 lbs. 45.00-46.00. US No. 1-3 295-490 lbs. sows 37.00-42.00, No. 2-3 325-540 lbs. 36.50-38.00. Boars 32.00-36.50, one light weight at 38.50.

FEEDER PIGS 118. US No. 1-3 20-35 lbs. feeder pigs 24.00-29.00 per head, No. 1-3 35-50 lbs. 32.00-35.00, No. 1-3 50-70 lbs. 44.00-54.00 per head.

SHEEP 42. Few Choice 45-55 lbs. spring slaughter lambs 49.00-57.00, few Good & Choice 60-80 lbs. wooled slaughter lambs 42.00-54.00, Utility & Good 40-75 lbs. wooled & shorn lambs 28.00-38.00. Slaughter ewes 6.00-20.00.



Leftover fruit can be used in muffins and leftover vegetables in omelets to delicious effect.

Leftover liquid from stewed meat or poultry is a good stock for a nourishing soup, a flavorful liquid in which to cook rice, or a liquid base for scalloped or creamed dishes.

Kempton Spring Sale wraps-up today

KEMPTON — Large farm equipment, hay, straw and firewood along with antiques will be auctioned off today to wrap-up the 13th Annual Spring Sale here.

The three day auction began on Thursday with the offering of antiques and household goods. Friday saw dairy heifers and cows go to the auction block with antiques and coins following later in the day.

A sampling of today's wares will include: Two-horse trailer, GMC cattle truck, Ford pick-up truck; English Baret-ware dishes; dry sinks, comforters and snowmobiles.

Ten auctioneers have served on the stand during the popular three day event in Northern Berks County. Today's portion of the event will begin at 9:00 a.m. and end at 8:00 p.m.

Kempton is located near the Berks-Lehigh Counties border off Rt. 143.

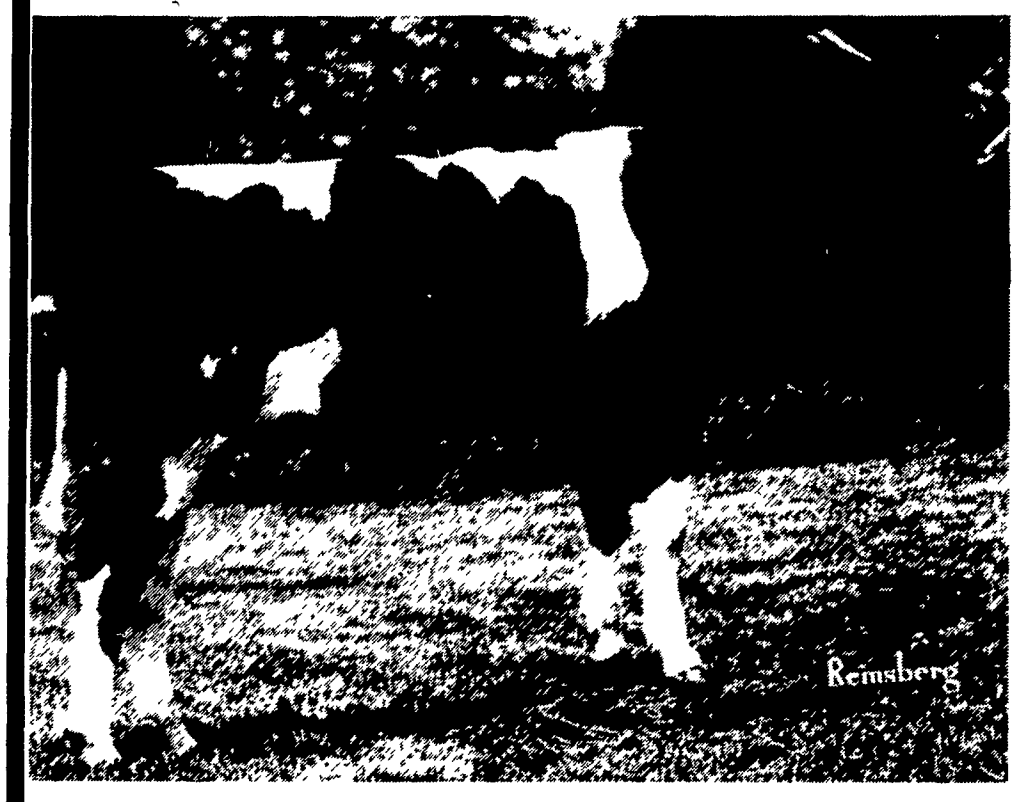
PAUL MILLER'S HOLSTEIN DISPERSAL AVERAGES $2,697



NINE FROM $5,400 to $9,000 - ALL BY "IVANHOE" SONS

Many factors contributed to the Millers' success with Holsteins: hard work, careful matings, great cow families, and good sires.

The top nine head in the sale were all sired by sons of the great Osborndale Ivanhoe - therefore brothers to Sterk Exclusive who is available through Atlantic.

"Exclusive" is not only by Ivanhoe, his EX-92 dam is by famed Roybrook Telstar, and she ranks 2nd for fat over all-time as a jr. 2-yr-old in either U.S. or Canada. His dam's dam has just been made EX-95 at 15 yrs., she has over 200,000 lbs. milk and 4 EX progency including three 1,000-lb. fat daughters.

Contact Your Local Technician Today For "EXCLUSIVE" Service Or Semen.

STERK EXCLUSIVE

"The Ivanhoe son you've been waiting for."

EXCLUSIVE'S — Six nearest ancestors are all classified Excellent.
Dam and both Granddams Are All Over 1100f - 25,000m.

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

Crime, unions, and co-ops

An NBC-TV News presentation earlier this week told of how the Teamsters Union is abusing its power and how some members, especially some leaders, are involved in gangster activities. The special report, one of a series being aired on the "NBC Nightly News," gave detailed accounts of how Teamster bosses and underground racketeers work together in such crimes as truck hijackings, large-scale thefts and fencing of stolen goods.

What's that have to do with farmers? Plenty! Just ask yourselves how many of your goods move by truck, airline, railroad or ship. NBC News pointed out that the companies which are being ripped off by Teamster and Mafia-backed racketeers prefer to let the crimes take place because to do otherwise would mean trouble from the union. The increased costs of goods and services — due to thefts and other union shenanigans — are passed on to the consumer. That's everybody. So how many dollars of the price on that new tractor or TV-set or dishwasher are going to underworld figures? By how much has the price of meat gone up due to Teamster manipulation?

Last week we ran a page 1 story concerning union power in California. And an editorial in this space pointed out some of the cruelties of union strong-arming, which stops at nothing. This week we received a report of a union attempting to get a foothold among egg producers in at least one region of the Northeast.

A number of conclusions can be deducted from all of this. One of them is that it emphasizes the need for farmers to stick up for themselves, lest some other group try to control us. It strengthens the idea behind farmer cooperatives too. First of all, farmers are not able to bargain effectively with their buyers on a one and one basis. And secondly, but equally important, if farmer cooperatives ever go under, there's going to be a grab for power and influence.

Will farmers allow themselves to be taken over by the likes of the Teamsters and the AFL-CIO? I hope not. The National Farmers Organization (NFO) isn't the answer either, since they model some of their strategies after those of 'Big Labor'. Furthermore, the U.S. Labor Party, (some members of which have openly proclaimed themselves to be communists) is collaborating with the NFO for some of its agricultural policies.

The important thing to remember at this point is that these movements and organizations exist. This country does not need their shallow brand of philosophy.

More farm controls?

A national food or agricultural policy has been called for from time to time by various groups and individuals. While intentions for such a program may be well and good, it should be pointed out that some potential dangers to our free enterprise system could be created by such legislation.

Bringing the government into agriculture to an even greater degree could be a step in the wrong direction. "National food policy" might sound good politically. But the words might well mean "government food policy" or "controlled food policy."

British novelist, George Orwell, once wrote: "Political language is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind."

Jeffrey St. Johns, a nationally-known columnist, noted in one of his recent editorials that the phrase which has really been mislabeled for political purposes is "federal or state funds." According to him the proper term should be "taxpayers' money." All of a sudden we read a different meaning into it.

I am afraid that the idea of a national food policy would boil down to nothing more than more bureaucracy and control.

The idea for such a program, in my opinion, is conceived and promoted by people who possibly don't understand nor appreciate the goose that laid the golden egg: free enterprise. I question the motives of congressmen and senators who pick up the idea for political purposes.

George McGovern is an example. In December of last year the South Dakota senator released a report calling for a "national food policy." In his 258-page report he calls for Congress to establish "an office of nutritional health evaluation" within the Department of Health, Education and Welfare. As if that cystic growth in Washington hasn't already been too much of a burden. The 1972 Democratic presidential candidate also wants such a program to be more concerned with "public interest" rather than market forces.

Unfortunately, shallow thinkers both within and outside of agriculture will grab a hold of such "national" ideas because they themselves lack the pride and initiative to stand on their own feet. Somehow they have been led to believe that answers to our problems lie in Washington or Harrisburg. As a result we've seen increases in welfare rolls, abuse of

THE BIBLE SPEAKS
International Uniform Sunday School Lessons
BY LAWRENCE W. ALTHOUSE

THE CLOCKWATCHERS

Lesson for March 28, 1976

Background Scripture: Matthew 24.

Devotional Reading: Matthew 24: 1-8.

Occasionally we read in the newspapers stories about persons or groups who are convinced that the world is going to "come to an end" on a particular date in the near future. For the most part, we tend to treat those stories with "tongue-in-cheek," for we really don't share their convictions.

Yet, at the same time, we can't help but feel a small degree of relief when that day has come and gone and the world is still intact - more or less. We are a little like the man who said, "I don't believe in ghosts, but I'm afraid of them!"

'No one knows!'

One reason for this reaction to pronouncements of impending Judgement Day is that as Christians we are rather uncertaion to what Jesus meant about his Second Coming. Scholars and theologians disagree. Many early Christians, including Paul, believed at first that Jesus' return was immanent and some of the teachings in the early church were predicated upon that expectation (for example: Paul's advice not to marry!).

Eventually the early church had to revise these expectations and we have been in dispute and doubt ever since. Each century has had its prophets informing us that the Second Coming was "just around the corner," and there are those who today believe that the conditions prerequisite for the Return of Christ are to be found in our own world today. Yet, every age has had its adventists who were equally convinced that the world had "had it."

The fact is, we really don't know when Christ will return and what that Second Coming will be like.

Not even angles know

Ironically, many of the sayings of Jesus have been used by interpreters to establish specific theories (usually proclaimed as "given truth") about the return of our Lord. Yet, the one thing that Jesus did say clearly about his return was that the date and time could not and would not be known. "But of that day and hour," he said, "no one knows, not even the angles of heaven, nor the Son, but the Father only," (Matthew 24:36). "Watch therefore, for you do not know on what day your Lord is coming" (24:42). No man, not even the angles or Jesus himself, will know!

How strange, then, that, despite those clear warnings, Chrisitans today spend so much time trying to determine the one date Jesus said we would not know until it was upon us.

What, therefore, is the point of Jesus' warning? It is not to calculate the hour, not to determine for God who will and will not be among the "redeemed," not to stand in readiness upon a mountaintop nor cringe in an underground shelter. Rather, it is to be "ready" whenever and however he comes. "Blessed is that servant whom his master when he comes will find so doing."

To Read The Label

I'm amazed at the number of folks who use one of the pesticides improperly and then come to our Extension Office for assistance. All of the spray materials have been tested and approved under certain conditions for special crops. If these instructions are ignored, more harm than good could result. I'm reminded of a call to a potato field near Lititz some years ago where the potato vines were dying; after a farm visit and some investigating we learned that a weed killer chemical had been placed into an old fungicide container during the winter months; the farmer thought that he was using a disease prevention chemical. The plants were badly stunted and yields decreased. In one of our 4-H Club Demonstrations given by Audrey Yunginger and Kathy Ney of Marietta, stress was placed on keeping materials in their original container and reading the label thoroughly before using. The recommendation continues to be very important.

To Consider Western Ewes

At a recent meeting of local sheep producers Prof. Benjamin Morgan from Penn State, stressed the use of western ewes to produce top quality market lambs. This is not a new practice in this county for I have helped unload several carloads in recent years. Several breeders reflected interest in buying additional ewes and I'd be glad to coordinate their needs and forward the order to Ben Morgan. Bob Harnish of Conestoga, R2, has used western ewes for many years and reported complete satisfaction in their lamb production. As

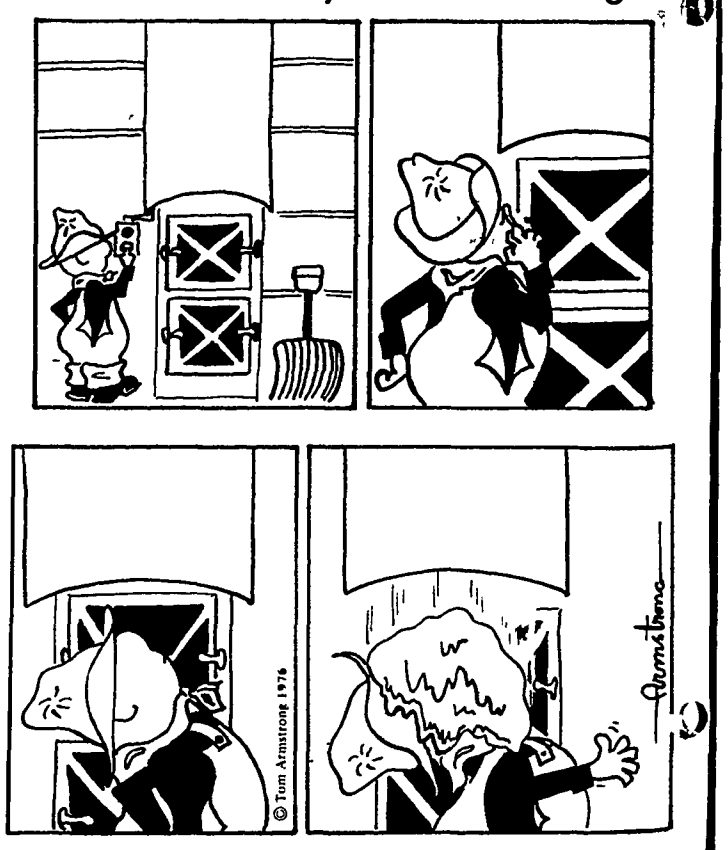
RURAL ROUTE

By Tom Armstrong



Peach situation

(Continued from Page 1)

until after April 15," William noted.

With 500 acres of trees to be concerned about, the Blevinses are happy to report that the erratic spells of warm and chilly weather have thus far created very little damage on their hilly orchard. They report some bud damage from back in January when the mercury dropped to the zero mark, but not much since then. A few cherry buds were also killed off at that time.

Earlier this week Blevins had a crew of 25 men begin pruning work. He admits it's a little late, but notes that the delay is due to their trying to minimize occurrences of "Canker" disease. It'll take an entire month before all of their trees are trimmed.

With the warm weather having continued throughout the past week, peach trees in the area are now close to "the pink stage." In fact a few are. How they'll do from now on depends largely on how cold it will get and what kind of a wind accompanies those temperatures, Eugene, a former Master Farmer, said. "We feel much better now than we did a month ago, however," both brothers agreed.

At the National Peach Convention last month in Hershey, producers from all over the country indicated that the national crop wouldn't be much better than 75 per cent. Extremely cold weather in northern states had killed off much of the buds, and southern areas were concerned about the early arrival of Spring. New York, for example, lost all of its peaches due to -68 degrees F. temperature.

The event in Hershey, which was later highly praised by the National Peach Council, was called the largest trade show ever by NPC president Paul McPherson of New Park, York County.

Producers in Hershey had indicated the crop may be short in some areas this year, but according to the Blevinses' report for southern York County, there should be no reason why demand should outstrip the supply here. They believe their 90 per cent estimate for their own orchard is pretty much applicable ot others in the area as well.

Explaining the weather situation somewhat, McPherson pointed out that peach trees need 750 to 900 hours of chilled weather — that is below 45 degrees Fahrenheit. Some areas in the South did not have that.

The trend in marketing peaches, if there is one, said McPherson, is towards direct marketing to the consumer. His labor costs have risen approximately 75 per cent in the last four to five years; corrugated boxes are up 200 per cent within the same time span; and transportation costs are up by 40 to 50 per cent. The direct marketing idea has meant more money for the producer and a fresher crop for consumers, he said. He's selling about one-third of his crop directly from the farm and another 10 to 15 per cent to roadside stands.

Approximately 90 to 95 per cent of the Pennsylvania peach crop is for the fresh market, McPherson said. There is no national check-off program, although individual states do have promotional programs. That and "favorable government regulations" are still big issues in the industry the NPC president said. OSHA regulations have given most producers reason for concern.

you drive toward Harrisburg on Route 283, the large flock of sheep that graze just west of Mount Joy belong to Bill Longenecker, another producer of lambs from western ewes. Local shepherds are to contact me for more information.

To Use Calf Hutches

The raising of dairy calves is a very important part of local dairy producers; also, this is often a highly neglected practice on too many farms. Our dairy expert in this office, Al Bair, is trying to promote this system of raising calves and I'd like to give him some help. To have a separate hutch for each calf outside and away from the main barn has many merits - the biggest one is that calves are healthier and a higher percentage of them are raised. A recent chat with Abe Barley Jr. at Washington Boro, R1, indicated that Abe and his brother, John, are sold on the calf hutch method and are constructing 50 units for their small calves. Our County Agent Tour into Wisconsin last fall included one of their good dairymen sold on raising his replacements in calf hutches. If a small dairy calf can withstand the weather of Wisconsin, it should be really comfortable in southeastern Pennsylvania.

To Wait For Dry Soil

Following church services two weeks ago one of my good garden friends, Ben Funk on Pilgrim Drive, said that he was ready to make garden; the question concerned whether he should go ahead and plant. Since that was the early part of March, I tried to discourage him from doing too much planting at that time. In most cases I doubt if the soil would be dry enough to work up nicely. However, I was surprised earlier this month when Mrs. Dorothy Fry of Stevens R1, Pa. told me that some of her neighbors made garden the last few days in February; how about that for getting "spring fever?" The type of soil and the location of the area would have much to do on how early the soil should be worked; heavy clay soils are slower to dry out and low areas have rather poor drainage. Be patient and allow the soil to dry before working.

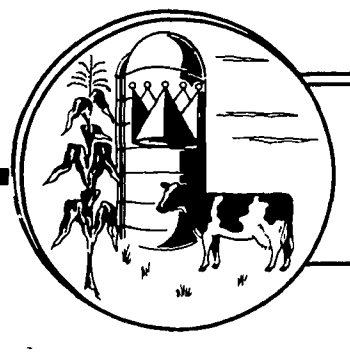
Add Sour Cream

If your mayonnaise is too thick, thin it by adding some sour cream. Never freeze mayonnaise, cold will cause it to separate.

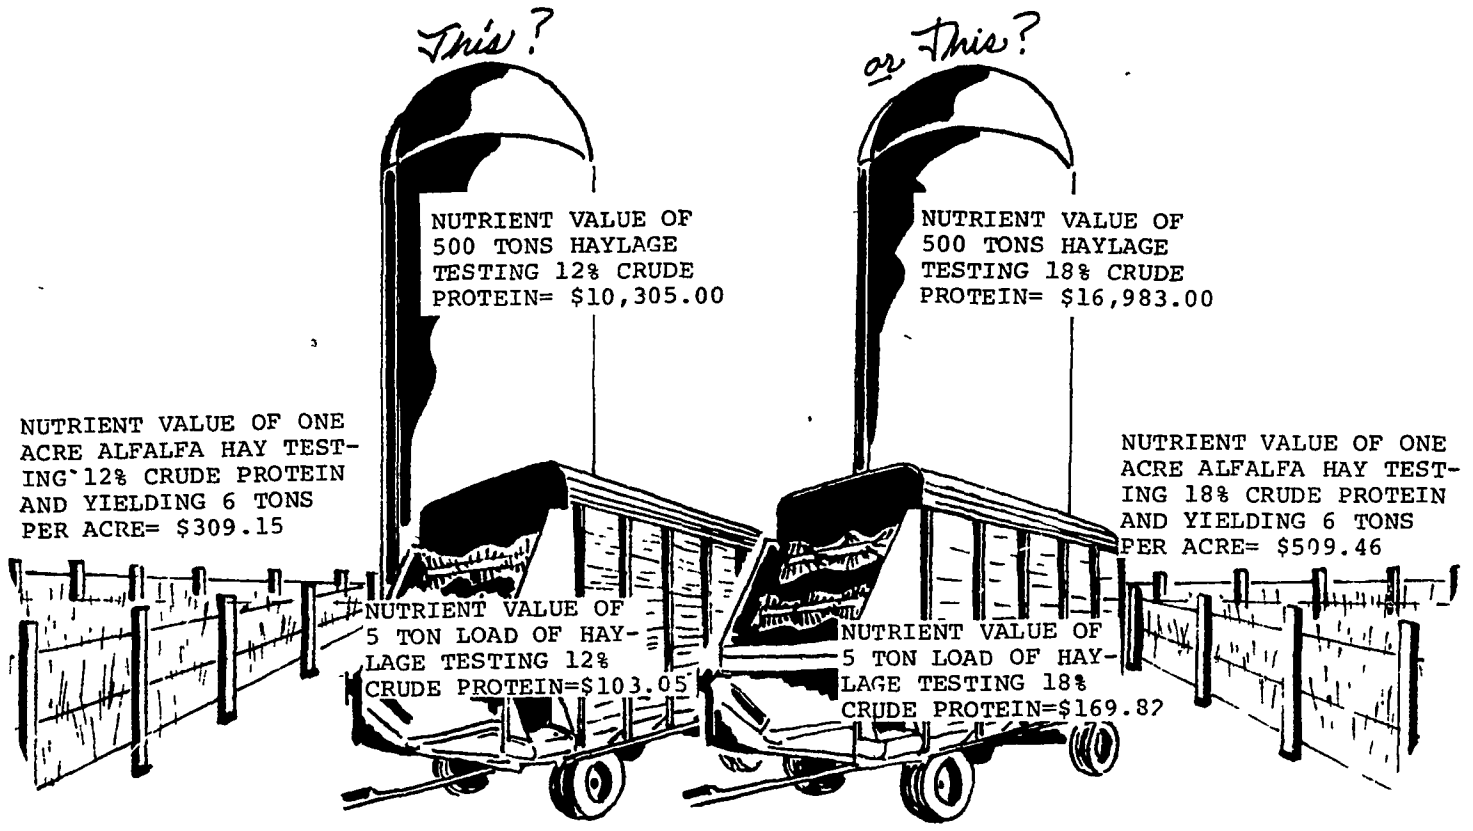
Simple Solution

To remove burnt-on food from enamelware, boil two tablespoons of baking soda for each quart of water in the utensil.

AGRI-KING
KEY TO PROFIT



Save Protein In '76



This?
or This?
NUTRIENT VALUE OF 500 TONS HAYLAGE TESTING 12% CRUDE PROTEIN= $10,305.00
NUTRIENT VALUE OF 500 TONS HAYLAGE TESTING 18% CRUDE PROTEIN= $16,983.00
NUTRIENT VALUE OF ONE ACRE ALFALFA HAY TESTING 12% CRUDE PROTEIN AND YIELDING 6 TONS PER ACRE= $309.15
NUTRIENT VALUE OF ONE ACRE ALFALFA HAY TESTING 18% CRUDE PROTEIN AND YIELDING 6 TONS PER ACRE= $509.46
NUTRIENT VALUE OF 5 TON LOAD OF HAYLAGE TESTING 12% CRUDE PROTEIN=$103.05
NUTRIENT VALUE OF 5 TON LOAD OF HAYLAGE TESTING 18% CRUDE PROTEIN=$169.82

The above examples show approximate loss of actual nutrient feeding values including.....digestible protein, energy, vitamins, and minerals based on soybean meal at $200.00 per ton and shelled corn at $1.40 per bushel. Crude protein values are based on 10% dry matter.

Former FFA'er selects horticultural career

By MELISSA PIPER

MILLERSVILLE — As the time grows near for spring planting, many people will be flocking to area greenhouses for beginner plants and the ever popular Easter flowers. And if you should happen to visit one of the smaller operations near here on Walnut Hill Road you may be waited on by a tall slender young man who is making greenhouse work his career.

Keith Herr looks over some lettuce plants in his greenhouse. The Millersville area youth is looking forward to a future in horticultural work.

Keith Herr, son of Mr. and Mrs. Abram B. Herr, began working at his grandfather's greenhouse when the family moved to this area five years ago. All during his high school years, Keith worked around the operation after school and on Saturdays doing odd jobs, potting geraniums and delivering orders to area stores. The youth now works full time at the greenhouse business and is preparing for a busy spring season.

Keith spent the first two years of high school at Penn Manor and was a member of the FFA chapter there. Interested in ag mechanics, the youth attended several competitions in that area. He also retained his interest in horticulture and took numerous projects in that field.

Keith spent two years working parttime for Funk's Market and with his experience gained on the job, the youth was awarded the state proficiency award for horticulture in 1975 by the FFA.

Keith has learned the greenhouse business from the bottom up and explains his duties as "working on every level from planting lettuce to maintenance and delivering flowers to area retail stores."

The Herr's operation is mostly based on the wholesale selling of lettuce, tomatoes and flowers although some retail service is available.

Keith would eventually like to expand the retail end of the Herr operation but explains that the actual work may take some time.

"The wholesale business has been good for us but in the future I think the expanded retail outlet may prove worthy."

"Because of the other greenhouses in the area, I would like to establish in some other part of the county but for right now we'll mostly like stay here."

The horticulture business has changed rapidly in the past few years and Keith noted some of the technological advances. "Many new methods of greenhouse work have come into practice and it is a job to incorporate them in the operation." "We have become more aware of heating for example since the fuel bills have gone sky-high and anything we can do to help is important."

Although the Herrs refer to their operation as small, they raised 6000 geraniums for sale last spring.

Sports have also been an important aspect of Keith's life. At Penn Manor, the youth wrestled for two years and won letters for participating in the track and cross country programs. He has also been a member of the Boy Scouts.

Along with first hand experience, much of Keith's instruction on the horticulture industry came from attending two county vo-tech schools, Keith majored in floriculture at Brownstown Vo-tech during his junior year and moved to the program at Willow Street Vo-tech as a senior. As a perfect ending to his graduation year, Keith received the Keystone FFA degree in January. "It was a goal I had worked for and I am certainly proud to have been chosen for the honor," he explained.

"Horticulture has become a real interest to me and doing the work has been very educational."

To the gardeners and the retail stores across the county, Keith's interest in growing plants and flowers will be an important asset to their homes and businesses in the future.

Commentary

[Continued from Page 10]

power, lots of "red tape," and more and more controls.

Some segments of agriculture are already controlled by either government, labor, or big business. As one of the smallest minorities in the country, and yet as representatives of the most important segment of any nation's economy, farmers have a lot to protect: their livelihood, their independence, and the free enterprise system — not to mention food and fibre which everybody needs and wants. I'm not convinced a national food policy will help the situation. It may sound good — but a few other phrases have sounded good in the past too, and they turned out to be partially unsatisfactory. Try "social security," "revenue sharing," "environmental protection," "detente," "Great Society," "occupational safety and health," and "gun registration."

Food policy

[Continued from Page 1]

than the management of the agriculture of a single country, Grant said that his organization is opposed to any plan for an international super agency to store and distribute food worldwide. The many imponderable factors in the food production and distribution equation appear to be beyond the skills of any management group, he said. Grant said that efforts in America to manage food were largely ineffectual although much effort, men, and huge sums of money were devoted to the job.

"During this forty-year experiment we swung from shortages to surpluses and back again several times. Apparently, our managers misjudged the weather, economic conditions or consumer desires — or possibly all three at once. On a worldwide basis such errors in judgment would be magnified and potentially catastrophic," he added.

"For this reason, if no other," he said, "our organization is opposed to a super supply agency to manage the food distribution."

Turning to the need for a viable world food policy, Grant suggested that such a policy should include several major provisions.

For the short-term problem of distributing food to disaster areas, he suggested an international food fund. All nations would contribute to this fund and food would then be purchased and distributed as needed through existing agencies. Purchases would be made through normal food trade channels, without a politically controlled hoard of food and feed overhanging world commodity markets.

"In view of America's past record of aiding the needy," he said, "I am sure that we could be expected to contribute generously to such a fund. This, we believe, would be preferable to having the major exporting countries maintain huge supplies of stored foodstuffs because these stocks would be deterrents to improved production as long as they overshadowed the market."

Grant pointed out that several major agricultural producers such as the European Economic Community have distorted or prevented needed adjustments in production patterns through the use of unwise state directed and financed management programs.

"We are to the point that I doubt that any of us can afford the luxury of uneconomic production of farm commodities," he said. "Such programs have the undesirable effect of preventing the development of new, more economical production areas because cheap subsidized products accumulated under such programs often are dumped on world markets. We cannot justify or condone the dumping of subsidized food products on the world market."

Turning to the long-term problem of increased food production Grant called for an all-out effort by all nations to improve the incentives for food production and for the introduction of new technologies and supporting resources into local agriculture.

Grant said that contrary to the wailing of some, the "Green Revolution" is not a failure. He said that these doomsday prophets have overlooked the fact that the necessary fertilizers, pesticides and management often have not been applied along with the new crop strains. "You cannot apply part of a new technology and expect success," he noted. "The new plant strains, where used with the necessary supporting technology and incentives, have increased yields several times over."

"In passing, we might note that many locally adapted native plant strains are immediately capable of greatly increased production through the simple application of modern agronomic practices," Grant said. "They are locally adapted, often disease and insect-resistant, and are widely available."

To get the necessary technology into the hands of producers, Grant suggested that efforts of developed countries to assist the more backward agricultures be intensified. This he said is one of the keys to long-term improvement in the diet of many people.

Pointing to the long time involvement of the United States in such assistance, Grant said, "We have agricultural scientists and educators on loan to many countries where they help apply more modern technology to local agriculture. We expect to continue this help," he said, "but, there is a great need for such things as fuel, fertilizers, chemicals, and financial backing which the developed countries such as America and Japan could provide."

Noting the recent emergence of Brazil as a major supplier of soybeans in the world oilseed market, Grant said, "I think you have seen demonstrated in Brazil what can happen when funds and technology are provided to some of the less developed agricultures. From limited exports of soybeans five years ago, the Brazilians — primarily with Japanese help — have become a major exporter of soybeans. I am told that there still is vast acreage which might be developed if there is the incentive of a market.

"We have a number of American soybean growers who are upset by this competition for the Japanese market, but as population and markets grow elsewhere, the Brazilian soybeans should not prove to be a problem on a long-term basis," Grant said.

"In summary," Grant concluded, "I believe that we can solve the world's 'food problem' if we are willing to let food move freely through trade channels, if we intensify our help to the developing nations to modernize their agriculture, and if we are willing to support this technology with the necessary production inputs."

"In spite of some dire predictions to the contrary, I think the world can feed its malnourished if farmers are given the incentive and means to produce. Our experience is that a directive from a manager — by whatever name — does not constitute an incentive, but that an opportunity to make a profit does."

Broiler - Turkey growing discussed at educational meeting

By MELISSA PIPER

LANCASTER — Poultry growers have seen myriad changes throughout the past decade and are still experiencing advances in technology but good common sense and everyday management tools will still be valid in years to come, according to three poultry experts who met here late last week.

Guests of the Lancaster County Poultry Association, Dr. Richard Long, technical specialist for Merck Animal Health Division, Charlton Whalley, manager of the Broiler Grow Out Division for Bayshore Foods and Bob Farrell, procurement manager for Swift Inc., spoke before a large audience at the Farm and Home Center as a third meeting in a series of educational programs for poultry growers in this area.

Dr. Long addressed the group first and used a slide presentation to reinforce his ideas on starting broilers. Although the health specialist noted that many growers are under contract, he explained that it is still important for the manager of a poultry operation to use good judgement in his everyday practices. "The input that a manager gives to his operation is just as important as the contract itself," he added.

"Individual farmers are still required in this business and their work is important to us."

Long criticized those producers who filled their houses with expensive automated equipment only to find that the small chicks could not use it. Pointing to his slides, Long showed unused automatic waterers and feeders which were either too high, blocking travel for the small animals or too difficult to operate.

"Even though those clear water bottles look out of place in a modern operation, I wouldn't think of starting chicks on anything else," he stated.

Citing the need for adequate feed and water, Long again referred to slides which showed empty water bottles, and spilled feed pans. "In this type of operation you're just kidding yourself," he chided "this isn't operating efficiently."

Naming one major fault with many managers, Long noted that too often junk accumulates around the poultry houses and inside the pens allowing rats to become attracted to the area. "Clear away the weeds, equipment and junk," he stated, "chicks are destracted by even a light bulb and will flock around it by instinct."

"It takes a lot of hard work and common sense to raise chicks," the health specialist explained, "but if you do the job it can be a good business."

Doing a good job is what makes a successful manager, according to Charlton Whalley who spoke to the poultry growers on what supervisors expect from them.

"A good grower is an important asset to any company," Whalley noted and that is why flock supervisors expect the best upkeep and decisions."

A former flock supervisor himself, Whalley cited several important factors that managers should be aware of. "One thing is extremely important is to cull then get rid of the animals," he explained. "Dead broilers should not be left lying around as they invite disease and predators."

Whalley also noted the importance of properly cleaning feeding and watering equipment and also cleaning of the house itself.

"Remember to blow old accumulated dust off the building fixtures," he said, "and wash the house down when weather permits."

The Bayshore manager also told the growers that heat was vital to broiler growth in the winter. "Make chicks comfortable with heat in the winter," he related, "before chickens come into the building heat the facility 24-36 hours so that the dampness is gone."

Whalley closed his remarks by reminding growers to also keep access roads in good condition for the truck drivers.

"Paying the towing charges can add up," he noted, "your presence when a load goes out is helpful for giving directions and showing the driver the best methods for getting near the poultry house without getting stuck."

Turkeys are hard to raise and need special attention according to Bob Farrell who represented the Swift Company at the meeting.

Farrell reiterated much of the recommendations for producing healthy broilers and stated, "growing turkeys is very similar to broilers but they do need much more care."

One area which the Swift representative dwelt on was the incidences of drug residues in turkey. "We must be extremely careful of this problem," he noted, "it takes proper care and understanding to work this out."

"Know just what drugs may be in the food or water and make sure they are used properly," he cautioned.

Adding that many turkey producers were still independent he stated, "small farmers must begin to realize that marketing will not be getting easier, they should know their markets and be in agreeance on terms."

Pork honors awarded

[Continued from Page 1]

here. Dale Nolt, Manheim, captured the grand champoin entry with his 200 pound hog. The gilt's statistics recorded at one inch backfat; 6.7 inch of loin-eye; 32.6 percent ham-loin with a length of 30 inches.

George Getz, Lancaster, exhibited the reserve grand champion which entered the contest at 205 pounds. The barrow recorded one inch of backfat with 5.5 inches of loin-eye; 32.3 ham-loin percentage and a length of 30.8 inches.

Awards were also presented to the winners of the Lancaster County Fall Carcass Contest. John Strawbridge took champion honors for his 215 pound entry with Gehman's Mill capturing reserve honors for their 235 pound hog.

John Henkel, Strasburg, was honored at the Lancaster Pork Producers banquet for having served as a pork director at local, state and national levels and for his service in promoting pork. The Yorkshire producer received a plaque from his fellow producers.

Kerry Boyd, Ephrata R1, was named the winner of the James Z. Martin Swine Achievement Award which was presented by M. Max Smith, Lancaster County Agent. Smith noted that Boyd had successfully completed several 4-H and FFA swine projects and had captured the 4-H Champion honors for his hog entry at the county show held last summer.

'Homeless' milk possible

[Continued from Page 1]

disastrous had they not been withdrawn due to outside pressures."

Dutton also noted that only about half of the dairymen in the Order 2 market belong to milk cooperatives. "If it drops much below that, we could lose the Order," he warned. Eastern wants to see it kept.

Speaking briefly about Eastern itself, Dutton said the cooperative is "financially viable, has a stable membership of over 8,000 in five marketing orders, and will show black figures at the end of the year." Membership dues are not going to be raised. Handling 3½-billion pounds of milk annually, the dairy co-op has a payroll to members which exceeds $240-million per year.

With milk production climbing at a rate of three to five percent per month as compared to figures of a year ago, Dutton foresees some "homeless" milk for dairymen who might not belong to cooperatives. He explained that one of the best ways a farmer has to protect his investments is by joining a cooperative which can guarantee a market and a milk check.

Should independent producers find themselves in a poor market situation, Dutton says a milk handler is required by law to notify the farmer in advance that he is about to lose his market. Eastern, Dutton says, is willing to handle the milk from those producers if they (the independent shippers) notify Eastern seven to 10 days in advance that this is what they want to do. However, there would be a charge of $1.75 per hundredweight for this service for seven days, after which other arrangements may be made.

The increased production seen now is due to the more favorable milk price to feed ratio, higher milk prices, and fact that off-the-farm jobs are scarce, Dutton said. It is not expected to disturb Eastern's business due to their marketing milk in five federal Orders throughout the Northeast. "Most all of our milk will be sold without surplus," the public relations director remarked.

"Supply and demand sets the prices - we must produce milk to fit the needs of the market," Eastern's representative exclaimed. The cost of production, although still climbing, is not going to be rising as much as it did last year. Milk prices, now well above levels of a year ago, are expected to remain there at least through August. The last four months of the year may see prices drop slightly below those encountered during late 1975. Eastern originally projected prices of $9.73, $9.89, $9.92, and $9.71 for the consecutive months of September, October, November, and December but a significant drop in M-W prices indicates that approximately 25 cents should be subtracted from each of the above figures. The average price by the end of 1976 is going to be around $9.26 if present projections hold true, compared to $8.56 last year.

The recent increase in milk support prices is not going to increase prices paid to farmers, Dutton said. But they will set a floor when prices drop. Eastern, he noted, had been pushing for the 85 percent parity level which was approved by both Houses of Congress, then vetoed by President Ford, and left go at that by Congress when it came up for a veto. Dutton reflects on the proceedings as having been nothing more than a "political football." The cooperative had also requested quarterly adjustments of parity, which was passed. He noted that attempts by cooperatives last year is what was responsible for having milk prices raised last October. That resulted in milk prices being relatively good for the latter part of 1975 while they were "depressed" during the first nine months of that year.

Returning to the question of the Federal Order 2 amendments proposed by some groups, Dutton emphatically stated that Eastern is opposed to the plan on all counts. One point in particular refers to the FOB farm price, which Eastern supports and wishes could be implemented elsewhere as well. That limits the hauling charges to the producer to 10 cents per hundredweight, and creates differences in paying prices. That's especially true in the metropolitan New York and northern New Jersey areas where the situation is compounded by union labor contracts.

Farmer cooperatives, under pressure from various groups, including the Justice Department, must be strong, Dutton said in his concluding remarks. He emphasized the need for co-op membership in Order 2 to stay above the 50 percent mark lest the entire Order be in jeopardy. "We need cooperatives for protection, price, and stable marketing," he said.

Cattle export meeting scheduled

In recent weeks Canadian government cattle buyers have been on the Lancaster Market interested in buying finished cattle to ship into Canada. President of the Lancaster Stockyards Inc., William G. McCoy, is interested in getting any local feeders qualified to ship into Canada in order to receive top prices for their cattle.

The Canadian government prohibits the use of diethylstilbestrol (DES) hormone in the feeding of their cattle; animals that have been fed or implanted with DES are banned from entry into Canada. Feeders who are interested in exporting their cattle will be required to take a seminar given by the Extension Service explaining the ban on the hormone; papers will need to be signed verifying this information. Also, papers will need to be signed by the local veterinarian verifying the cattle have not received DES.

A public meeting is scheduled for **Wednesday evening, March 31, at 7:30** p.m. in the Auction Barn at the Lancaster Stockyards for interested feeders. The necessary papers will be on hand for complying with the Canadian regulation. Mr. William G. McCoy, President of the Stockyards, and M. M. Smith, County Extension Agent, will present the procedure and needed information.

ATTENTION: Dairymen

For more production and better herd health

Feed Dairy Special 30XX

With production costs on the rise, it's more important than ever to keep your cows in top condition and milking at full potential. By feeding Vigortone's Dairy Special 30XX, you can do just that.

This highly fortified pre-mix is specially designed to make-up for basic nutrient shortages in silage rations. It provides extra levels of calcium, phosphorus and vitamins A, D, and E that are so vital to proper ration performance.

Programmed nutrition of this type encourages better milk production, good herd health and helps you get more value out of home-grown grains and roughages. Better yet, it lets you use whatever sources of supplemental protein that suit your pocket book best.

Vigortone pre-mix meter — for automated feed handling systems.

Vigortone's new metering device accurately incorporates the proper Vigortone pre-mix into your grain, silage or haylage. Simply set the timer and calibrate the desired amount of pre-mix per minute.

Complete life cycle

If you want more information on efficient lifecycle feeding programs for dairy, see your Vigortone serviceman soon, or return the convenient coupon below.

grain lamp drying..

A NEW PROVEN TECHNOLOGY

- **Saves Energy** ... Costs as little as **3-4 ¢** per bushel.
- **Increases corn weights** ... Get up to 10% more grain by weight from your bin.
- **Preserves corn quality** ... controlled natural curing with GRAINLAMPS doesn't vaporize kernel ingredients, doesn't deteriorate starch quality. See GRAINLAMP dried corn and see the difference. Better than cribbed corn! Better feeding results.
- **Non-stop harvest.** The GRAINLAMP system eliminates batch-drying bottlenecks at harvest-time. Non-stop filling ... like a corn-crib. For the big producer and the small grower.

Sealtest closing 'no problem'

By DIETER KRIEG

COCKEYSVILLE, Md. — The significance of the Sealtest plant closing in Philadelphia later this year is that "it represents one more step by Sealtest to reduce their position in the fluid milk market," says Ralph Strock, general manager of Maryland Cooperative Milk Producers. He notes that the dairy foods giant is practically out of New York City, and out of Pittsburgh and Cleveland and Washington.

Right now, the only substantial Sealtest plant left in the East is this one here in Baltimore, Strock said. How much of the milk which had been bottled in the Philadelphia plant is likely to go to Baltimore for bottling when the plant in the Quaker City is closed this summer is unknown. That plant (Baltimore) has in the past received some of its milk from MCMP but the bulk came from non-co-op producers. It is expected, however, that Sealtest's position in Philadelphia will be weakened.

Strock says he does not believe that the closing of the Sealtest plant in Philadelphia will affect producer prices. The milk will just simply be bottled elsewhere, and if this continues to be done within the

Freeburn Love of Eastern Milk Producers says Sealtest's closing in Philadelphia will not affect his producers.

Mid-Atlantic Marketing Order, then prices will not be affected. "Producers in Order 4 will continue to enjoy those Class I sales," the executive said.

According to Strock, Sealtest is going out of fluid milk because many chain stores have put up their own bottling plants and the competition has therefore become rather stiff. It's a trend that has been occurring all over the country.

The problem which Strock sees as a result of this is "how can little dealers stay in business when they're having to work with what little milk is left over after big bottlers are done buying?"

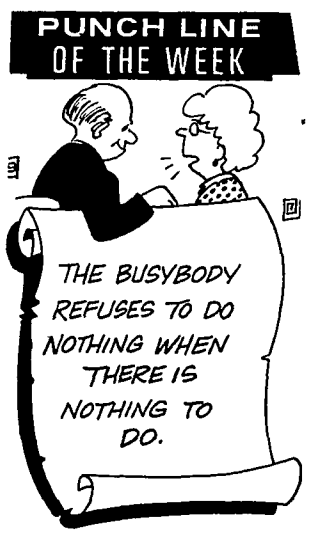
Inter-State Milk Producers of Philadelphia may be more directly involved with the Sealtest closing, but they anticipate no problems either. "It appeared like a big decision," said Dr. James Honan, Inter-State's general manager, "but it didn't make a ripple in the market." He adds that none is expected and that his cooperative has things well under control.

Eastern Milk Producers Cooperative, which handles approximately half of the milk which goes into the Philadelphia Sealtest plant, does not expect any problems either. Freeburn Love of that cooperative says other outlets will be found for that milk and some can be absorbed at their Chambersburg manufacturing plant.

According to a news story in the **Philadelphia Bulletin**, Sealtest will continue to stay in the manufactured dairy products category. The Philadelphia paper's account quotes Sealtest's general manager, Richard Leach, as saying: "It was an economic decision, the plant was losing money. The decision to close it was based on increasing production costs and a lack of volume and growth."

The milk companies affected are Pennbrook and Breuninger. Bottling will continue for approximately five more months due to bottling contracts with suppliers. Cooperatives involved are working on that issue, and as mentioned earlier, they see no problems affecting them or their membership directly.

Leach noted in his interview with the **Bulletin's** reporter that the plant wasn't profitable because of a "surplus manufacturing capacity in the Philadelphia area. I doubt that any plant in the area is operating to its full capacity."



Meet our Berks correspondent

[Continued from Page 1]

came to be a farm reporter. Although she and her husband are not in the business now, neither is a stranger to farming. She was raised on her uncle's 250 acre dairy farm where she tended chickens, helped with the milking and planting, and drove a tractor well enough to pull a hay rope. (She hasn't been able to find out whether anyone still lifts hay and straw into the barn loft with a rope and forks, but her uncle who worked the forks always said it took a good driver on the other end to handle that rope.) Stan lived and worked five years on a large truck farm operation where he was involved with produce from planting to marketing and also helped with the hog raising and butchering. The couple discussed going into farming in the early years of their marriage, but they unfortunately came of age when farming was a dying business in their area and land was so high that it was impossible for a young couple to buy a farm.

Her farm background left Judy with a zest for growing things which she exercises on an ever increasing number of houseplants and a summer flower garden, which she regrets is a much smaller version of the one she remembers on the farm. But space for flowers is limited, she points out, by her husband's energetic gardening habits. Vegetables are his line and considering their "home garden" in New Jersey which took up about a half-acre of land, Judy is sure that their garden in Stony Run will eventually replace most of the grass in their big side yard.

In addition to being a reporter and parttime student at Kutztown State College, Judy enjoys sewing and handcrafts. She admits that her new job limits the time she has to spend on those activities now, but she likes the work and the people she meets. In the short time she's been with the paper, she has found that a lot has changed in the years since she lived on a farm, and agriculture has become a sophisticated business. But she adds that it is obvious that farm people haven't changed - most are as friendly and helpful as she remembers them to be.

'Best planning done locally'

KANSAS CITY, Mo. — Personal rights and incentives which have allowed American agriculture to surpass other nations in productivity and efficiency, are being eroded, according to American Farm Bureau Federation President, Allan Grant.

"There is proof that economic progress and cultural advancement flourish best where people are free, responsible individuals," Grant said here Thursday at the Bicentennial Farm Forum '76 in the Plaza Inn International.

Grant, a California rancher who now heads the 2,500,000 member-family farm organization, examined the creative forces contributing to American farm productivity, as part of the program conducted by the Agricultural Hall of Farm and National Center, Bonner Springs.

Areas in which the farm leader said personal rights are now under attack, involve federal land use planning, government attempts to control the market system, and "unrealistic burdens imposed by federal estate and gift taxes."

"We feel that those who own and operate the land should have major responsibility for its development, and that the best land use planning is done locally, by private landowners," Grant said. He added that area wheat farmers and grain producers in all parts of the country lost hundreds of thousands of dollars in foreign grain sales because of "ill advised attempts at international market-management" on the part of the Administration, which last year temporarily halted U.S. grain sales to the Soviet Union and Poland.

Telling of his recent appearance before the House Ways and Means Committee in support of the Burleson-Curtis bill to update federal estate tax laws, Grant noted there have been no major changes in the law during the past 30 years while a generation of inflation and urban development has been shoving farm estates into higher tax brackets which are out of touch with the reality of farming.

The bill, introduced by Representative Omar Burleson (D.-Texas) and Senator Carl Curtis (R.-Nebraska), would raise basic tax exemptions and any property in use for farming, woodland or scenic open space, would be assessed for current instead of potential use such as for housing development.

Grant said that more than 100 members of Congress are co-sponsors of the Burleson-Curtis measure.

Dr. Charles Livak (left) quality assurance director for Penn Dairies presents Tony Eberly with the first place trophy during the recent Area FFA Dairy Products Judging Contest. Eberly, an Ephrata freshman, was the top individual judge in the contest. Ernest Orr, coach for the Ephrata team looks on.

Cloister FFA team wins area dairy products contest

LANCASTER — The Cloister FFA team representing Ephrata High School, captured its third consecutive win under the leadership of coach Ernest Orr, at the annual area FFA Dairy Foods Judging Contest held at Penn Dairies here on Wednesday.

Tony Eberly, son of Mrs. and Mrs. Mahlon Eberly, Denver R2, was the high individual judge and helped to guide the Cloister team to victory. Other members of the team included Lamar Groff, Stevens R1; Hans Groff, Ephrata; Troy Gass, Ephrata and Mike Eshelman, Ephrata.

Lee Ferguson, representing Solanco High School, was the second high individual judge. Solanco's team placed second in team competition.

Dr. Charles Livak, quality assurance director for Penn Dairies, presented Ephrata with the rotating trophy and in doing so announced that it would be retired with the Cloister FFA.

During the competition, the students were asked to identify several different kinds of cheeses and to judge milk and cottage cheese for flavor differences.

The high scoring members of Ephrata's team will be traveling to Penn State to judge in the state competition during FFA Activities Week in June.

Lititz area barn destroyed by high winds

Sunday's brief violent wind storm raced through the John Reiff farm on Mountain Road in Penn Township, causing an entire side and the second floor of a stone barn to collapse, killing four cows and injuring another out of a herd of 44 cattle inside the barn.

Neighboring farmers were on hand Monday and Tuesday clearing away the debris from the fallen wall and rebuilding the side of the barn. About 100 men and boys turned out at various periods throughout the two days to help the Reiffs, some accompanied by wives and daughters who helped prepare huge quantities of food and drink for the work crew.

Reiff, who has been farming in this area for many years, said that he and his wife noticed the dark skies to the northwest about 1 p.m. on Sunday, and within seconds the water in a small pond behind the house was being whipped into four and five foot waves. While they watched the pond, they saw the side of the barn facing the house crumble into a huge cloud of dust. It all happened within seconds, Reiff said.

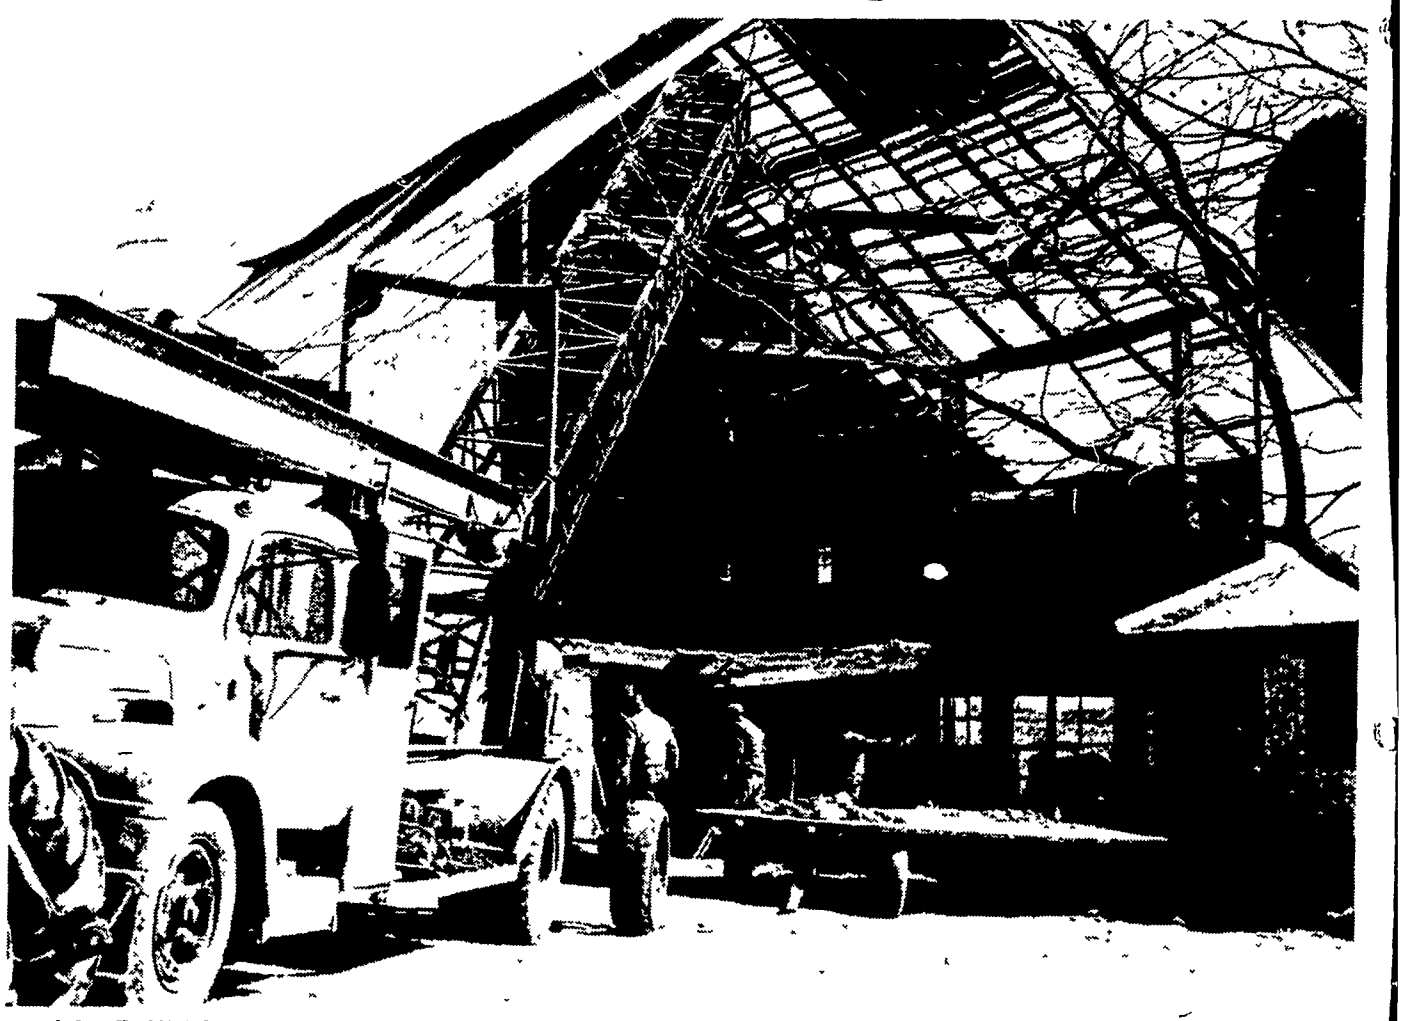
What happened, he explained, was that the wind sucked two large stones out of the side of the barn, and this in turn caused the rest of the wall to fall. A large part of the roof was also torn off, leaving bare timbers. The second floor collapsed after the stones were torn out, falling onto the cattle housed on the ground floor. Two cows were killed instantly, Reiff said, and two others died later in the day. A fifth cow seemed to be recovering, but it was being watched closely.

The Penryn Fire Company, of which Reiff is a member, was called later Sunday to help uncover the cows from the stones and other debris that fell on them.

Neither the Reiff's house nor any other buildings on the farm were reported damaged by the storm. The wind, which some describe as a small twister, moved in from the northwest, and apparently traveled across the pond toward the barn, missing the Reiff's house by only a few yards.

Facing the wind-struck side of the barn, and looking inside where the wall used to stand, one can see untouched bales of hay still in place on the undamaged portion of the second floor.

Surveying the damage area, Reiff noted that had the storm occurred later, closer to 5 p.m., it would have caught him and his family inside the barn doing the milking.



John Reiff (right) and neighbors clear stone and other debris out of barn on Reiff's farm on Mountain Road in Penn Township after Sunday's violent wind storm knocked in the side of the barn and ripped off part of the roof. Four cows were killed and another injured when the wall and the second floor of the barn fell on them. No persons were in the barn at the time.

Conservation publication available

A popular U. S. Department of Agriculture, Soil Conservation Service publication has been reprinted. Continuing requests have led to a new printing of the bulletin, "Conquest of the Land Through 7,000 Years."

In 1938 and 1939, Dr. W. C. Lowdermilk, former assistant chief, Soil Conservation Service, studied the agriculture in countries where the land had been under cultivation for thousands of years. This study was to see if the United States of America, then recovering from the dust bowl and the gullying of the South, could benefit from the experience of older civilizations. The publication is from the findings of Dr. Lowdermilk in that two-year study.

Copies of "Conquest of the Land Through 7,000 Years," may be obtained from the USDA, Soil Conservation Service.

Wheat Topdress

URAN® does it fast, long and uniformly for higher quality and higher yields.

For topdressing wheat, you need nitrogen that goes to work fast. Also nitrogen that keeps on feeding a long time. Nitrogen to make the grain stool out, fill better, and develop large heads of plump kernels.

You also want smooth, uniform application. Because you don't want a pattern of hills and valleys in your wheat that can hurt yields and profits.

What nitrogen can do all that? Our nitrogen solution. URAN.

URAN is nitrogen in its most useable form for quick uptake by the crop. Plus, URAN is two other forms of nitrogen for long-lasting feeding. And because URAN is a liquid, it goes on uniformly, for uniformly higher yields. You can even add herbicides to URAN and get two jobs done in one easy trip.

Order URAN from us today. It's everything you need for topdressing wheat.

Cooperatives need strengthening

By DIETER KRIEG

MOUNT JOY — What's wrong with farmer cooperatives? Not a whole lot, as far as Owen K. Hallberg is concerned. In fact, he emphatically states cooperatives have a "proud and illustrious history." Farmers have been able to lift themselves up by their bootstraps because of cooperatives, he said.

But it's not all roses. There are a few thorns, the president of the American Institute of Cooperation pointed out. A man who has worked for a number of prestigious companies and cooperatives, and is known nationally for his authoritative views, Hallberg was guest speaker at the 12th annual meeting of Atlantic Breeders Cooperative. The event was held here on Wednesday.

Cooperatives need to improve their public image, stop bickering among themselves, educate both insiders and outsiders, and in general pull together to meet the threatening challenges from society. "If we slow down our thrust in cooperatives, then the 'sink factor' comes in," the executive warned.

Hallberg sees farmer cooperatives as a ligitimate business system which has definite advantages over other forms of enterprises. He advises that farmers become aware of these "unique characteristics" and capitalize on them. A primary advantage cooperatives have is that they deal with and involve people.

In presenting his views, he said farmers should recognize that: 1. cooperatives serve an economic need; 2. an interested and concerned membership is vital; 3. capable management is needed; 4. they should be attuned to the times and prepared for changes; 5. quality, price and service aren't to be overlooked; 6. financial information should flow two ways; and 7. intercooperation among farmers and their cooperatives should be evident on a local, state and national level.

Some misunderstandings have caused the entire cooperative concept to take a beating lately, Hallberg exclaimed. He noted that attacks on them and the Capper-Volstead Act, which gave life to cooperative farmer organizations, are coming from top officials in the Justice Department, congressmen, the White House staff, and special interest groups.

Here's where the sink or swim factor Hallberg referred to earlier comes in. He is convinced cooperatives are for the good of agriculture and is encouraging all those connected with them to do their part in improving cooperatives' image and performance.

Steps he outlined for improvement include: 1. communication with insiders - members, directors, employees, and managers; 2. communication with outsiders - including housewives, clergy, congressmen, community leaders, extension personnel, and agribusinessmen; 3. public relations work with the media and expanding educational work. On the latter, Hallberg commented: "Cooperatives have been taken for granted; they're not completely or even partially understood. Education is a never-ending concern."

One of the points Hallberg repeatedly stressed was cooperation between various cooperatives. He asks: "Why is there so much bickering between them when they should work together?" and is hopeful that this is one area where the cooperative movement will see improvement.

"Cooperatives are not getting too big," Hallberg asserted. He challenges opponents of that statement to question the bigness of large corporations and adds that farmer cooperatives are only a drop in the bucket in comparison. "Furthermore," he added, "competition is going to get worse and those companies won't stop growing."

The final answers will have to come from farmers themselves, he said. "To turn your back on politics you must be prepared to live with the laws of your adversaries," he said in his closing remarks. "The reason that history repeats itself is that no one listened the first time around."

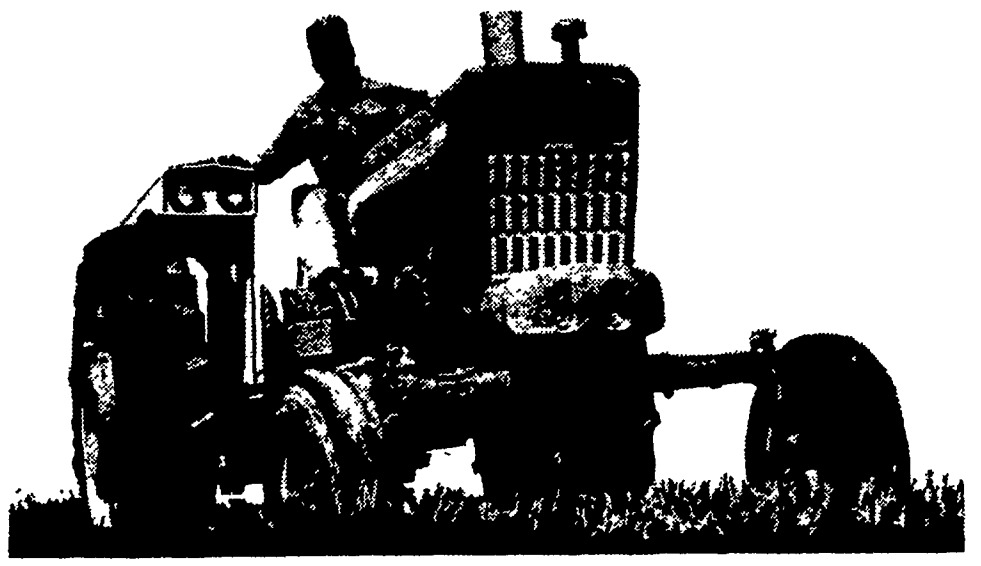
Why sweat out another season with worn out machinery?

When you try to make obsolete equipment do for "one-more-season", you're asking for trouble. Like inefficient operation, endless repairs and costly down-time. New equipment takes money, but this need be no problem for you.

Farm Credit loans are readily available . . . at reasonable rates of interest . . . with repayment scheduled at times most convenient to you. See Farm Credit for financing the equipment you need today.



COME IN, LET'S TALK IT OVER!

FARM CREDIT SERVICE

Production Credit Association

FOR MORE INFORMATION, CONTACT YOUR LOCAL COUNTY OFFICE.

Federal LAND BANK Association

"I could buy a 4400 Combine and a self-propelled chopper for about $54,000... but that doesn't make much sense."

"Instead, for $54,000 I can buy a Uni-Superchopper, a big Uni-Combine, a manure spreader, a Cut/ditioner — and send my boy to college for a year!"

New math? No. It's Uni-System economics, using suggested dealer list prices for the equipment mentioned. Compared with other top quality machinery, Uni saves up to $8,000 on the deal. And the way everything else today is taking a bigger bite out of your net farm profit, one thing you don't need is to overpay for your equipment needs.

But, your real Uni bonus is high performance. Our Superchopper is America's Number 1 selling self-propelled forage harvester. And for a good reason. It's built all the way through to give you all the brawn and high-speed capacity you need to keep your wagons really rolling to the silo!

The big Uni-Combine is a larger, heavier, more rugged workhorse than ever. You handle as many as 4 wide or narrow corn rows—or a 15-foot grain platform.

The point of all this means you'll save money with Uni and get the job well done! We feel that you'll agree Uni is the right combination of performance, reliability, long life and a sensible price tag. Maybe you don't have a college-age son, but we have a hunch that you'll find someplace worthwhile to put your Uni savings. Right? Stop by and see!

Drop by your New Idea dealer and see the entire Uni-line—tool carrier, chopper, combine, sheller or picker.

Give your crops a head start in the yield race.

Applying some fertilizer near the seed at planting is a most efficient fertilizer practice It insures a ready supply of plant food, on hand from the day the seed germinates.

Then at the critical "weaning" period, when the seedlings need more nutrients than the seed can provide—it will be there to give them the kind of head start that produces optimum yields

Come in soon, or phone us right away We have starter formulations that are just right to get your crops off to a fast, healthy start in the yield race

We want to help.

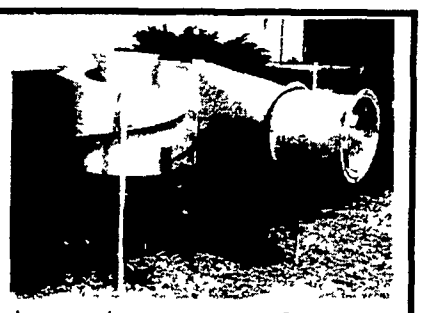
TERRE HILL SILO CO., INC.
Terre Hill, Pa. 17581 Phone 215-445-6736
Quality & Service Since 1927

Grain cleaner which handles dirt and fines from corn, soybeans, wheat, rye, oats and other crops cleans through a combined centrifugal force and air



suspension is simple to operate — one control adjusts for cleaning different grains. No screens to change.

. . . you are always first in line at your own mfs grain drying and storage system

MAKE MORE PROFIT IN 1976 AND AVOID WAITING IN ELEVATOR LINES

Complete line of Grain Augers, Galv. bucket elevators and bulk feed bins.

Early order discounts still in effect on some items.

CALKINS

SEED CLEANER — GRADER — TREATER

This piece of equipment was built for permanent service by a well-known manufacturer. It has a large fan with an adjustable wind board. The sieves have many adjustments and the suction fan is larger than many. The precision powder feed apparatus (for seed-treating power) has 60 different settings and actually measures the powder onto the grain.

The receiving hopper is fed by an elevator with a floor-level loading hopper thus eliminating lifting and emptying heavy bags. There is a 2-way bagging spout. Capacity varies upwards from 50 bushels-hour.

We used this machine until a few years ago and believe that, with minor repairs and cleanup, it can be put back in service. Comes complete with original operating instructions and spare parts listings.

We ask for your BEST OFFER on an "as is" basis. A matched 220 Volt motor with proper sheave and belt is also available separately.

PATZ

MODEL 101 FEEDER AND CONVEYOR

Here's why the 101 is becoming Patz most popular feeder
- Feed can be deposited anywhere along the feeder
- Feed is distributed along the bunk from above by a conveyor with a tapered bottom
- Can be used inside or outside
- Chain and flites move at 117 feet per minute delivering up to 56 bushels of feed to the bunk each minute
- Can elevate feed and convey with optionals
- To fit your requirements the 101 can feed in one or two directions convey and feed in one or two directions or just convey

Feature for feature that's why farmers are selecting the Patz model 101 feeder and conveyor

ELECTRONIC CROP STIMULATING SERVICE

Electrical storms improve crops. Seeds treated electronically quickens germination, great difference in cold weather. Improves stooling in alfalfa, small grains; grows much bigger roots, more good ears per stalk and up to 3 percent more protein; required less fertilizer, improves yields especially in adverse weather.

An Indianne treating machine will be at the Edgar M. Martin farm on April 6 and 7, maybe also longer, on Orlan Road, first farm direct west of Victor Weaver's Poultry Processing Plant which is just south of New Holland Sales Stables. You can bring seeds in ahead, pick up later. Make check to Dr. C. R. Corson when you bring seeds in. Distant customers who want to take seeds along home, get first privilege.

Rates are $10 per bu. corn, $15 for alfalfa, clover; $5 for oats, beans. We can mix in Agriserum, Lactobase and Basic H. at same time. Doc said it should be so much better.

Agriserum promotes bullions of fertilizer factories per acre - earthworms. They also make soil spongy for holding moisture. Lactobase helps you grow your own minerals cheaper, better, both soil minerals and feed minerals.

Basic H makes other liquids penetrate better like above products on seed. In sprays, it reduces need for chemical by 50 percent. Improves soil texture, makes nutrients available. All four for only about $5.00 an acre corn.

Literature available from Edgar M. Martin, R2 New Holland, Pa. 17557 PH: 717-354-5710 or Eli L. Stoltzfus, 69 Strasburg Pike, Lancaster, Pa. 17602 PH: 717-394-9917.

THREE NATURAL SOIL CONDITIONERS

All very economical because they aid nature to do her free part, to gain back the life of the soil which you lost by chemicals.

Excellent to ease prophecied drought and pestilences, because roots are much longer, and spongy soil holds moisture.

One product multiplies earthworms fast. One supplies missing trace elements. One is a nutrient release agent and wetting agent to make both natural foliage sprays and chemical sprays go further, very economical compared to competitive products. The latter has much use. Distributors wanted in other counties. Free literature.

35 PURINA DAIRY CENTER HEIFERS

AVERAGE 12,884 LB. MILK
428 LB. BUTTERFAT IN THEIR FIRST LACTATION

Thirty-five first-calf Holstein heifers at the Purina Dairy Research Center completed lactations averaging 12,884 pounds of milk and 428 pounds of butterfat. The heifers compiled this record even though they were on a variety of nutritional experiments throughout the year.

Mature equivalents show that these heifers will be producing an average of 17,025 pounds of milk and 566 pounds of butterfat when mature!

Mrs. Kent brought a wide array of visuals to demonstrate some of the techniques in making an authentic colonial dress.

Mrs. Lambertson shows the wateau back on her gown as Mrs. Kent discusses how to construct it.

Homestead Notes

York seamstress fashions authentic 18th century dresses

By Sally Bair
Feature Writer

Pannier, stomacher, and fichu are probably not words used in your everyday vocabulary even if you are a seamstress or a fashion expert. But they could become important words to you if you are planning to make a bicentennial dress and want it to be an authentic 18th century reproduction.

If you delve into the past and study the kinds of clothing our pioneer ancestors wore, you may find yourself becoming familiar with a wide range of words which have a very foreign sound.

In a two-part program conducted by the York County Extension Service, Mrs. Joan Lamberson, extension home economist, and Mrs. Virginia Kent taught homemakers some of the finer points of constructing authentic garments. Mrs. Kent is the former manager of the Gates House and Plough Tavern in York and has done extensive research into 18th century clothing, designing and sewing the costumes worn at the restored homes.

The first consideration in making your garment will probably be the fabric to be used. According to Mrs. Kent there was very little "middle class" in that period, so women were either "ladies of fashion" or pioneer women. Station in life, therefore, determined the type of garment one would wear and the fabric used.

Mrs. Lamberson said a lady of fashion would have worn floral prints or solids in imported fabrics of damask, taffeta, chintz, silk, woolen or fine muslin. She said, "The colors would have been delicate and lively, but not bright."

Rural, pioneer women would have had very functional clothing. The fabric might have been either handwoven by herself or by a weaver, and it would have been made from flax which she planted or from wool from the family sheep. So fabric would have been linen or wool, or homespun fabrics "such as hopsacking with nubs and slubs in the weave." The colors might have been yellows, greens, browns or blues, and Mrs. Lamberson said, "stripes or floral prints might have been used on special occasions."

But the question, of course, is what would one choose today? Chances are you'll be visiting the local fabric store instead of importing fine fabric or weaving your own. In any case, Mrs. Lambertson said acceptable fabrics would include your own. In any case, Mrs. Lamberson said acceptable fabrics would include kettlecloth, calico, lightweight linen, floral or striped chintz, polished cotton, combination stripes and floral motifs, broadcloth and others, especially those which might be 100 percent cotton. For a more elegant formal gown, brocade, taffeta, velvet, damask, or moire might be used.

Slightly dull colors are best, for most of the fabrics would have been dyed with vegetable dyes.

Aprons were often a part of the costume in those days, even dressy ones, but Mrs. Kent told the women never to use sharp whites, only off-white. She suggested that if you have white fabric you're considering using for an accessory of some sort, it should be tinted in tea or coffee. Unbleached muslin, which is readily available now, is very appropriate, especially for "pioneer" clothing. Homespun in natural colors is also very good, according to Mrs. Kent.

Naturally you won't get far in your planning without choosing a pattern. Commercial patterns are available in many colonial styles. Mrs. Kent, however, advises adapting these patterns to make them more authentic in detail. She said, "I used four or five patterns in making my dress."

She said zippers should be eliminated completely, and invisible closings should be substituted. She suggested using hooks and eyes or snaps, which were available then, but she also admitted to having used a Velcro closing on one bodice she sewed.

Button closings can be adapted for some patterns, but buttons were not common in those days. They may have been made of wood or bone, and for the very well off pewter buttons were available. There were also cloth covered buttons.

Mrs. Lamberson suggested that patterns could be cut down the center front and 2 inches of fabric added to be used as a facing. The facing can be folded back and buttons and button closings added in this way.

Mrs. Kent said that necklines in the 18th century were square in the back, and skirts were usually pleated, not gathered. Also, she said, elastic should not be used at neckline or elbow. Drawstrings were appropriate, and would have been woven tape or ribbon.

One detail which is omitted on most commercial patterns is extra seaming in the back bodice. There may have been as many as six seams, Mrs. Kent said, radiating from a point in the center of the bodice. Again, Mrs Lamberson said a pattern could be altered to include this seaming. Her only caution in doing this is to make sure that correct seam allowances are added.

Fashionable gowns were frequently of two pieces, or more. The bodice and skirt were separate and often an overskirt was worn over one or more petticoats. The front bodice was fashioned to come to a point somewhere just below the natural waistline, and the bodice was very flat. The center, triangular part of the bodice was referred to as the "stomacher" and Mrs. Kent said if was often stiffened with whalebone, flexible steel rods, boards (!) or willow rods. Today, Mrs. Kent said, stays may be added to achieve that effect, or the entire stomacher could be backed with a stiffening of some type.

The "layered look" is nothing new. The 18th century lady of fashion also had a layered look to some degree. Her undergarments were often a chemise and a corset. The overdress was referred to as a "robe" and, as mentioned before, often the overskirt revealed a petticoat.

Another interesting part of her costume was a "pannier" - this was a side hoop or rump bun which added fullness to the hips, giving a bell shape to the full skirts. This added fullness, according to Mrs. Kent, helped to make the waist appear tiny and slim.

Frequently, 18th century dresses showed a prodigious use of lace. Mrs. Kent advised real caution in choosing laces for your garment. She used old lace for her clothing and she said, "Never use white nylon lace - it looks awful and ruins your outfit." Also she said lace should be matched to the fabric type. "Don't use delicate lace with plain fabric." She recommended tinting lace with tea or coffee to achieve an older look.

The pioneer woman's dress was really much simpler. It was often a simple chemise, belted at the waist, or drawn in by the apron. A drawstring would have been used at the neckline and sleeves. Often a "mobcap" completed the simple dress.

If you want to make a really authentic costume, you could follow Mrs. Kent's lead and sew your entire costume by hand. Mrs. Kent said she cheated only with the long skirt seams, but sewed everything else by hand, including yards and yards of hand done ruching, an authentic 18th century trim. One of the two dresses she modeled ha

Country Corner

Two speckled pigs and many memories

By MELISSA PIPER

While growing up I saw many animals, especially pigs, come to and leave our farm. Interestingly enough each individual animal had its own disposition and personality which made it unique and easily remembered. There were two animals that I will always remember with clarity and a smile - Emily and Elmer the pigs.

Emily and Elmer were a pair of littermate crossbred pigs - their origin without pedigree - and their black speckled bodies and almost smiling grin set them apart from their colleagues on the farm.

The two pigs were quite different from many others that shared their pen, for they had a gentle nature and almost lazy indifference that made them easy to work with and very likeable. And in no time the two speckled pigs became family pets instead of strictly my 4-H project for the summer!

Elmer and Emily received a lot of attention from all the members of our family which included a friendly back-scratching, a basket of grass clipping for dessert and often an extra measure of corn at feeding time.

When the 4-H showtime rolled around I became a little less anxious to participate as I knew that each animal shown had to be sold later in the day. But encouragement from my family to experience the show atmosphere finally persuaded me to do so.

It was not an easy decision but Dad wanted to keep Emily for breeding purposes and so Elmer was selected to be primped for the 4-H show. I wonder if more attention was ever lavished on a pig - except Arnold of course - but Elmer got the full treatment of several baths, a tail clipping, ear clipping and even glossed feet!

Although it was my first year exhibiting in the show ring, Elmer captured first place in his crossbred class and was later named reserve champion of the breed. And while the medals and ribbons kept me glowing, parting with my animal didn't come easy.

Meanwhile back on the farm, Emily became even more popular as years went by as she was one of our most productive and gentle sows. And even when she became too old for breeding, we kept her as a favorite farm animal.

Although I recall with fond memories many of farm animals, Elmer and Emily will perhaps always be among my favorites. Their gentle nature and comical appearance won a place in our family's heart which will linger for many more years.

Home on the Range

Continuing with our bicentennial collection of recipes, Mrs. Harriet Greenawalt, Lancaster; sent in a recipe for Gingerbread Men which is dated 1910. About 76 years old, the recipe shows its age by asking the cook to resift her dry ingredients - not frequently done today with presifted flour!

Also we received a recipe for spiced cantaloupes which was requested by one of our readers.

Please be sending in your favorite Easter recipes for our April 10th edition. We've received numerous entries and are waiting for many more.

Recipes may be sent to: Recipe Exchange - Lancaster Farming, Box 266, Lititz, Pa. 17543

Story Book Gingerbread Men

½ cup shortening
½ cups brown sugar
3¼ cups sifted all purpose flour
1 teaspoon salt
1 teaspoon soda
½ teaspoon cinnamon
½ teaspoon ginger
⅛ teaspoon cloves
¾ cup molasses
¼ cup water

Cream shortening and sugar together. Resift flour with salt, soda and spices. Blend into creamed mixture alternately with molasses and water. Chill about one hour. Roll half the dough at a time ¼ inch thick. Cut with floured gingerbread men cutters. Place on lightly greased baking sheets. Bake at 350 degrees for 12 minutes. Cool one minute on baking sheet then remove to rack. When cool decorate with currants and a powdered sugar frosting. Makes 20 men 4 inches tall.

Mrs. Harriet Greenawalt
Lancaster, Pa.

xxx

Spiced Cantaloupes

2 gallons cantaloupes sliced, peeled and cut into blocks
1 gallon water
1 tablespoon alum

Bring alum and water to a boil and pour over cantaloupes. Let cool then drain. Make a syrup with 1½ tablespoon mixed pickle spice; ¾ quart of half vinegar and half water; 2 teaspoon salt and 3 cups sugar.

Bring syrup to a boil and put in cooled cantaloupes. Bring to a boil and cook till clear about 20 minutes. Pack in jars and seal.

Lucy Hoover
Denver, Pa.

xxx

Graham Pudding

1 egg
¾ cup dark molasses
1 cup raisins
pinch of salt
1¼ cup sweet milk
2¼ cup graham flour
1¼ cup soda

Mix and bake at 350 degrees until pudding is set.

Rebecca Fisher
Oxford, Pa.

xxx

Cheese Cake

Crust:
1 cup flour
½ teaspoon baking powder
¼ cup sugar
¼ teaspoon salt
1 egg
4 tablespoons butter melted

Mix together and pat into 10 inch pie plate.

Filling:
½ cup sugar
2 tablespoons flour
8 ounces cream chesse
2 cups milk
2 eggs
1 teaspoon vanilla
1 tablespoon lemon juice

Cream cheese, sugar, eggs and flour. Gradually add milk then vanilla and lemon juice. Pour into crust and bake at 350 degrees for about 1 hour or until set and light brown on top.

Mrs. Franklin Reichard
Lititz, Pa.

xxx

Swiss Quiche Pie

9 inch pie shell unbaked
2 cups cooked chicken
½ cup shredded Swiss cheese
4 eggs
1 cup cream or milk
½ cup chicken broth or water
1½ tablespoons instant minced onion
1½ tablespoon seasoned salt

Sprinkle meat and cheese in the bottom of the pie shell. Beat together remaining ingredients until combined and pour into shell. Bake in preheated oven at 375 degrees for 30-35 minutes. Let stand 6 minutes before serving. Serves six.

Karen Jennerts
Hampton, New York

xxx

Easy Doughnuts

Remove biscuits from canned refrigerator package. Flatten slightly and punch hole through center with finger. Fry in hot fat (360 degrees) until golden brown. Remove from fat and roll in mixture of cinnamon and sugar. Roll in muxtire again and allow to stand for 15 minutes.

Pewter interest renewed for '76 bicentennial

Pewter is a colonial material enjoying renewed interest for today's homemaker. Pewter is that lustrous metal which wears well, dosen't need polishing and is elegantly casual with any table setting.

Examples of authentic pewter are rare. The reason for the scarcity is that pewter was hand cast from tin - an ingredient subject to a high English tariff in colonial days. Old pieces were often traded for newly-cast pieces.

Today, pewter pieces are sometimes hand cast but are also created by spinning and stamping methods for greater versatility. With either method each piece may not be exactly uniform, giving a valued handcrafted look. Finishes include dark shadings of antique, soft sheen of satin or a bright gleam that resembles silver.

Pewter is not a precious metal, but lends itself to all the design and use possibilities of silver. It has its own special beauty and to many, part of that beauty is its tarnish resistance.

Today's pewter is an alloy of several metals consisting mainly of tin and smaller amounts of copper and antimony to add strength and brillance. Since it is a solid metal, pewter will not develop worn spots with prolonged use. As a soft metal, however, it does dent easily without proper care. It has a low melting point and should be kept away from extreme heat, flames, and heating elements.

After buying pewter pieces, carefully read and follow care instructions. Many types of pewter "flatware" available are actually dishwasher - safe. Other pewter pieces will require washing by hand. Rinsing in hot water and drying immeidately will prevent water spotting.

It's wise to wash food and beverage service pieces promptly after use. As with silver, certain chemicals and acids present in foods may cause stains and pitting if in long contact with pewter. Common culprits include party dips, eggs, salad dressings, oils, vinegar, salt and fruit juices. Acids such as those of a lactic variety found in cheese may also start corrosion.

York seamstress fashions

[Continued from Page 42]

A floor length wool cape completes Mrs. Kent's colonial costume.

hand embroidered "stomacher" which she had copied from an authentic 18th century costume in the Victorian Albert Museum in Europe.

Accessories can be very important in setting off a costume, and marking it as authentic. Petticoats were often part of the costume, not just an accessory, but they were sometimes a showpiece of embroidery and often were quilted for added warmth.

It was traditional to have a "pocket." A pocket was constructed of fabric and carried on a ribbon around the waist. The petticoat which was beneath the overskirt had a slit in the seam and it was through this opening that a lady could get necessities from her pocket.

The lady of the house was often the keeper of the keys which were also kept on a chain around the waist - "either because of a scarcity of supply or because of thieving servants," according to Mrs. Kent. In any event the waist could not have been too slim nor comfortable by our standards with a pocket, keys and a pannier all tied around it.

A "reticule" was also common. This was a small bag-like purse, usually of fine fabric and lace, which would contain a lady's necessities.

A "fichu" or shawl was a common part of 18th century attire, and was a triangular scarf, perhaps trimmed in lace or hand embroidered, which was tied around the neck or tucked into the neckline. This could have been chiffon, organza, lace or a fabric matching the dress.

Today's shoes can be adapted for your costume by adding a buckle. Either leather or cloth would have been the fashion, and the very pointy toe was popular. The "princess" heel of the late '50's is really the ideal heel with a height of about 1½ inches.

White stockings were frequently worn, Mrs. Kent said, but stockings of any color can be correct, including pink or green.

Mrs. Kent offered many tidbits of advice which serve to make an authentic costume. She said that if you choose to wear a simple pioneer's attire of skirt and blouse, the blouse should always be worn as an overblouse, not tucked in. She said such blouses were peasant style, with ribbons at the neckline and sleeves to gather in the fabric, rather than elastic.

The apron for a working woman was a half apron, one with a bib, but no strings to be tied around the neck. The bib was pinned to the bodice of the dress, and therefore began to be called a "pinafore."

Hem length is always a question in discussing fashion. In the 18th century, as today, the length varied somewhat. Mrs. Kent said that evening dresses were usually floor length, but the petticoat may have been shorter in the front dipping to a longer length in the back. For the servant or working woman, however, Mrs. Kent said it is permissible for some of the leg to show since a shorter hem made working a little easier.

While the "mobcap" was the most common head attire, smaller versions made of lace and gathered with a ribbon were often worn with evening dresses. The cap was actually quite functional, keeping the hair clean during the day, and the head warm at night.

Capes were the acceptable outer garment of the period. Mrs. Kent modeled a floor length, hooded cape made of wool, but said that capes were often waist length as well.

Mrs. Kent emphasized that the 18th century was a time when many immigrants came to this country, and it would have been common for them to continue wearing the styles of their homeland. Since this area was heavily settled by central European immigrants, often a dirndl vest, laced in front, an apron and skirt would have been worn by these women.

She also pointed out that "dolls and children were dressed like small adults."

For the 18th century male, knee breeches, vests, waistcoats, silk stockings and buckled shoes would have been the fashion of the day. For the men of high fashion, their costume would probably have included buckled shoes, walking canes, muffs, wigs and, probably in some cases, an earring.

Virginia Kent talks with members of the group about individual ideas they have for their gowns.

Throughout the program, Mrs. Kent and Mrs. Lamberson stressed that each individual must decide how important it is to make the costume authentic in every detail. Mrs. Lamberson said it will take some time and effort to alter patterns, but she encouraged the women to try some of the changes to create an authentic look.

Individual fashions varied in colonial days just as they do now. But perhaps you can find one or two details which will help make your dress a little more like the original.

With all the interest in sewing colonial costumes, it should be an interesting, colorful year ahead. Start now to select the style of the period you wish to create and bring the Bicentennial celebration into your life.

Egg promotion developed

At the March 12th Pennsylvania Egg Marketing Association Meeting, an advertising program that is particularly adaptable to egg marketers use was presented.

The program is designed to take advantage of public service advertising time by providing news releases for food editors, radio scripts, direct mailing to home economists, and it offers tie-in programs to retail stores.

Developed by Egg Central, the program is now coordinated through American Egg Board and in our case, John Hoffman and the Pennsylvania Poultry Federation staff will coordinate and administer this program.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

Freeze Now . . .
Enjoy Later

With beef prices at the lowest level in nearly a year, this is a good time to beef up your own freezer supplies. According to the U.S. Department of Agriculture, the supply of beef marketed in March is expected to be about 10 percent higher than a year ago. Grain-fed beef will account for the bulk of the increased supply.

A dramatic shift in the makeup of beef supplies is underway. During late 1975, less than 50 percent of beef output was grain-fed beef-as cow beef and grass-fed or forage-fed beef accounted for an unusally large share of the total supply. Now more than 60 percent of the supply is grain-fed beef.

Average prices for Choice beef at retail trended downward during the last half of 1975 and current retail prices are sharply below late 1975 levels, reflecting a sharp drop in grain-fed cattle prices.

Since supply is high, prices lower than usual, you may want to stock your freezer. May I suggest you follow the following tips for successful freezing.

Beef will maintain its quality for about 8-12 months if properly wrapped and stored at 0 degrees F.

For the best protection, the meat should be wrapped in a moisture and vapor-proof wrap - heavy duty aluminum foil, heavily waxed freezer paper, or specially laminated paper. Double wrap cuts you plan to store for long periods to insure against any freezer burn.

When wrapping steaks or patties, a double thickness of heavily waxed paper should be placed between each steak or patty. It will enable you to open the package and remove as many as you wish.

When wrapping the entire package - whether of several steaks, patties or individual roasts - try to wrap the meat as closely as possible to eliminate all air and thus avoid freezer burn.

Meat that has been defrosted, but refrigerated after thawing, can be refrozen safely only if it is cooked and then refrozen.

Looking for a different recipe for preparing pot-roast? If so, try the following recipe for Spiced Pot Roast!

Spiced Pot-Roast

4 or 5 pound boneless beef rump roast
2 cups sweet cider
1 tablespoon brown sugar
2 or 3 whole cloves
¼ teaspoon ginger
¼ teaspoon cinnamon
2 tablespoons flour
2 teaspoons salt
¼ teaspoon pepper
2 tablespoons cooking fat
1 onion, sliced

Place meat in large bowl. Mix cider, brown sugar, ginger, cinnamon and cloves; pour over meat. Cover and refrigerate 24 hours. Remove meat from marinade and pat dry with paper towel. Combine flour, salt and pepper; dredge meat. Brown meat in hot fat on all sides in Dutch oven. Add 1 cup marinade and the onion; cover tightly and cook in slow oven 2-½ to 3-½ hours, or until tender. Add water to cooking liquid to make 2 cups. Thicken cooking liquid with flour for gravy, if desired.

Shower a Prospective Bride with Beauty Aids

If you are planning a bridal shower, why not create a different theme by giving personal care items? Since the bride-to-be inevitably receives the conventional type gifts - linens, tableware, housewares, - supply her with grooming aids she may elect to defer purchasing herself.

Accessoreis for the bath provide a variety of gift ideas. Attractive bath mitts and sponges are ideal for lathering up; pumice stone and long-handled bath brushes are excellent for stimulating the skin and removing dry, flaky tissues.

Bathtub trays, which fit across the rim of the tub, have compartments that hold beauty aids, even a book or magazine, to let the bather soak in suds while performing other grooming tasks or just relaxing. There are soft, pliable bath pillows, for added comfort that can be attached to the tub by means of suction cups.

Fancy shower caps, a spray hose attachment for shampooing hair, rollers, clips are shower considerations along with a set of brushes, for hands, complexion and hair.

Then there are the grooming necessities - razor, a manicure set, tweezers. Or, a supply of face cloths, towels, favorite soaps or shampoo, cologne, dusting powder and nail polish may be other suggestions.

A more novel gift could be a now popular shower attachment with spray force that ranges from gentle to vigorous. The variety of electrics also offers many gift giving possibilities - a hair dryer or blower, rollers, curling iron, facial sauna, water pik, complexion care units and a whirpool bath. Check to be sure that the bride doesn't have any of these items and what her preferences might be.

Ground pork recipes offered by PIG

CHICAGO - "Great Ideas For Ground Pork," a new pamphlet featuring 10 ground pork meal suggestions, is now available from the Pork Industry Group of the National Live Stock and Meat Board.

"Ground pork, when properly prepared and mildly seasoned, has a distinctive flavor, markedly different from beef," said Verlo Butz, Vice President of the Meat Board pork program.

"Few people," he said, "have actually eaten fresh ground pork because it is generally mixed with other meats or is highly seasoned and converted to sausage."

Basic procedures for grinding and seasoning pork are given in the folder.

In addition to the basic recipe, the pamphlet features meal suggestions such as "Tasty Pork Turnovers," "Pork Stuffed Cabbage Rolls" and "Roly Poly Pork Loaves."

"Great Ideas For Ground Pork" is printed in the popular 4 x 6 inch "recipe box" size with a self indexing tab. Full color photographs illustrate each meal suggestion.

A free copy of "Great Ideas For Ground Pork" can be obtained by sending a self-addressed, stamped envelope to: P.I.G., Dept. GGP, National Live Stock and Meat Board, 36 South Wabash Avenue, Chicago, Illinois, 60603.

Quantity order prices for the pamphlet are: 10 cents each for up to 100 copies, $4.50 per 100 copies and $30.00 per 1,000 copies.

Farm Women Societies

Society 3

Society of Farm Women 3 met March 20, at the Salem Lutheran Church in Ephrata. Mrs. Lloyd Martin was the hostess.

Mrs. John Edwards, conducted the business meeting and announced that contributions would be made to the Cerebral Palsey Fund and to the Easter Seal Fund.

Also under new business it was announced that members would be sewing at the Ephrata Community Hospital on April 13.

Mrs. Earl Miller, Mrs. Clarence Stauffer, Mrs. Harry Usner, Mrs. Ivan Eberly and Mrs. Marlin Dankers, recently visited the Society's adopted daughter Miss Doris Hash at the Hamburg State Hospital and took Easter gifts.

It was also announced that the date for members to serve at the snack bar of the Ephrata Hospital has been changed from the fourth Friday to the third Wednesday of each month from 9 a.m. - 1 p.m.

A trip to New York City is planned for April 3. Members will tour the United Nations and see the Easter Pageant at the Radio City Music Hall. Reservations can be made by calling Mrs. Harold Stuber at 215-267-2692.

The program for the day was a slide presentation on the Central American County of Guatemala presented by Mrs. Harold Stuber and Mrs. Jamie Toledo.

The next meeting will be held at the home of Mrs. Walter Shaub on April 17. Fay Stoner will be the speaker.

Society 8

Farm Women's Society 8 met at the home of Mary Sarver and Arline Witman, Mount Joy R2, Saturday March 20th at 2 p.m. Mrs. Grace Bixler, Pres. presided over the meeting and led two songs. Mrs. Pauline Miller accompanied on the organ. The minutes were read by Mary Grace Martin. The twenty-nine members present answered the roll call by completing the phrase,"Now is the time to" which revealed the uppermost duty of each lady as spring begins.

Mrs. Phyllis Endslow had devotional time and gave timely thoughts of admonition concluding by reading scripture from the Chronicles.

Miss Debbie Heistand, a Junior at Elizabethtown High School told of her desire to join other teens to work in Brazil.

The main feature of the afternoon was given by Mrs. Bruce Greiner 251 Park Ave. Mount Joy. The ancient art of quilling was demonstrated and she taught each lady to make small designs to learn a bit of the art. Many creations of her own design were shown.

Those members who desire to go to Shady Maple on April 8. to arrive at 7:30 p.m., will leave the Mount Joy Mennonite Church at 6:30 p.m. They will be entertained by Society No. 21.

All enjoyed the social period as refreshments were served by hostesses Mary Sarver, Arline Witman, Evelyn Russell and Belle Garber. The next meeting will be held at the home of Mrs. Eloise Rentzell, Bainbriade R1, on April 17 when slides will be shown by Kathryn Erb and Arline Witman of their trip to Alaska.

Society 12

Farm Women Society 12 met at the home of Mrs. Florence Elsen last Saturday. Mrs. Grace Fautz had the devotions.

Seventeen members answered the roll call by telling a county they would like to visit. The program for the day was a spelling bee. First prize in the event went to Donna Henry with second prize going to Mildred Kindig. The next meeting will be held at the home of Stella Mower in Lancaster.

Berks Co. Society 6

The Society of Farm Women of Berks Co., 6, met at the home of Mrs. Daniel Hauseman, Boyertown R4, with fifteen members attending.

The County Agent, Herbert Wetzel, presented a film to the group entitled, "Insects in Your Garden." He also had pamphlets which could be bought for a nominal fee, pertaining to insects in the garden.

The next meeting will be at the home of Mrs. Mary Youse, Oley R2, at 8 p.m., April 20. A smorgasbord of foreign dishes, brought by all the members, will be featured.

Members were reminded of these events: bingo party, April 8; tea, May 12; and open house, June 13 - all to be held at Berks Heim.

The group also purchased subventions for the Medical Center which is going to be built in Oley.

They received an invitation to a night of entertainment from Group No. 8 to be held at the Shartlesville Grange Hall, May 7, at 7:30.

The ladies that are going to the Spring Rally in Gettysburg, May 12, will leave by bus from the Oley Legion Hall at 8:30 a.m.

The group will serve refreshments at the following sales held at the Oley Fair Grounds: March 27, April 10 and April 17, all at 9:00 a.m.

Berks Co. Society 9

Farm Women Society 9 of Berks County met recently at Rummy's Polynesian Restaurant. During the meeting, members decided to make a quilt to be chanced off and will begin next month. Two members Joan Hafer and Grace Spohn will represent the Society at the Hoe-Down.

An "every-member" birthday party was the program for the evening and gifts were exchanged.

Dauphin Co. Society 1

The Dauphin County Society of Farm Women, Group 1 held their monthly meeting on March 16, at 7:30 p.m. at the home of Ruby Kingsboro. The co-hostesses for the evening were Sarah Long and Velda Zerphey. Devotions were led by Velda Zerphey. Roll call was taken with ten members answering.

After a short business meeting, Ruby Kingsboro took over with a home products demonstration complete with games.

The meeting ended up with delicious refreshments being served with a St. Patrick's Day theme.

The next meeting of the Dauphin County Society of Farm Women, Group 1 will be held at the home of Jean Janssen on April 13, at 7:30 p.m.

Society 18

Farm Women Society 18 met at the home of Mrs. Harry Shepardson, Landisville, on March 20.

Mr. Guy Raymond, clinical psychologist for the Lancaster and Lebanon County Prisons was the speaker for the evening. Raymond explained the project HOPE as a means of encouragement in helping prisoners to find self-esteem and giving guidance in finding a better way of life.

The next meeting will be held at the home of Mrs. Warren Weaver on April 24. A bake sale is scheduled.

Broken Bit 4-H meets

This months meeting was held at the township building in Bareville. This years County Roundup will be held on July 17, with Districts following on September 11.

The club trial ride will also be held later on in the year as well as our gymkhana. The dates for both are indefinite.

Our clubs Expo '76 project, a life size horse showing the location of the horses bones as well as its internal organs, placed first in the judging at Park City this past week. We would like to thank all who helped to make this project a success.

Ida's Notebook

Ida Risser

Oh, the exuberance of youth! My daughter Cindy convinced me that I should come to the special program which her Middle School had to celebrate the Bicentennial. And I in turn had to persuade my mother to go along.

Cindy was in the choir and also plays the flute in the band. Several children read essays on the Bicentennial theme and a teacher showed beautiful slides of historic places and also some of America's outstanding scenery. It was an inspiring program and I thoroughly enjoyed it.

What really bothered me though was the fact that the teachers had to police the children so closely. Every few rows a teacher stood in the aisle to be sure there was no loud talking, feet on the seat in front of them or general disturbance. Maybe, I tend to judge other folk's children by mine and feel that they should need no watching. I trust them to behave in any given situation.

The March winds do blow and whistle around the house as I write this article. They even brought snow last week and an opportunity for the children to bring the toboggan from the attic and use it on the big hill in our upper meadow.

Another thing the wind has been doing is blowing in the attic windows as the sash in our old house are deteriorating. Now putty would help keep them in place but I'm not about to climb a ladder to the third floor.

I'll tell you what I did do though. This fall I decided to putty the windows on the north and west sides of the house. I found an unlabeled tube of what I thought was putty and worked all afternoon, only to discover that the reason I was making such slow progress was because the substance in the half-torn tube was a caulking compound. My family laughed at me but I still say, it was better than nothing.

Miscellaneous

The temperature at polar caps on the sun soars to about 1 8 million degrees F Growing children require 2½ times more protein in their diets than adults Nowhere on Cape Cod is the sea more than six miles away A light colored, smooth textured roof absorbs less solar energy and keeps a house cooler than a dark colored roof A large brown bat can eat as many as a thousand mosquitoes an hour The Milky Way has about a hundred thousand million stars—one of them being our solar system's sun

Vitamins and Common Sense

Our need for vitamins is unquestionable. But common sense - and science - tell us that the need is limited and specific. And the need is different for each vitamin.

So don't be sold on the idea that if a little of something is good, more of it is better. What I'm driving at is - please don't believe that you need a daily vitamin supplement to be healthy.

It's True that deficiencies in certain vitamins have been produced in laboratories in experimental animals, and when the needed vitamin is administered the change can be almost miraculous in the animal's health.

Similarly, many of our discoveries of the need for certain vitamins have come about through research into why some human beings have been sick. Through such research some dread diseases are a thing of the past.

But nowadays, a pretty good diet is available to most persons and unless you are eating very poorly indeed, your chance of a deficiency is rare.

Thus, each of us does have a responsibility to know enough about how to feed ourselves to stay healthy without pills.

Your main concern should be to choose a wide variety of foods so that you'll get all the vitamins, minerals, protein, carbohydrate and fat that you need. But no more than that or you'll be overweight.

A wonderful thing you can pretty well count on is, by getting your vitamins through an adequate diet, you'll get enough, and not too much, of any one vitamin. This is important because you can if you take pills, get too much of a vitamin, especially fat-soluble vitamins such as vitamins A and D.

Meantime, the more we study nutrition, the more we find that nature is wise in the way she forms our foods. Generally speaking, vitamins usually are present where they are needed, and in safe amounts.

Toxic amounts of one or more vitamins are almost never obtained from food alone.

Only food faddists and people who treat themselves with highpotency vitamin preparations or tablets run the risk of vitamin toxicity. More on vitamins next week.

THE GOOD WORD from the Bible

Thou shalt not see thy brother's ox or his sheep go astray, and hide thyself from them; thou shalt in any case bring them again unto thy brother.

And if thy brother be not nigh unto thee, or thou know him not, then thou shalt bring it unto thine own house, and it shall be with thee until thy brother seek after it, and thou shalt restore it to him again.

Deuteronomy 22: 1, 2

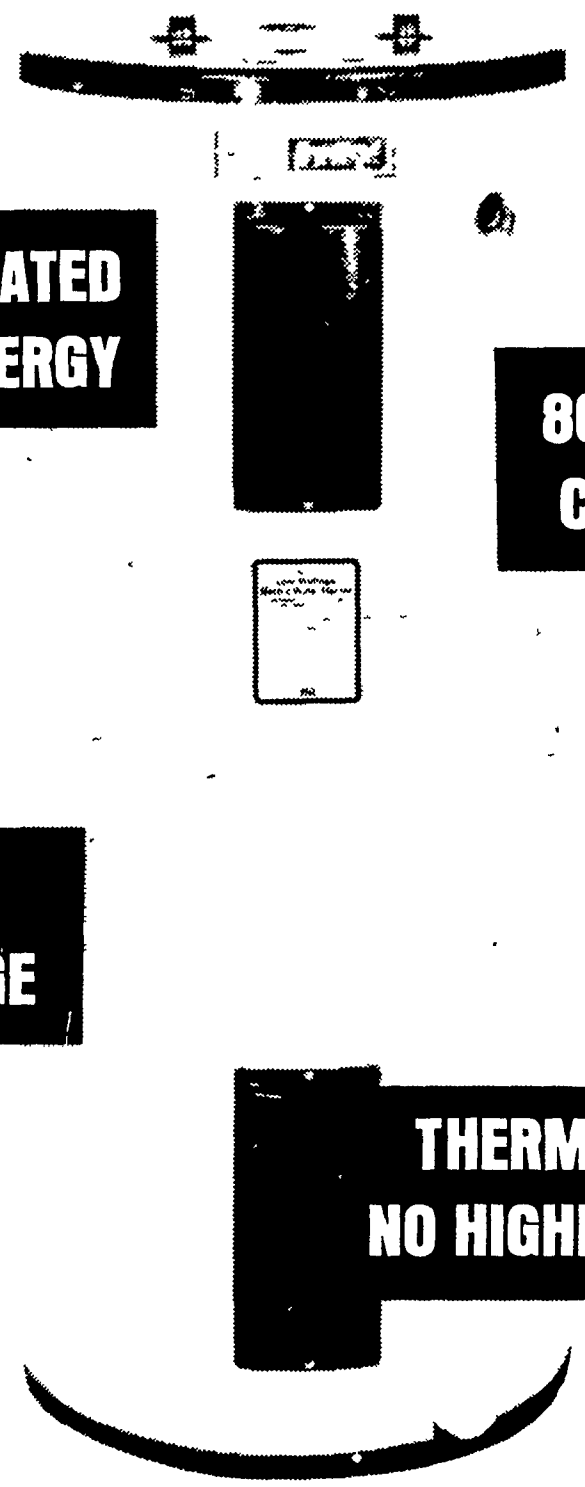
Need an Electric Water Heater Replacement?

HERE'S A CHANGE THAT MAKES SENSE



WELL INSULATED TO SAVE ENERGY

80-GALLON CAPACITY

LOW WATTAGE

THERMOSTAT SET NO HIGHER THAN 140°

Not all electric water heaters are the same Some use more electricity than others Why? Mainly because they come in different types and sizes

Take an 80-gallon low-wattage tank for example Who would ever believe that each year it can operate on less electricity than the smaller quick recovery type most commonly used It s true! And the better the tank is insulated and the lower the temperature setting, the more economical it will be What s more, while it reheats water at a slower rate, its larger size can deliver all the hot water your family will normally need

It's something to think about at replacement time After all, because water heaters serve the whole family, 24 hours a day all year round, they are big energy users

Why are we telling you all this? To help hold electricity use down We don t sell electric water heaters it's just that if you have one that needs replacement, an 80-gallon, low-wattage tank would be a good choice for you!

An Energy Saving Message From PP&L

Tips on lawn care given

With the snow gone and the forsythias in full bloom, it's high time to get busy on your lawn if you want to help keep it looking green and healthy through next summer's hot weather.

So says Dr. John R. Hall, Extension turfgrass specialist at the University of Maryland in College Park. His advice is intended principally for those who didn't get their late-fall fertilizer applications made last November or December.

Dr. Hall admonishes homeowners in this category with cool-season grasses, such as fescue and Kentucky bluegrass, to have their lawns fertilized by the end of March throughout most of the state.

Fertilizer should be broadcast at the rate of one to 1½ pounds of actual nitrogen per 1,000 square feet of lawn, the Maryland Extension specialist recommended. This means about 10 to 15 pounds of fertilizer per 1,000 square feet if applying a complete fertilizer with a nitrogen - phosphorus - potassium (N-P-K) ratio in the vicinity of 10-10-10.

No further fertilization should be made on cool-season grasses until September, he cautions, unless yellowing of the grass is noted in late May due to the possibility of heavy rains causing leaching of nutrients. In that case, it may be necessary to apply fertilizer at about one-half the rate of early spring application.

Pre-emergence herbicides for crabgrass control should not be applied before one-third to one-half of the forsythia blossoms have fallen — probably late this month — Dr. Hall says.

And chemicals for control of broad-leaved weeds should not be applied until late April or early May, when lilacs and azaleas are in bloom and all of the broadleaved weeds have sprouted.

Further details on keeping your grass green and weed-free are contained in a free booklet, **Lawn Care in Maryland** (Bulletin 171), published by the Cooperative Extension Service at the University of Maryland. Copies are available at county Extension Service offices throughout the state.

New Jersey 4-H youths hold promotion contest

The New Jersey State 4-H Youth Council is sponsoring a 4-H Promotion Contest for which all entries should be turned in to the appropriate chairmen by Aug. 1.

The promotion contest is a great opportunity to show and tell friends and others that 4-H isn't just for farmers, but for all people who want to have a good time while meeting and helping others.

The promotion contest is set up to let all 4-H'ers in the state show their efforts done in bridging the gap between 4-H members and the general public. This is a very important contest. The public should be informed what 4-H is and what kinds of things 4-H'ers do.

Specific construction of reports is left up to the individual but do try to include the following:

1. A written introduction - very short - state your goals for promotion.

2. A list, in order, of all promotion activities that you have attempted.

3. Correspondence - to agents, friends of 4-H, newspapers, etc., including any news releases that were not publicized.

4. Photographs - of members in action, promoting 4-H. (especially good for a scrapbook)

5. Newspaper clippings - related to your efforts.

6. Sound recordings of any radio spots that you have helped to plan. Cassettes would be perferred.

7. A story of your promotion activities this year telling what you did, what you accomplished and what you learned.

For further details, please contact either of the following: Sue Creehan, 1541 N. Bowling Green Drive, Cherry Hill, N.J. 08003 (609) 428-2796, or Keith Diem 5 Hillside Road, Stratford, N.J. 08084 (609) 783-3701.

WHO'LL PAY THE MORTGAGE IF YOU'RE NOT HERE . . .

Will your family lose your home if you're not here to pay the mortgage?

Why take chances? Low-cost mortgage term insurance can provide the cash your family will need to live where they want to.

Example: Male, Age - 44 $100,000.
Annual Premium - $394.50

For more details on my competitive life insurance rates,

Call:
CHRIS W. LANDIS,
805 Waterfront Dr., Lancaster, PA
Telephone: 393-9659

Congressional candidates present views

Following are the general questions which each candidate was asked:

1. Explain your practical experiences in farming.

2. What is your feeling on atomic energy?

3. Where would you seek advice for a farm bill?

4. Does organized labor have an unfair advantage in elections due to their monetary power?

5. How can government spending be cut?

6. Where do you stand with regards to the Capper Volstead Act?

7. How much money have you spent for your campaign and what's the source of your funds?

NORMAN AAMODT

"I don't think we have a whole lot of time left . . . we need to recognize some truths . . . who is the congressman . . . who is government? If I go to Washington I won't be weak, I promise. We can reap a crop in Washington, just as we farmers reap a crop from our fields. We the people . . . we can. I'm in favor of limiting the length of service of a congressman to eight years to eliminate seniority and bureaucracy."

Q1 — I'm actively engaged in farming now.

Q2 — They are not safe, they create a waste problem as well, and there is one report which says that by the year 2000 these plants could blow up at the rate of one every 30 years.

Q3 — Farmers. I'd meet with constituents regularly and provide them with progress reports.

Q4 — Yes, organized labor definitely has an unfair advantage in politics.

Q5 — Cut welfare rolls . . . "If a man won't work, let him not eat." There's a lot of room to cut fat, I'm concerned about the nation's productivity.

Q6 — Don't know enough about it to answer.

Q7 — Not accepting contributions greater than $50, I expect the cost of my campaign to run between $2000 to $3000.

Specific question: What do you propose for young people wanting to go into farming? I'm in favor of federal money at low or no interest rates to be available interest-free for eight years.

Closing Remark: I'm concerned with productivity and the free enterprise system. And in spite of what this guy (Martin Ross, the communist) says, this planet does not belong to the people, it belongs to your God and mine.

DARVIN BOYD

I understand agriculture . . . I was raised on a farm, worked my way into college with money earned through 4-H programs, and have been involved with foreign agriculture, particularly Korea. The five most important points I see in the elections are: 1. preserve the free enterprise system, reward productivity and maintain the work incentive; 2. cut down on bureaucracy, we have too much of it now and don't need more big government; 3. regain the confidence of our youth — and being a comparatively young man myself, I believe I can do it; 4. We must understand that there is someone greater than ourselves and reverse the trend to further spiritual and moral decay; and 5. our next congressman should be a leader . . . my only promises are those which I can deliver. I am sincere, dedicated, and accessible. My moral conduct is good in words and deeds.

Q1 — I spent 21 years on the farm, and have a knowledge of foreign agriculture as well due to my travel abroad. I understand agriculture.

Q2 — We must rely on nuclear energy and believe in progress. A balance is needed — but Lancaster County is very progressive.

Q3 — I would consult local, state and national farm organizations, depending on how they apply. But this district would always come first.

Q4 — Unions definitely have a big advantage over others. Corporate contributions are disallowed, but union contributions can be limitless.

Q5 — Put ceilings on programs to have a viable free enterprise system.

Q6 — No stand on the issue due to my limited knowledge of the act . . . but I have no reason to believe the Capper-Volstead Act should be weakened.

Q7 — A maximum contribution of $1,000 per person is allowed. I require each contributor of $100 or more to sign a receipt which clearly states that I have no obligation to him nor anyone else. I honestly don't know what has been spent so far but we will follow the law.

Specific question: None asked.

Closing remark: I believe in the American system and I am glad to have had the chance to share the questions here.

WILLIAM DRURY

You may wonder why I'd want to go into politics after having been in the ministry for 20 years. I'll tell you . . . because the system is lacking in faith and we need to renew our beliefs in our country. This is a time to restore moral leadership and to cut back on welfare - socialistic programs. I'm no farmer but I have done some farm work. I don't think we'd have any significant problems facing the farmer if we didn't have the government we have now.

Q1 — I'm in touch with farmers through my church.

Q2 — They should be out of

Berks Co. farm ladies hold special day-out program

By JUDY MITCHELL
Berks Co. Reporter

WYOMISSING — It was Ladies' Day Out and a colorful scene it was as nearly 150 Berks County farm women and friends, many in colonial dress in keeping with the Bicentennial season, gathered at the Sheraton - Berkshire Inn on March 17 for the Berks County PFA Women's Committee's annual luncheon. Mrs. Robert Kopfer, county secretary and hostess for the event, Fleetwood R2, introduced the county chairlady, Mrs. Ray Burgert, also of Fleetwood, and committee members responsible for this year's luncheon. Mrs. Nathan King of Chester County greeted the group on behalf of the State Women's Committee and reminded members of the Rally at Lamar coming up on March 30. Mrs. Ralph Sanner, vice chairlady, Kutztown R3, spoke briefly on the importance of the Advisory Councils in forming a link between the local people and the State Office and urged more women to take an active part in Council activities. William Myer, County PFA President, Myerstown R1, fondly introduced as the "one weed among the roses" gracing the head table, brought news from the County, mentioning the success of the recent drive which brought the County membership total to 924 and expressing satisfaction with association representatives' meeting with State Congressmen in Washington the week before. He reminded members of the upcoming Spring banquet meeting which will be held at the Bethel VFW on March 23rd, and Meet the Candidate Night on April 2nd at the Agricultural Center in Leesport. Twenty-six candidates for public office are expected to be at the Center to give a short talk and answer questions, giving the public in attendance a chance to size up the candidates before the November elections.

Few people can resist an opportunity to take a peek at what the future holds in store, and that is just what the ladies got a chance to do on Wednesday. Mrs. Helen Moyer's light and lively treatment of the stars was designed to entertain even the firmest non-believer. Before giving a general description of persons born under the 12 zodiac signs and predicting what each might expect her fortune, or misfortune, to be in the coming years, she explained that although she feels a lot of truth can be discovered by studying the stars, they cannot tell all. She further stated that she personally believes in a Supreme Authority who has the final say. Mrs. Moyer, a noted astrologist who predicted President Nixon's resignation a year before the fact, lives in West Reading and teaches astrology at Boscov's College of Knowledge.

For those more interested in studying the past than the future, Richard Laudenslager of Colony Park, Reading, was on hand after lunch to give the ladies a look at Reading in the days when it was the center of County railroad and trolley transportation. A member of both the Historical Society and the Berks County Bicentennial Committee, Laudenslager described the old Gravity Railroad which used to run from Mt. Penn to the Pagoda, Cresona and Pendora Parks, and the many hotels and resort areas where countians gathered for recreation. His slide presentation contrasted the beauty of some of the old landmarks with the ruin many of them have fallen to today.

A lamp lighting ceremony was included in the program of the Berks Co. PFA Ladies' Day Out. Shown from left are Mrs. Lloyd Masemore, Barto R1; William Myer, Myerstown R1 - president of the Berks Co. Farmer's Assoc.; Mrs. Stanley Fox, Palm; and Mrs. Daniel Harnish, Richland R1.

On the program for the ladies' program were (from left) Mrs. Robert Kopher, Fleetwood R2, secretary of the women's committee; Mrs. Ralph Sanner, Kutztown R3, vice-chairman; Mrs. Helen Moyer, West Reading - speaker and Mrs. Ray Burgert, Fleetwood R2 - chairman of the program committee.

Congressional candidates

[Continued from Page 50]

areas where populations of people and-or livestock are concentrated.

Q3 — I'd go to farmers and let them sound off.

Q4 — Absolutely, positively, undeniably ... yes. It's time we speak up to bring about a change.

Q5 — The budget can definitely be cut ... get rid of non-productive individuals.

Q6 — I don't know enough about it; would have to check with farmers.

Q7 — I don't think anybody is going to buy anybody. It costs money to run a campaign and I will accept any legal contributions.

Specific Question: Would you give up the ministry if you get elected? The candidate responded with a highly emphatic and emotional "no."

Closing Remark: Problems need to be solved — youths, drugs — if you want someone who's outspoken, vote for me.

DONALD KRANK

I'm not accepting funds for my campaign because I believe too much of our government is purchased. The producers in this country are being squeezed from both top and bottom. Special interest groups have been able to buy the law. There are now more people taking handouts than there are people producing. We must change that.

Q1 — I was raised on a California farm and I used to milk 45 Jerseys.

Q2 — We must explore the use of nuclear energy and choose their locations with prudence.

Q3 — I'd contact the farmers.

Q4 — Definitely yes. Union leaders have control.

Q5 — We must cut spending and cut waste.

Q6 — The Capper-Volstead Act should not be weakened.

Q7 — As of Wednesday, March 17, I had spent $212, all of my own money. I accept no contributions.

Specific question: None asked.

Closing Remark: My concern is for productivity. Labor is going up and production down. It can't be allowed to continue.

ALVIN LEWIS

I was District Attorney for eight years and served in civic affairs for all of my adult life. I'm running for Congress because: 1. Citizens have lost control of government - government is not listening to us, they're speaking to us. 2. We've lost control of ourselves in crime and must get a handle on this. 3. I have three teenaged children who don't believe in government, we must restore their confidence in our government. I don't pretend to be a farmer, but some other members of my immediate family have farms, so I'm familiar with farming in that respect. I believe government bureaucracy has gone too far. The only thing I can promise you is that I will not accept the status quo just because it's there. I will attempt to change Congress for the better.

Q1 — I cite my family ties with the farm.

Q2 — We must explore all energy sources.

Q3 — I'd contact the voters.

Q4 — Yes, unions have an advantage.

Q5 — We can cut government spending and had better do so! There is too much waste.

Q6 — I don't know enough about it, but farmer cooperatives are important.

Q7 — My campaign is a "total energy" commitment. We will abide by campaign laws; most funds come from friends and members of my family.

Specific Question: How long have you resided here? My family has been in this area for nearly 250 years.

Closing Remark: I thought some questions asked here

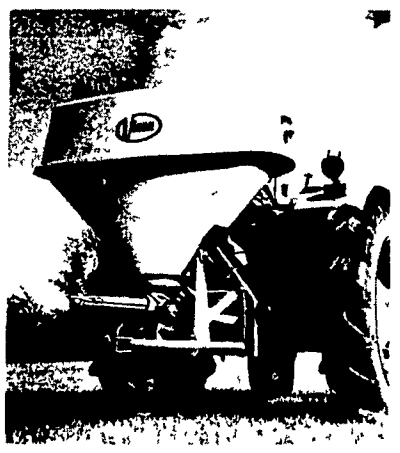
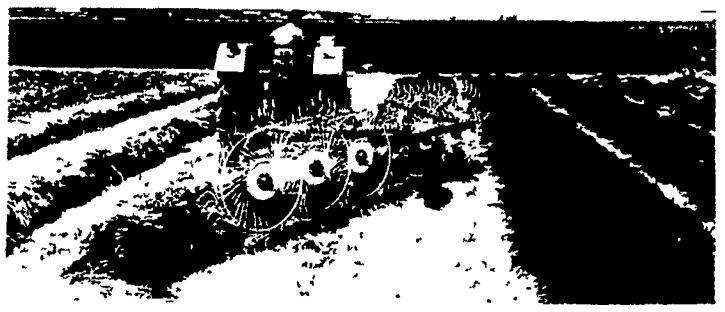
Vicon fertilizer spreader
The most accurate fertilizer spreader you can buy



The Vicon Spreader uses an exclusive fast-action spout moving back and forth at 540 times per minute to give even, rectangular coverage instead of the usual circular pattern.
That means increased profit because you get uniform fertilizer coverage, resulting in better stands and higher yields.

Give the Vicon fertilizer spreader a try. It costs no more than others. But it's better.

Vicon new sprintmaster



Increase your hay raking capacity with faster, more complete raking plus gentler hay handling.

The new Vicon Sprintmaster finger-wheel rake, in addition to superior hay handling capabilities, is exceptionally adaptable to rough terrain And, the New Sprintmaster is more useful in short crops and rakes wider swaths at higher speeds

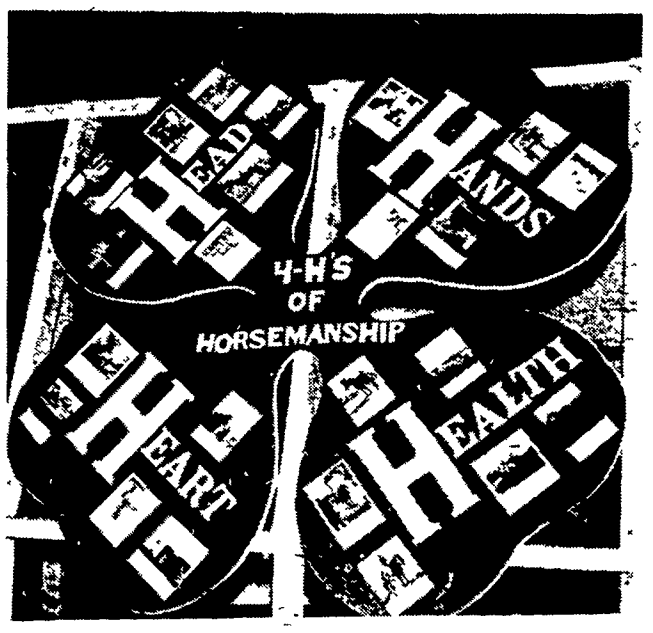
While not an excellent example of show ring confirmation, this equine specimen was a favorite "attention getter" at the Lancaster County 4-H Expo held recently at the Park City Mall. Two members of the Boots and Saddles 4-H made up the animal's body.



A giant clover depicting the 4-H's sparked interest in the county 4-H program during its stay in the Park City Mall during the 4-H Expo.

4-H Expo gives rural setting to mall

Four-H is no longer just "cookin' and livestock projects!" An inner city 4-H program geared for teaching leadership and cooperative work to non-rural children has become a popular program.

Jesus withdraws from the Pharisees

Then the Pharisees went out, and held a council against Him, how they might destroy Him

But when Jesus knew it, He withdrew Himself from thence: and great multitudes followed Him, and He healed them all

And charged them that they should not make Him known,

That it might be fulfilled which was spoken by Esaias the prophet, saying,

"Behold my servant, whom I have chosen, My beloved in whom my soul is well pleased, I will put my spirit upon him, and he shall shew judgement to the Gentiles

St. Matthew 12: 14-18

LOW INITIAL COST. FAST EASY ERECTION. ALL STEEL. LONG LIFE.

CUSTOM FERTILIZER BLENDING

A Southern States Service

Our new bulk blending plant makes it possible for you to get any approved plant food ratio quickly and economically. Fertilizer can be custom blended and spread on your land, usually for less than you'd pay for standard mixed fertilizer. That's because carload lots of the basic fertilizer materials by-pass regular plants. You save on freight and handling costs. And you save even more if you spread it yourself.

Bulk blending is the best deal yet on fertilizer. It will help you hold the line on crop costs while supplying you with fertilizer that's accurately blended. A phone call is all it takes to get top quality plant food for your land. Call us today!

Keystone Farmers honored at Solanco's recent FFA banquet were (front row from left) Marshall Trimble and Jeff Rutt. (Second row) Randy Ranck, Peggy Stottlemeyer and Mike Milburn. (Back row) Glenn Reinhart, James Bucher and Mark Howenwarter.

Star Farmers who were recipients of special awards at Solanco were (clockwise) Jeff Rutt, Tim Hanks, Dan Herschberger, and Vicki Warfel.

FFA members honored at Solanco banquet

By SUSAN KAUFFMAN
Feature Writer

QUARRYVILLE — Star Award Winners at the Solanco FFA banquet held here March 18 at the high school were Jeff Rutt: Star Keystone Farmer, Vickie Warfel: Star Red Rose Farmer, Dan Hershberger: Star Chapter Farmer and Tim Hanks: Star Greenhand recipient.

Jeff is the son of Kenneth Rutt, Peach Bottom, and works with dairy animals. He also serves as the chapter president.

Vickie Warfel, daughter of Mr. and Mrs. George Warfel, Quarryville, has had livestock projects including dairy cattle, swine and steers. She has also had projects in tobacco and corn. Vickie is secretary for the chapter.

Dan Hershberger, son of Mr. and Mrs. Robert Hershberger, Quarryville, R2, has projects in dairy animals and corn. With a harvest of 201 bushels of corn per acre, Dan became this year's state corn contest winner. Robert Groff of the Pioneer Seed Company presented Dan with a plague and $50 for his achievement.

Tim Hanks is the son of Mr. and Mrs. Richard Hanks, Drumore. He has had projects in his Freshman year in steers, corn and dairy products. Tim was the top seed and citrus salesman in the chapter this year.

Keystone Farmers honored at the banquet were Marshall Trimble, Jeff Rutt, Glenn Reinhart, Randy Ranck, James Bucher, Mark Howenwarter, Peggy Stottlemeyer and Mike Milburn.

Fourteen chapter members received recognition with Foundation Awards. Dairy Products Foundation awards were given to Marshall Trimble, Bruce Kreider and Jeff Rutt. Steve Weidman received an award in beef production. The Service Foundation award went to John Groff. Livestock awards were presented to Vickie Warfel and Mark Howenwarter. Les Hershey earned a Crop Production Foundation Award. Tom Jackson received a Soil and Water award. Ken Tucker was presented with the Agricultural Mechanics award and Ted Grumbein received the Placement in Agricultural Production award. Agricultural Sales and Service award went to Lee Ferguson and Agricultural Processing Foundation awards were presented to Charles Blevins and Steve Huber.

Corn Production awards were received by Dan Hershberger who placed first in the state, and Bruce Kreider and Les Hershey who placed second and third in the chapter.

For his achievements in dairy judging, having placed first in the North American Dairy Contest held at Columbus, Ohio, and third in the All-American Dairy Judging Contest, Joe Winters received Outstanding Solanco Dairy Judge Award for 1975.

Several organizations in the community presented awards to chapter members. Farm Women Society 20 presented Glenn Reinhart with an Outstanding Senior FFA Member Award. The Lancaster County Bankers Award, presented by Robert Bucher went to Marshall Trimble. The Henry N. Wenger Life Insurance Agency Award was presented to Mike Milburn. Production Credit winner was Dave Gerhart.

Honorary Chapter Farmer Degrees were conferred upon four men who have promoted the FFA programs through their occupations or giving time and facilities to various FFA activities. Those who received honorary memberships were Gaylord Arnst, Graphic Arts Department, Solanco High School; Carl Beck, Administrative Assistant in the area of Curriculum, who was instrumental in writing the program for the federally

Congressional candidates

[Continued from Page 53]

tonight were silly, but I appreciate the opportunity for participation even though I'm not in agreement with the way things were conducted.

HERBERT MEARIG

I'm going on my record of service to the community for the past 25 years. During my boyhood I worked on farms, thus I am familiar with farm problems. The farm community is the backbone of our economy . . . the rest of the country should take a good hard look at the farmer. This is a great country — we should strengthen our defense system, help farmers, and create more jobs.

Q1 — I worked on farms during my boyhood.

Q2 — The placing of nuclear energy plants must be done with discretion, but we do need them. Solar energy research is needed.

Q3 — I'd consult the farmers first; also the Department of Agriculture, and economists.

Q4 — Yes, definitely. Unions do not represent labor as such.

Q5 — Yes we can cut budgets through vocal efforts.

Q6 — The Capper-Volstead Act should not be weakened.

Q7 — I'm the candidate, not the financial chairman. But we are on an austerity program.

Specific Question: What legislation would you propose to better the plight of the farmer? I would have to do some consultation on that.

Closing Remark: I'm concerned about the questions which were asked here tonight. I believe they were meant to embarrass. I stand on my record of proven leadership.

MARVIN MILLER

Farm people . . . most of the people don't understand 'em. I have given strong support to farm bills in the past and will continue to do so. I want reasonable control of farmer cooperatives to protect against such losses as have occurred with Lehigh and Dairylea. The financial status of cooperatives should be opened and examined by certified public accountants. I am in favor of a national food policy because we need long-range plans. Without such a policy both the consumer and farmer would be frustrated.

Q1 — I'm not a farmer; I used to work on farms as a kid, hanging tobacco.

Q2 — I favor energy parks outside of farm lands and population centers.

Q3 — No, business has the same opportunities as labor, only they don't take advantage of their opportunities.

Q5 — There's no way to cut the budget . . . not with inflation . . . no way. But you might be able to put a ceiling on government spending.

Q6 — I advocate farmer control of cooperatives and would support legislation to that effect.

Q7 — I will accept any legal contribution . . . it costs money to run a campaign, I'm not running for president of the sophomore class.

Specific Question: Explain your stand on unionization of labor in the mushroom business. That allegation is entirely erroneous, I voted for unemployment compensation benefits for mushroom production workers. The question is irrelevant.

Closing Remark: I urge you to abide by fair campaign tactics. I did not like some of the questions here tonight because I believe they were planted and I am opposed to ananomous questions such as were presented here.

RICHARD MOHLER

I'm not a farmer but I grew up on a farm. I worked in Washington for 17 years as a foreign service officer under four presidents. I believe this experience qualifies me as a knowledgeable candidate. Two things need to be considered immediately. Number one — the present tax structure is wiping out the small family farmer . . . we must change limitation on estate taxes . . . let it float. Number two — American farmers and what they can do must be protected. There are more farmers in Lancaster County than in any other county in the United States.

Q1 — I come from a farm background and family. Some members of the family are still engaged in farming.

Q2 — We are confronted with an energy crisis. Nuclear energy is one way to solve the problem, but the reactors should be moved to those locations where the energy is needed the most.

Q3 — I would need advice and I would turn to Pennsylvania farm organizations.

Q4 — No, unions aren't at an advantage. We all have those opportunities only they're using them and others haven't.

Q5 — It is possible to cut spending. I have done so with my position in government service. The responsibility to cut the budget lies with Congress.

Q6 — The value of the Capper-Volstead Act has been proven.

Q7 — I'm not sure what's been spent. I accept any legal contribution.

Specific question: Why can't one man on Capitol Hill make a difference in government? One man who understands the system and is willing to work can make a difference.

Closing Remark: I welcome the chance to continue to serve in government on the basis of my public service for the past 17 years.

RICHARD SCOTT

I'm running on the basis of my record. I have been in public service for all of my adult life . . . working wife NATO, defense, and as mayor of Lancaster. My record clearly indicates fiscal responsibility, decrease in crimes in Lancaster, and openness in government. If I go to Washington I will fight for the return of government to the local level. Specifically for this area, I want to preserve this fertile land. We not only raise good crops here, but good people as well.

Q1 — I admire and respect farmers . . . I am not a farmer. We can help farmers by stopping urban sprawl. We should re-cycle our cities.

Q2 — It's a question of balance . . . we need atomic energy, no cleaner or safer form of energy is available, but we should be prudent about where we place these atomic energy plants.

Q3 — I'd come to the farmers.

Q4 — Yes, unions do have an advantage . . . I think it's a fault in the system.

Q5 — The budget should and can be cut.

Q6 — I'm not informed about that act.

Q7 — I can't say because I don't keep track of it personally.

Specific Question: None asked.

Closing Statement: I'm the most experienced candidate,

[Continued on Page 57]

FFA members

[Continued from Page 55]

funded pilot project in agricultural products processing now being used at the school; Jason Weaver, a local beef farmer who assisted with the beef shows at the Solanco Fair, and Maurice Welk, who allows the chapter to practice dairy judging techniques at his farm.

Chapter officers honored at the banquet were President: Jeff Rutt; Vice-presidents: Mark Howenwarter, Randy Ranck and Marshall Trimble; Secretary: Vickie Warfel; Treasurer: Glenn Reinhart; Reporter: Ken Wiker; Sentinel: Bruce Kreider; Chaplain: Dewey Atkins; Parliamentarian: Gary Keefer; Photographer: Mike Milburn.

Lloyd Hoover, State FFA Vice-president presented the Building Our American Communities Award to Jeff Rutt who received it on behalf of the chapter for its work in promoting better communication between agriculture and the community.

The Good Brothers of York County provided musical entertainment.

Congressional candidates

[Continued from Page 56]

my life is an open book. I'm not pleased with the way portions of this meeting were conducted. Especially some of the catty questions.

ROBERT WALKER

As Congressman Ed Eshleman's aide, I'd like to continue the work we started and finished together. Some of the important issues we need to consider at this time are: 1. The inheritance tax. I favor a $200,000 exemption limit and that land be appraised on its agricultural value. That provision has to be in the legislation. 2. The farmer needs a free market economy. No government programs. A policy which says grow all you can and sell all you can. 3. Dairy imports should be set up so that foreign producers meet the same standards as those in this country.

Q1 — I grew up on a farm as a boy and worked on farms as a teenager.

Q2 — Nuclear energy cannot be abandoned, but we must also concentrate on other sources. Reactors should be built in wide open areas.

Q3 — I'd consult farmers and farm leaders.

Q4 — Absolutely ... no doubt about it, unions have an unfair advantage in election campaigns. That is something which has to be stopped.

Q5 — There is no area in government which cannot be cut, and it's time we do so, especially welfare.

Q6 — The value of farmer cooperatives has been proven over and over again. But protection is needed to avoid monopolies.

Q7 — I'm not sure of exact figures. We've spent about $3,000 so far. I'm not accepting donations in excess of $100. The office should not be sold to the highest bidder.

Specific question: How have you differed with Eshleman's voting? I differed with him on the beef research question, beyond that we have no differences.

Concluding Remark: Please evaluate the records — mine and those of others.

MARTIN ROSS

I'm worried about debt on all levels. What are we going to do? The U.S. Labor Party proposes a debt moratorium and we must have it. I predict a financial collapse and chaos in the United States if the debt moratorium is not passed by March 31. In Europe the economies are already collapsing and there is mass turmoil right now. Those countries are falling apart. In the United States we have inadequate transportation, poor health care, not enough food, and not enough insurance.

Q1 — (Answer irrelevant).

Q2 — Nuclear energy is insane, they shouldn't be anywhere and at best they are only a 200-year solution.

Q3 — I'd go to farmers, but the rest of the population has an equal voice in how food is produced. The Labor Party supports the NFO (National Farmers Organization).

Q4 — It's a question not of power, but of how to solve the political-economic mess.

Q5 — Any cuts in government spending would mean death to our society.

Q6 — I would have to review the facts.

Q7 — I am committed to the Labor Party, nationwide. I believe in socialistic principles and the philosophy of Karl Marx.

Specific question: Why didn't you pledge allegiance to the flag here tonight? I believe in population and have no allegiance to any particular country. I have a very scientific understanding of life.

Closing Remark: I understand things quite scientifically.

Chore-Time Completely Automatic Feeding System

Featuring The CHORE-MATIC®

The Chore-Time feeder outsells every other floor feeder on the market for one good reason. It helps broilermen produce more dollars worth of bird from every dollars' worth of feed.

How? By keeping birds supplies with fresh feed at all times. Because birds are not confronted with stale, picked-over feed, their appetites are stimulated. They convert feed more efficiently, gain weight faster and more profitably.

Fact is, Chore-Time is loaded with refinements and exclusive benefits you don't find in other feeders. The pulling feed feature and self-aligning pans are just two that save on feed as well as on operating and maintenance costs.

Three new directors named

Three new Directors joined The First National Bank of Strasburg's Board of Directors today at the Bank's annual meeting. They are Calvin G. High, E. Glenn Nauman and Richard E. Rohrer.

High is president of High Steel Structures, Inc. and a partner in High Realty.

He and his wife, Janet, live on Old Philadelphia Pike and have three children.

Nauman is President of H. W. Nauman & Son, Inc. The Lancaster County native resides with his wife, Vera, in Lancaster, R6, and they have four children.

Rohrer is a sales engineer for Weil McLain Company.

He and his wife, Sarah, reside in Strasburg.

The Board of Directors held a reorganizational meeting following the annual meeting. William M. Musser, Jr. was re-elected President, John E. Burkholder was re-elected Vice President and Howard E. Groff was elected Secretary.

Richard Rohrer

Calvin High

Glenn Nauman

The outlet is located in Akron.

TRIVIA

Greenhouse Effect

Radiation from the sun passes through space until it reaches the outer atmosphere of the earth. Much of it is absorbed by the earth's surface, causing the temperature to rise. The heat is then reradiated. If the amount of C02 in the atmosphere increases, a larger amount of this radiation is trapped as in a glasshouse, instead of being lost into outer space. In the last 50 years there has been an increase in the level of C02 in the earth's atmosphere because of the burning of fossil fuels—though probably not enough to raise the earth's temperature

Pierced Potatoes

To avoid soggy baked potatoes pierce your potatoes before placing them in an oven or immediately after removing them from the oven to permit steam to escape.

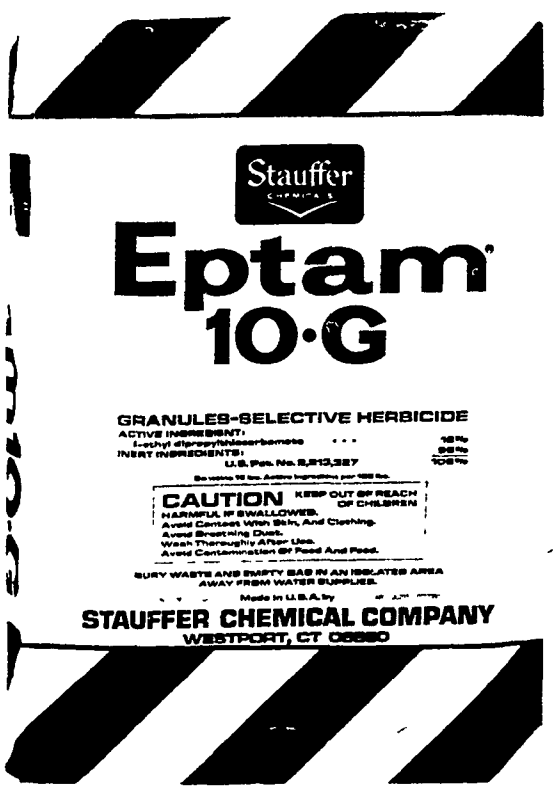
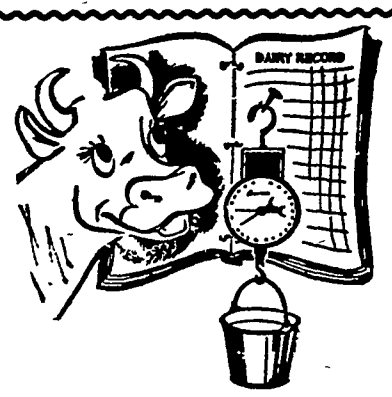
Why use a Free-flowing granular herbicide ?

One package granular weed control for corn.
Reliable grass and broadleaf weed control.
Stops nutsedge, foxtails, seedling johnsongrass.
Also cocklebur, ragweed, smartweed, pigweed.
Saves hauling water for spray in busy season.



Ideal for dry and snap beans, potatoes, alfalfa.
Stops nutsedge, quackgrass, Bermudagrass and over 25 other weeds and grasses.



Lebanon DHIA MONTHLY REPORT

A six-year old cow in the Bill Meyer herd, and an eight-year old cow belonging to Clifford Groff came up as champions in the Lebanon DHIA program for February.

Meyer's Holstein took first place in milk with her 21,672 pounds while Groff's black and white producer chalked up 818 pounds of butterfat.

Want to increase next year's tax refund...

Open a Farmers First Individual Retirement Account this year.

If you are working but not covered by a qualified retirement plan, this account allows you to deposit as much as 15% of your income, up to $1,500 per year, into a retirement savings plan. The deposits made during the calendar year are deductible from your gross income. This means a tax savings for you. The money you put away and the earnings on it won't be taxable until you retire. And by then, chances are you'll be in a lower tax bracket.

To open an IRA, stop at any office of Farmers First Bank where . . .

Serving you is fun for us...

EPHRATA, EPHRATA NORTH, INTERCOURSE, LANC SHOPPING CENTER, LINCOLN, LITITZ, MARIETTA, NEFFSVILLE, PARK CITY

FARMERS FIRST BANK

Member F.D.I.C.

WHITE WASHING with DAIRY WHITE

- DRIES WHITE
- DOES NOT RUB OFF EASILY
- NO WET FLOORS
- IS COMPATIBLE WITH DISINFECTANT AND FLY SPRAYS
- WASHES OFF WINDOWS & PIPELINES EASILY.

Also Barn Cleaning Service

Available With Compressed Air

To have your barn cleaned with air it will clean off dust, cob webs & lot of the old lime. This will keep your barn looking cleaner & whiter longer. We white washed 600 barns last year, so if your barn needs white washing for better service have it done early.

MAYNARD L. BEITZEL

Witmer, PA 17585 717-392-7227
If no answer call Willard Beitzel 717-733-6357

We will take on work within 100 mile radius of Lancaster.

Barn spraying our business, not a sideline.

Spraying Since 1961

(Middle row) Carolyn Hutchinson, Mrs. William Shainline, Kathy Smith, Mrs. John Hasson, Rose Mary Campanova, Ken Smith. (Back row) John Myers, William Shainline, Dr. Robert Hutchinson, Joe Light, Harold Detwiler, John Hasson, Ken Marple, E. Campanova and John Wood.

FREE RIDE...This baby kangaroo at Chicago's Brookfield zoo knows only warmth as it enjoys a free ride in the pouch of its mother, Hoppy. Zoo officials think the baby is about four months old, but don't know yet if it is a male or female.

What's New

New Stauffer Brochure Describes Six ways to Control Nutsedge

A new brochure available from Stauffer Chemical Company describes Stauffer's line-up of six herbicides and additional tank mixes for control of nutsedge and other problem weeds.

The 34 page booklet outlines formulations, application directions, mixtures with fluid fertilizers, and ground preparation in addition to eight charts listing the variety of weeds controlled.

On alfalfa, dry and snap beans, potatoes, sugar beets, flax, sunflowers, citrus, almonds and walnuts, the booklet explains use of Eptam selective herbicide for control of nutsedge and other tough problem weeds.

Vernam selective herbicide is explained for use on peanuts, soybeans and sweet potatoes. Vernam tank mixed with Treflan for broader weed control in soybeans is also described.

In tobacco, tomatoes, and in some areas on sugarbeets, Tillam selective herbicide controls nutsedge and many other weeds. The booklet also details use of Tillam with Dyfonate insecticide for wireworm and weed control in one easy operation.

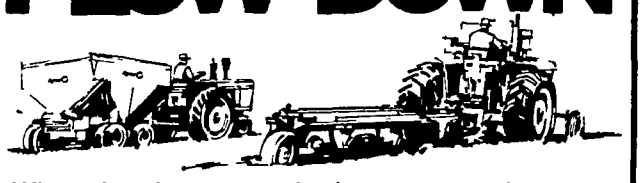
Ro-Neet selective herbicide for sugar beets, table beets and, in certain states, on spinach is described in the booklet along with Eradicane selective herbicide for the really tough weeds in corn like wild cane, sandbur and nutsedge.

In field, silage and sweet corn, Sutan selective herbicide can be used alone or tank mixed either with atrazine for broad spectrum weed control, or with Bladex for broad spectrum weed control with no residue carryover.

Also explained in the booklet is Herbigation TM weed control service for applications of Sutan Plus, Eptam and Eradicane in irrigation systems.

Stauffer brochure A-10594 can be obtained by writing: Stauffer Chemcial Company, Agricultural Chemical Dividion, Ken Powers, Westport, Conn. 06880.

PLOW DOWN



Why take chances on bad spring weather and late planting? Each day's delay at planting time can cost you one bushel of corn per acre of harvest. Plow down one of our Agrico high nitrogen, complete fertilizer recommendations. We will have it applied for you or rent you the necessary equipment.

meet the hummers

the new breed of FOX. power-matched forage harvester:

Four models—the 2100, 2200, 2300 and 3300 are ready to match your tractor, 55 hp and up. They've come to be called "the hummers" because of the quiet, precise way they wade through heavy tonnages of corn and hay.

Both the quiet operation and high capacity are the results of new-breed Fox engineering. For example, special acoustical shielding traps much of the sound and directs it down to the ground. And a new type of cornhead utilizes quiet rubber gathering belts and a rotary sickle knife that's practically vibrationless.

The result: This new breed of Fox harvester runs so smoothly you can hardly hear the hum of the machine over the sound of the tractor!

One sound our new engineering didn't tamper with: the tick, tick, tick . . . to cut, cut, cut . . . that blends into a hum as the Fox tonnage terror reaches operating rpm.

Fox knives are set to tick the shearbar all across 120 inches of knife edges. No rip. No shred. A "hummer" bites sharp and clean to save horsepower, time and repairs under hard use.

Along with this new sound in harvesting, each "hummer" has a sleek, low profile. And, for each model, there's an all-new line of harvesting heads, including both wide- and narrow-row cornheads, and 5-foot and 6½-foot hayheads.

If you're thinking about a new forage harvester in '76, don't make any decision until you see—and hear—the new breed of Fox forage harvester. Visit your Fox dealer.

Welfare not his bag

The American incentive to work is becoming dangerously weakened by a welfare system that encourages people not to work, Darvin Boyd told an audience of nearly 100 people Saturday night, March 22, at the Brunnerville Fire Hall.

The dinner rally was the first of five such events planned by Boyd, a candidate for the Republican nomination to the 16th U.S. Congressional District seat now held by Rep. Edwin D. Eshelman. Boyd said he will address different issues at each of the rallies. He confined his remarks Saturday night to welfare and the federal budget.

"The gap between the incomes of people who work and people who don't work is becoming narrower and narrower," Boyd told his listeners. "In Pennsylvania, over half the welfare families of four receive $4344 in public assistance cash payments and another $744 worth of food stamps annually. That's $5088 per year, or 97 tax-free doallars a week.

"U.S. Department of Labor figures show us that a working family of four needs a minimum of $9198 gross income. Out of that $9198, the working family must pay an average of $2844 per year in medical costs, transportation, social security and payroll taxes, which leaves $6354 - $122 a week - for the rent, the groceries, clothing and all the other necessities.

"The welfare family doesn't pay social security or wage taxes, and they get free medical care and transportation. That means the working family has only $25 a week more to spend than the family that doesn't work."

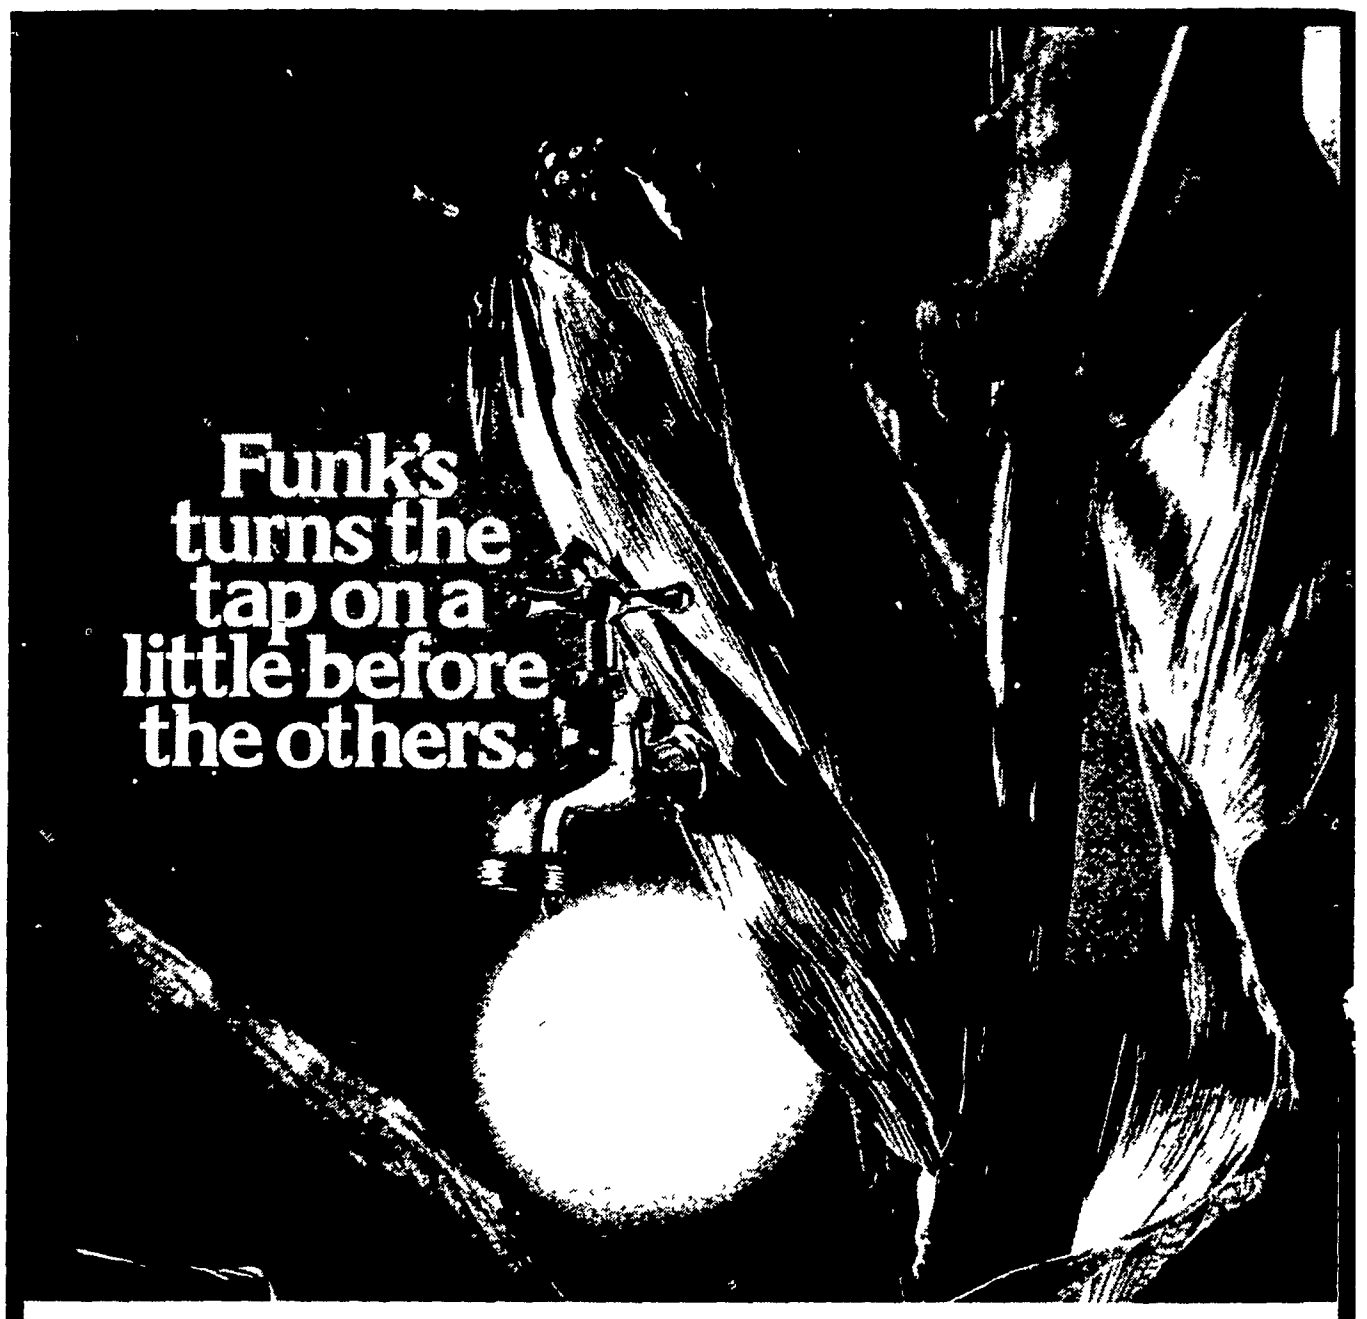
SERVING THE COMMUNITY
TWENTY-SIX YEARS
LANC. CO. OLDEST FORD DEALER



Right off the bat, you're going to say "oh, they're talking about early-maturing hybrids"

Not necessarily so

Because our research people worked long and hard to make all Funk s G-Hybrids start drying down before the others Consequently, we've gained a reputation for being drier at harvest.

And remember, our stalks stay sturdy and strong, and stand right through the end

It's just that our hybrids don't come out of your fields all wet behind the ears.

And that's going to save you headaches at harvest, moisture points at the elevator or fuel if you dry down in your own bin

So, if you're lookin' for hybrids that dry down fast regardless of maturity, turn to the ones that turn the tap on early.. Funk's G-Hybrids

You won't get turned off by the results

The Producers of Funk's G-Hybrids.

No-till covering more ground

Editor's Note: The following brief history and description of no-till is submitted by William G. McIntyre, senior Hunterdon County agricultural agent, New Jersey.

The latest issue of Agricultural Research put out by our U.S. Department of Agriculture has an interesting commentary on modern agriculture. They point out that the venerable plow is steadily yielding ground to a more modern way of farming; minimum tillage and related methods. Indeed, a USDA study predicts that by the year 2010, American farmers will practice conventional tillage methods only about five percent of our crop land.

Minimum tillage techniques gained initial impetus after World War II as farmers began feeling the pinch of chronic labor shortages. In an effort to complete planting on time, enterprising farmers began learning how to save time and labor by planting row crops in narrow strips of soil cut open by a coulter blade or a chisel. Today's minimum tillage or "no till" farmer, plants a winter cover crop, typically rye, after the fall harvest. In the spring he kills the rye with herbicides, then seeds the main crop into the resultant mulch with a special planter. Not a furrow is turned, nor does the farmer need to re-enter the field until harvest time when the cycle begins anew. USDA reports that plow-less farming is now underway on more than six million acres in this country and it is expanding rapidly. Minimum tillage methods are not without their problems, however. Insects, once held in check by deep plowing, thrive in the undisturbed soil and the mulch. Farmers who fail to anticipate this problem and to select the proper insecticides court disaster. The necessary herbicide application must be made on a precisely timed basis to establish enough mulch to check the erosion, yet not smother the seedlings.

Science will help remedy these and some other problems related to minimum tillage farming, the concept recently cited as a "truly basic change in the history of agriculture." "No-till" unquestionably saves farmers time, labor, and money. Its long term benefits however, may well lie not in farm economics, but in conversation. The unturned soil, protected by this layer of mulch can retain fifty percent more soil moisture than a plowed field. In addition it can cut erosion and run off on sloping fields by up to ninety percent.

This is good news in these times of environmental awareness and consequent social constraints. It is indeed an idea whose time has come. Talk to any of our farmers who have really studied the no till corn growing technique and you will know what the USDA folks mean when they say it does save some time and more important it does save soil structure.

Angus judges called

Beef cattle judges interested in participating in the 1976 National Angus Judges Certification program April 24 in Reno, Nevada, have only until April 1 to enroll for the minimum $35 fee reports Dean Hurlbut, director of activities for the American Angus Association.

The program is open to all persons who are interested in judging Angus breeding cattle shows. Enrollment will not close until just prior to the event, but the fee will be $45 after April 1.

Judges who qualify in the program will have their names placed on the Certified Angus Judges list and will receive a certification card from the Association good for three years. Judges who last qualified at the event in Reno in 1974 will have to be requalified to remain on the Association list which is circulated to show officials.

The program begins at 7:30 a.m. on April 24 at the Washoe County Fairgrounds. Participants will place 12 classes of breeding cattle and give oral reasons on two classes. The reasons classes will be designated before before the judging begins.

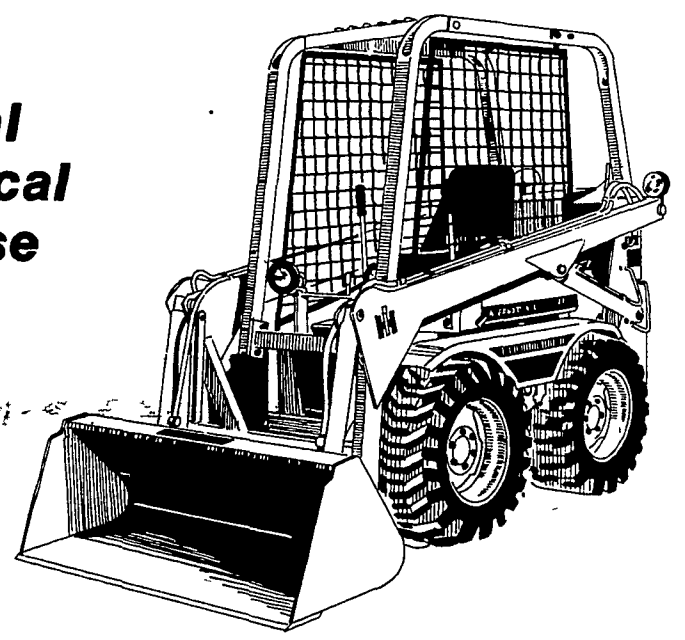
Headquarters for the Certification Program is the Holiday Inn of Reno Downtown. This will also be the headquarters for the Western Regional Junior Angus Heifer Show and the Western National Angus Futurity April 25-26-27.

For registration or additional information judges should contact the American Angus Association, 3201 Frederick Blvd., St. Joseph, Missouri 64501.

Any soil that will grow good vegetables or flowers, and has at least a half day of unobstructed sunshine, should grow good roses.

GO IH BIG RED

Compact, economical and practical for farm use



International® 3200B/3300B Compact Loaders

Now you can have a compact skid steer loader that's a genuine International from front to back. Despite its small size, this International handles jobs you'd think would require a bigger, costlier unit. Skid steering allows 360° turns within the tracks for operating in cramped quarters too small for a tractor. Convenient foot pedals control bucket so your hands are free for steering and speed control.

- Choice of two sizes: 28 hp, 1600-lb. full height lift capacity; 37 hp, 1950-lb. capacity.
- Hydrostatic 4-wheel drive provides ideal traction and control.
- Oscillating axles keep all wheels on the ground for maximum stability, traction.
- Changeable tread width allows adjustment for variety of stability and space requirements.
- Quick-cycling to save time.
- Variety of attachments expand utility to all kinds of jobs.

Bank managers appointed

LANCASTER — The First National Bank of Strasburg has named J. Wilbur Garman as vice-president and branch manager of the bank's new Millersville office, Wabank Road and Barbara Street, Millersville.

The new Millersville branch office will officially open to the public on March 31 at 11 a.m. with a ribbon cutting and open house and appearances by local dignitaries.

William R. Helm has been appointed assistant manager of the new Millersville office.

Garman has 14 years experience with the Strasburg Bank, both as assistant vice-president and assistant cashier at the Willow Street Branch. He also was previously employed by the Lancaster County National Bank and the Leola National Bank.

He attended Franklin and Marshall College and holds a graduate certificate from the American Institute of Banking.

Garman is a member of the Lancaster County Bankers Association and a former director of the Lancaster Chapter, American Institute of Banking.

William Helm

Wilbur Garman

The new vice-president is extremely active in fraternal organizations including Masonic Lodge No. 496 of Millersville, the Lancaster Lodge of Perfection, Zembo Temple Temple in Harrisburg and the Lancaster County Shrine Club.

He and his wife Charlotte reside at 1434 Hollywood Drive, Lancaster. They are the parents of three children.

Helm, who resides at 154 Willow Street Pike, Willow Street, has been employed by the bank for 1½ years in various management trainee positions.

He previously was employed for 23 years by RCA Corporation in Lancaster and had financial and planning responsibilities within that company.

Helm received his undergraduate degree from Elizabethtown College and has done graduate work at Temple University. He has also taken courses from the American Institute of Banking, of which he is a member.

Active in community affairs, he is currently president of the Lampeter - Strasburg School Board. He is a past president and current council member of the Elizabethtown College Alumni Association and has held various offices with the Willow Street Lions Club.

Helm and his wife LaRue are the parents of two children.

Soybean research urged

WASHINGTON, D.C. — With soybean prices lower than production costs, the only solution is to reduce the cost of production through research, the American Soybean Association (ASA) contended in testimony Wednesday (March 24) before House and Senate appropriations subcommittees.

Arguing that the competitive situation faced by soybeans in the U.S. and abroad does not offer much hope for an improvement in soybean prices, ASA vice president Dick Elijah of Clarence, Iowa, urged Congress to invest more money in research to improve soybean yields.

Elijah spoke on behalf of ASA, the National Soybean Processors Association and the National Soybean Crop Improvement Council.

The ASA official also pointed out that U.S. tax dollars have been used to subsidize $270 million in loans for foreign palm oil production during the past 10 years, "while the federal investment in domestic soybean research is considerably less than one-fifth as much for the same 10 years."

He urged the subcommittees to assure "at least equal treatment" of domestic commodities versus foreign competition and recommended an appropriation this year of $9.1 million for soybean research.

Elijah said soybean production costs have more than doubled in the past three years, while yields per acre have remained relatively static for the past 10 years.

Estimated production cost for 1976 ranges from $4.50 to over $5 per bushel, he said, but current soybean prices are only about $4.45 per bushel.

Extra hours added for automobile registration

The State Transportation Department announced that the Bureau of Motor Vehicles would be open extra hours for the renewal of automobile registrations that expire at midnight, March 31.

The Bureau's office in downtown Harrisburg will be open from 8 a.m. to 7 p.m. on March 29, 30, and 31. Also it will be open Saturday, March 27 from 8 a.m. to 4 p.m.

Auto registration renewals also will be handled at the State Farm Show Building from 9 a.m. to 3 p.m. on March 29, 30, 31 and April 1. Checks and money orders only will be accepted there.

Also, telegram money orders will be accepted in lieu of the regular registration renewal application. These should be made payable to "PennDOT" and should list the name, address, phone number, tag and title number of the motorist and the car being renewed. They should be sent to: Bureau of Motor Vehicles, 208 Transportation & Safety Building, Harrisburg 17122.

Registrations can also be renewed at the Philadelphia branch office, Southampton Rd. and Roosevelt Blve., and the Pittsburgh branch office, 300 Liberty Avenue.

Meat officials testifies on importation numbers

WASHINGTON, D.C. — When U. S. beef production increases, the level of imports permitted under the Meat Import Law should be decreased, C. W. McMillan, Executive Vice President of the American National Cattlemen's Association, told the Senate Finance Committee.

McMillan testified at hearings on a bill (S-595) dealing with meat import limits which was introduced last year by Sen. Dewey Bartlett (R-Okla) and other Senators. The hearings were called following disclosures of meat import monitoring problems and excessive import totals in 1975.

The Bartlett measure would establish quarterly import controls, and it would base the controls on relationships between fed cattle slaughter and total commercial slaughter during prior calendar quarters. Fewer imports would be allowed following periods of heavy non-fed slaughter and more following periods of light non-fed slaughter.

McMillan endorsed the concept of the inverse relationship between total domestic beef production and import control levels. (This concept would differ from the present law, which allows imports to increase in relation to growth in domestic beef production.)

However, the ANCA official recommended against differentiating between fed and non-fed beef in the Meat Import Law.

"Beef is beef," he told the Senators. "We have seen a decrease in non-fed slaughter recently, but the cattle market is down because of an increase in fed beef production and in total beef output. Also, we should remember that 25 percent of a fed beef carcass goes into grinding meat — with which imported beef competes most directly — in the form of trimmings. Therefore, it is important to limit meat imports in periods of large fed as well as non-fed beef output.

"We need a formula where there is an inverse relationship between domestic output and imports under the Meat Import Law, but it would be best for the entire industry, and in the long term good of the public, if this were based on total commercial slaughter rather than output of different types of beef."

McMillan reminded the Senators that the U. S. Meat Import Law is much more fair than are controls imposed by other nations which trade in beef. He explained that the U. S. law provides for access to U. S. meat markets in amounts related to domestic production.

He said that other countries should adopt the same market sharing concept. However, the European Common Market and Japan, as well as other countries, have applied arbitrary embargoes and extreme limitations on meat imports. This had disrupted world meat trade and caused severe problems for the U. S. livestock industry.

The ANCA official also emphasized the need for more accuracy and timeliness in government reports on imports under the law. Lags in reporting were said to have been a major reason for 1975 imports' exceeding restraint levels.

"The Bureau of Census figures used in the past have been totally inadequate," McMillan told the Senators. "According to U. S. Department of Agriculture officials, much more timely and accurate data for monitoring purposes could be supplied by the Bureau of Customs."

Farm safety forum held

To examine what can - and should - be done to improve safety conditions on the farm, International Harvester earlier this year invited nine representative U.S. farmers to a farm forum discussion on the topic. They were from different parts of the country and had varying sizes and types of operations. All agreed farm safety is a highly personal matter.

There was general agreement that it's up to the farm operator to stress "safety first." "I don't believe you can legislate safety," explained Don Haldeman, 38, a Norwalk, Wisconsin, dairy and corn farmer. "Maybe you can legislate the enviroment, but you can't legislate the operator.

"It only takes a second to have an accident," said Larry Maurer, 34, who lost a hand in a farming accident. "My problem was trying to operate too cheaply, with worn-out equipment. I think that when a piece of machinery gets pretty well shot, you ought to get another piece of equipment. It's cheaper in the end."

Maurer, who grows corn and raises dairy cows at his McAlisterville, Pennsylvania, farm, urged the use of pictures to warn of dangers on the farm. "Since there are so many corn picker accidents each year, maybe a stencil of a hook or something in place of human hand should be put where a person would naturally reach in for something. That would catch your eye better than a sign saying 'keep off.'"

The idea of warning pictures caught on with others taking part in the farm forum. "You can stencil any writing all over that piece of equipment, but if the boys don't read it - or can't read it - then you're not doing any good," said Sikes. He suggested pictures be placed around the shop area to warn of dangers.

Wenger into politics

MANHEIM - Jay Irwin Wenger a farmer and teacher from near here has announced he is a Republican candidate for State House from the 97th District. The seat is currently held by Marvin Miller, Sr.

Wenger, 47, operates a small grain, tobacco and vegetable farm in East Hempfield Township. He is also Home and School Visitor for the Derry Township School District in Hershey. Prior to that job he had taught in the Hershey Vocational School.

The candidate also lists two years of experience in the Department of Public Welfare in Harrisburg. He has also had 3½ years of experience as a DHIA milk tester including three months as a Maryland State check tester. Aside from that the 1951 graduate of Elizabethtown College has also worked for the Hershey Chocolate Co., New Holland Machine Co., and Martin Mfg. He currently owns and operated his own toy and souvenir business.

Married to the former Jean Wagner, he and his wife are the parents of two sons, aged seven and nine. He belives that his varied background would serve him well as a representative in the General Assembly.

Ag-safety Tip

Each principal farm building, including the home, should have a fire escape plan—the quickest way to evacuate in case of an emergency, advises Farm Safety Engineers at Sperry New Holland. Each family member and employee should be familiar with it.

Ammonia regulations termed 'unrealistic'

EPHRATA - New federal regulations placing unrealistically low limits on ammonia exposure would strike hard at firms supplying fertilizer to Pennsylvania's farmers, according to Donald W. Parke, executive vice-president of PennAg Industries Association. PennAg is a state-wide trade organization of Pennsylvania agribusiness firms. Parke made his comments in the most recent issue of "The Grist", the association's monthly publication for members.

The proposed regulations, issued recently be the U.S. Department of Labor's Occupational Safety and Healt Act (OSHA) office, would drastically reduce the amount of ammonia allowed in the air in a working environment, Parke said.

The present limit, under OSHA regulations now in force, is an eight-hour average of 50 parts of ammonia per million parts of air (ppm). This rule recognizes the fact that during certain times of the day, such as loading and unloading, the air in a fertilizer plant or distribution point might contain more than 50 ppm ammonia.

The proposed OSHA limit would impose a ceiling of 50 ppm for any five-minute period, Parke said, and that's where the problem arises for fertilizer manufactures and distributors in Pennsylvania and other states.

"To comply with these regulations," Parke said, "the fertilizer industry would have to spend about $4500 per employee. That cost would show up eventually in the cost of fertilizer to the farmer. And as farmers' costs go up, so do food costs.

"We can't say these regulations would have an enormous impact on food prices," Parke continued. "But whenever a government regulation adds to the cost of doing business, it eventually hits the average citizen. It takes more of our take-home pay to buy the products that become more expensive to produce because of excessive government regulations."

How dangerous is ammonia? A Department of Labor fact sheet on ammonia says that exposure to low levels (500 ppm or ten times the proposed ceiling limit) may result in an irritation of the eyes, nose, and throat. Watering of the eyes, and redness and pain in the eyes, nose, and throat are the usual symptoms, the fact sheet savs

"Practically everyone has been exposed to ammonia vapors at a higher level than 50 ppm," Parke said. "Routine cleaning-chores with household ammonia will put 60 to 100 ppm in the air. A lot of people can't even smell ammonia until the concentration gets above 40 ppm.

"Ammonia has such a pungent odor, in fact, that it's added to some products as a safety device, the same way we add a harmless substance with an odor to natural gas - which is odorless by itself. Even at low levels, much lower than 500 ppm, ammonia makes people so uncomfortable that they simply leave. Its smell is its own best warning agent."

Parke stressed that the industry has no objection at all to the 50 ppm eight-hour average limit. "We can't argue with reasonable government controls and guidelines. Without controls, some companies and individuals would abuse the system.

"We don't think, though, that we should just sit back and quietly watch as government tries to put yet another stumbling block in the path of business efficiency."

Dairymen tour Pa. farms

Three outstanding Pennsylvania dairy farms will be on the itinerary of the Central Jersey Holstein Association's annual tour, scheduled for Saturday, April 3. The farms are located in the Morgantown area, according to John Hageman, chairman for the event. They include: Pennwood Farm, owned by Harvey Stoltzfus; Rocky-Side Holsteins, Jeff Yoder; and Caernarvon Farm, Andrew Stoltzfus.

All three have registered Holstein herds well noted for high production and outstanding type. And, the area is particularly beautiful this time of year, continues Hageman. It is expected that many farmers will be out plowing and preparing their fields for spring plantings.

Cars will leave the Hunterdon County Extension Center at 9 a.m., stop and pick up passengers at Clinton Point Theater at 9:15.

Bring your own lunch, continues Hageman. Beverage will be provided.

The tour is expected to arrive back in Hunterdon by 4:30 p.m.

Chairman Hageman suggests that those interested in attending call the Hunterdon County Extension Service Office, 201-782-5911. Advanced registrations will give the committee an opportunity to plan the transportation needs.

Any and everyone interested in good dairy cattle and dairy cattle managements systems are invited to join the group. The cost will be nominal, just to cover the expenses of the drivers.

Honorary degree recipients honored at the recent Berks County FFA banquet were (from left) Wayne Lutz, Twin Valley; Donald Reinert, Kutztown; Lavern Barrett, Conrad Weiser and Benjamin Newcomer, Kutztown. Roger Imes, Jr. - president of the County FFA looks on.

Berks FFA members honored at banquet

By JUDY MITCHELL
Berks Co. Reporter

KUTZTOWN — The Berks County Chapter, Future Farmers of America held their annual banquet here on March 16 and four area vocational - agriculture teachers shared the spotlight with FFA members cited for outstanding achievement in the past year.

Toastmaster for the family-style dinner was Roger Imes, Berks County FFA President and Oley Valley President, who also conducted the program which followed. Lori Trusty, County Reporter, Gov. Mifflin, introduced the guests at Tuesday evening's banquet-meeting, and greetings from the state association were extended by Bill Abrams, State Treasurer, Gov. Mifflin, and Robert Stoltzfus, State Reporter, Twin Valley.

The instructors who received the honorary county degree plaques, presented by the county officers, were: Laverne A. Barrett, Conrad Weiser; Benjamin Newcomer and Donald Reinert, both of Kutztown; and Wayne Lutz, Twin Valley.

Randy Weyer, County Sentinel, Hamburg, introduced the Star Chapter Greenhands: Donald Feeg, Conrad Weiser; Glenn Lester, Hamburg; Larry Shrawder, Kutztown; Jeffrey Bowers, Oley Valley; Richard Carman, Gov. Mifflin; Scott W. Hetrick, Tulpehocken; and Daniel Mosteller, Twin Valley.

The Star Chapter Agribusinessmen, presented by Kenneth Sanner, County Vice-President, Kutztown, were: Lori Trusty, Gov. Mifflin; Dennis Lang, Hamburg; Ronald Flicker, Kutztown; Roger W. Imes Jr., Oley Valley; Gary McVaugh, Twin Valley; and David Rudy, Tulpehocken.

Michael Aidens, Twin Valley, introduced the Star Chapter Farmers: David Staaby, Conrad Weiser; James Adam, Hamburg; Kenneth Sanner, Kutztown; Timothy R. Strunk, Oley Valley; George E. Carles, Tulpehocken; and Harvey Bitler, Twin Valley.

Harvey A. Smith, area vocational consultant, announced that Kenneth Sanner was named the County Star Farmer and Gary McVaugh was named the County Star Agribusinessman, for which each was awarded a $50 savings bond.

Recipients of the county degree received certificates presented by George Carles, County Chaplain, and medal winners in the state project record book contest were recognized by Mr. Smith.

Jeffrey Miller, Kutztown, received a $200 check as winner of the State Production Credit Assn. contest. Dale Siegfried, Kutztown, received a $50 check for being regional winner, and Harvey Bitler a check for $25 as county winner, in the same competition.

Norman Manbeck, County Treasurer, introduced the winners of this year's Keystone Farmer Award: David Staaby, Conrad Weiser; Alyce D. Drey, Gov. Mifflin; James P. Adam, Hamburg; Dale Siegfried, Kutztown; Roger W. Imes, Oley Valley; George E. Carles, Tulpehocken; and Harvey Bitler, Steven A. Bleacher, Gary McVaugh, Larry Stoltzfus and Douglas T. Yoder, Twin Valley.

Biofeedback

Recent research indicates that the human brain is capable of providing humans with control over their bodies to a greater degree than previously imagined Using sophisticated electronics, researchers have developed techniques called biofeedback which enable persons to alter their bodily functions For example, a man can learn to vary the rate at which his heart pumps or his blood flows Subjects have actually learned to identify and control different types of electrical waves emanating from the brain

Fruit and vegetable decay control studied at University of Maryland

COLLEGE PARK, Md. — Horticulture scientists at the Maryland Agricultural Experiment Station have shown that fresh fruits and vegetables can be protected from decay by the application of a gaseous fumigant called acetaldehyde.

This volatile compound is not new to the fruit and vegetable industry, since it occurs naturally in most living tissues, reports Dr. Krishna Prasad, research specialist in post-harvest horticulture at the University of Maryland in College Park. A native of India, Dr. Prasad is principal investigator on the acetaldehyde pilot project for control of decay or spoilage in fresh fruits and vegetables.

It has been known since the 1930s that the release of naturally occurring acetaldehyde is useful to control decay or spoilage in fresh fruits and vegetables in storage, Prasad commented. Introducing high levels of carbon dioxide into storage areas has served as a catalyst for this release of naturally occurring acetaldehyde.

Such high carbon dioxide controlled - atmosphere storage has served well for apple-growers, the Maryland research specialist noted. But it can produce skin damage or off-flavors in many other fruits, such as citrus, bananas, apricots, peaches and other soft fruits, including strawberries.

The need for new technology to control decay or spoilage in fresh fruits and vegetables is underscored by an annual estimated loss of nearly $200 million in U.S. marketing channels.

A major portion of this loss has been attributed to decay caused by micro-organisms. Fumigation of fresh fruits and vegetables with acetaldehyde could reduce such losses by 95 per cent, Prasad declared.

Acetaldehyde has already been cleared by the U.S. Food and Drug Administration (FDA) on a nonrestricted basis as a food additive and flavoring agent. The Maryland specialist hopes that his research data will result in similar clearance by the federal Environmental Protection Agency for use of the fungicide as a post-harvest storage fumigant.

Such clearance was granted for apples and strawberries by publication in the **Federal Register** on March 19, 1975. Prasad hopes that his research work will help to establish similar clearance in the near future for other fruits mentioned above.

The type of acetaldehyde treatment being tested at the Maryland Agricultural Experiment Station could more than double the marketing shelf life of fresh fruits and vegetables with proper storage conditions, Prasad believes.

To facilitate his tests, gastight acetaldehyde fumigation chambers have been designed and built on a flatbed truck for pilot studies. Operational tests indicate that uniform distribution of acetaldehyde vapor concentrations and temperatures can be maintained during the required exposure periods.

Current Maryland research, under the direction of Frasad, is aimed at achieving the following determinations:

- Precise concentration and exposure time needed for destroying decay-causing microorganisms;
- Safe and effective acetaldehyde vapor concentrations necessary to control post-harvest decay of fresh fruits and vegetables without adversely affecting their quality;
- Sensory and metabolic changes that may occur in fresh fruits and vegetables as a result of acetaldehyde vapor treatment;
- Necessary data to petition the Environmental Protection Agency for clearance of acetaldehyde as a fungicide on most or all fresh fruits and vegetables.

The Maryland research specialist reminds those who may use acetaldehyde to follow some necessary handling precautions, since the vapor boils at 21 degrees C. (about 70 degrees F.) No health hazards are posed by its use, he emphasized, provided that this guideline and certain other precautions are observed.

What's New

SIDP Offers Replacement Ewes Listing

Due to the increasing demand for breeding and replacement ewes throughout the United States, the Sheep Industry Development Program (SIDP) is offering a listing service to breeders and subscribers of the Weekly Dressed Lamb Market Report.

A modest charge of $1.00 per listing per week will include a description of the type of breeding stock available or information on replacement stock. Such information will include number available, breed, age, condition, price and the address and telephone number of the producer offering the livestock for sale.

There is no minimum or maximum number of listings required. The deadline for copy is Wednesday morning in order to reach the weekly publication date.

Also included in the Weekly Dressed Lamb Market Report is information on wholesale market activities, market conditions, retail activity and market outlook. Subscriptions are offered on a quarterly (January-March; April-June; July-September; and October-December) or yearly basis only, at a cost of $5.00 per quarter and $20.00 per year.

For more information, contact John C. Morrison, SIDP Managing Director, 200 Clayton St., Denver, Colo., 80206, or call (303) 399-8130.

Sire Power promotes two

Amon Grantham

TUNKHANNOCK - J. Amon Grantham has been named sire analyst at Sire Power according to W. Lewis Campbell, general manager. Grantham will work out of the Sire Power office at Frederick, Md. He succeeds Bennet Cassell who resigned to accept a position with USDA at Beltsville, Md.

J. Lloyd Ebersole has been named to the new position of director of sire development according to Sire Power General Manager, W. Lewis Campbell. He will continue to work out of the Tunkhannock office. Ebersole has been a sire power sire analyst for the last three years. He will be responsible for sire purchases, planned matings, operation of Sire Power's young sire development program, and directing semen production at the Tunkhannock, headquarters.

Ebersole was raised on a Guernsey farm near Duncannon, Pa. Following graduation from Penn State University in 1969, he joined the staff of the Northeastern Breeders Association and was named Assistant Sales Manager in 1971. He was named Sire Analyst for Sire Power in 1972. He is single and lives in Tunkhannock, Pa.

Lloyd Ebersole

Grantham joined Sire Power in June of 1973 as Sire Programs Consultant in charge of the Sire Power Herd Analysis Program. As Sire Analyst he will continue to head this program. In addition he will assist with sire purchases and planned matings.

Grantham was raised on a dairy farm near Kearneysville, W. Va., graduated from Sheppard College and received a Masters Degree in Dairy Cattle Genetics from Virginia Polytechnic Institute in 1973. He is single and lives in Kearneysville, W. Va.

NFU calling for changes

NEW ORLEANS, La. - The 74th annual convention of the National Farmers Union concluded here last week as delegates issued a demand for a renewed and revitalized national farm and food policy.

Forney Longenecker of Lititz participated in convention activities and policy debate along with more than 2,000 delegates and members from across the United States in adopting the National Farmers Union policy program for 1976-77 calling for a national farm and food policy building upon, modernizing and improving the basic farm legislation enacted over the past 40 years to provide a comprehensive, coordinated agricultural policy fair to both farmers and consumers.

The farm group urged coordinated programs of farm price and income supports to assure 100 percent of parity to producers.

In other policy action, the Farmers Union recommended that support programs, using producer payments, be extended to livestock and poultry.

The delegates also urged establishment of international commodity agreements to include pricing provisions to maintain farm prices between 90 to 110 percent of parity, establishement of world grain reserves, and expansion and improvement of food aid programs through joint efforts of exporting and importing countries."

Delegates adoped a minority report on nuclear energy. The resolution urged Congress to enact a moratorium on the licensing and operation of nuclear power plants until their safety is assured."

In another energy policy statement, Farmers Union urged a strong federal statue on strip mining and the banning of srtip mining on any land which cannot be restored to its original agricultural use.

Prepared Products

Prepared poultry food products—canned boned poultry, frozen dinners and pies, and specialty items, such as poultry a la king, cacciatore, chop suey, and stew—must be prepared under the inspection of the U S Department of Agriculture if they are to be sold in interstate commerce.

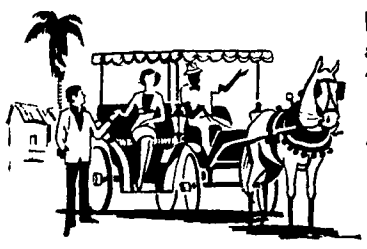
The First National Bank of Strasburg happily announces a new addition to our "Friendly Family"

our Millersville Office.

a new branch office at the corner of Wabank Road and Barbara Street

HOURS: MAIN LOBBY—Monday-Thursday 8 A.M -3 P.M, Friday 8 A M -8 P.M
DRIVE-IN—Monday-Thursday 8 A M -6 P.M , Friday 8 A M -8 P.M., Saturday 9 A M -Noon

To help us celebrate the new opening on March 31st, we're giving away terrific prizes Here's what you can win if you register at our Millersville Office between March 31 and April 15, 1976. *AND IT'S ALL FREE!*



FIRST PRIZE
a trip for two to Bermuda, 4 days-3 nights in an island paradise

SECOND PRIZE
$100 in a Savings Account

THIRD PRIZE
50 Bicentennial Silver Dollars

PLUS YOUR CHOICE OF:

1 The Friendly First will give you a Star Rose Red Hybrid Tea Rosebush when you open a new checking or savings account with the deposit of $100 or more or add that amount to an existing account.

2 The Friendly First will give you a $3.00 gift certificate redeemable at a variety of Millersville merchants.

(only one gift per depositor)

Plus souvenirs-balloons-treats And of course, the coffee is always free at this friendly office

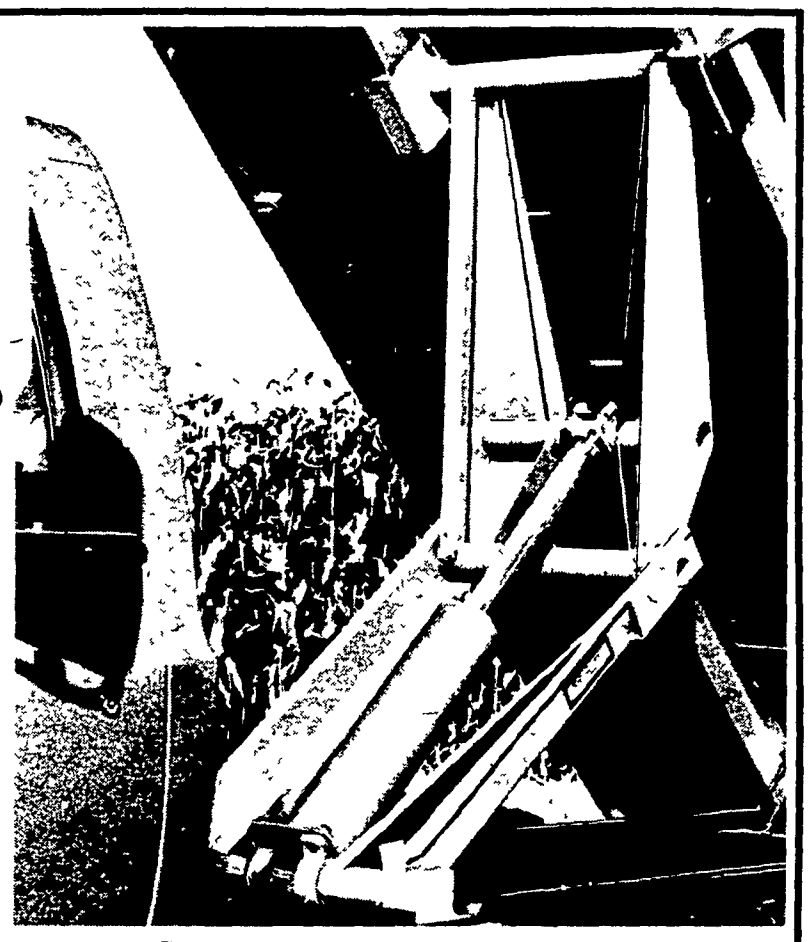
HARSH® RIGID LIFT® 100 PAT. PEND.



ENGINEERED FOR MAXIMUM

STRENGTH & RIGIDITY

LOW WEIGHT — HIGH STRENGTH — Reduces cost of material required for manufacturing, and lower freight costs, factory to consumer.

DOUBLE ACTING CYLINDER — Power up or down for simple positive hoist operation.

SIMPLE "LOW COST"INSTALLATION — The Main Frame Assembly simply straddles the truck frame and can be bolted or welded in place.

PRE-ASSEMBLED TAIL HINGE — Just notch out the frame and weld in place.

COMPLETE LINE OF TRUCK PTO's IN STOCK

FITS: TRUCKS - 60" to 120" cab to axle
BOXES - 9'6" to 16'
DUMP ANGLE: - from 50° to 40°
LIFTS : 9½ to 24 tons

We offer
SALES, SERVICE, AND Installation for Harsh Truck Hoists
STORE HOURS: Mon. thru Fri. 7:30 to 6:00
Saturday 7:30 to 4:30

FARMERSVILLE EQUIP., INC.

WAYNE ANNOUNCES

. . . the 400-lb. iron shot

A dramatic new product has just been announced by Wayne, the innovators in swine nutrition. With Brood 'N Iron, you can give baby pigs all the iron they need without giving them the needle.

All you do is start feeding sows new Brood 'N Iron 30 days before farrowing, and continue it for two weeks afterwards. Sows give their unborn pigs iron-rich blood. After birth, pigs get extra iron from the sow's milk every time they hit the nipple.

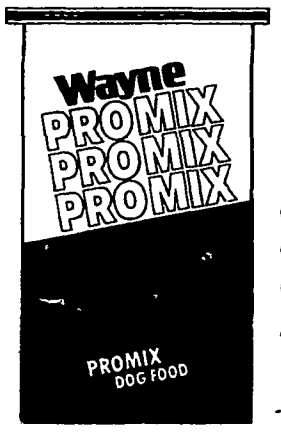
Research tests on Brood 'N Iron show how you can gain.

- Consistently high hemoglobin levels in baby pigs, even without iron injections
- Two-tenths of a pound heavier birth weights
- An increase in liver storage of iron in baby pigs at birth
- Iron levels in the blood plasma are increased in both sows and pigs
- Sow's milk has increased iron content

available in Wayne Brood 'N Breed, a new complete sow feed. Ask your Wayne Feeds dealer.

WAYNE PRO–MIX

New, economical Wayne Pro-Mix, fed wet or dry, provides complete and balanced nutrition for your dog.



GUARANTEED ANALYSIS

Crude Protein...(Min.) 21.0%

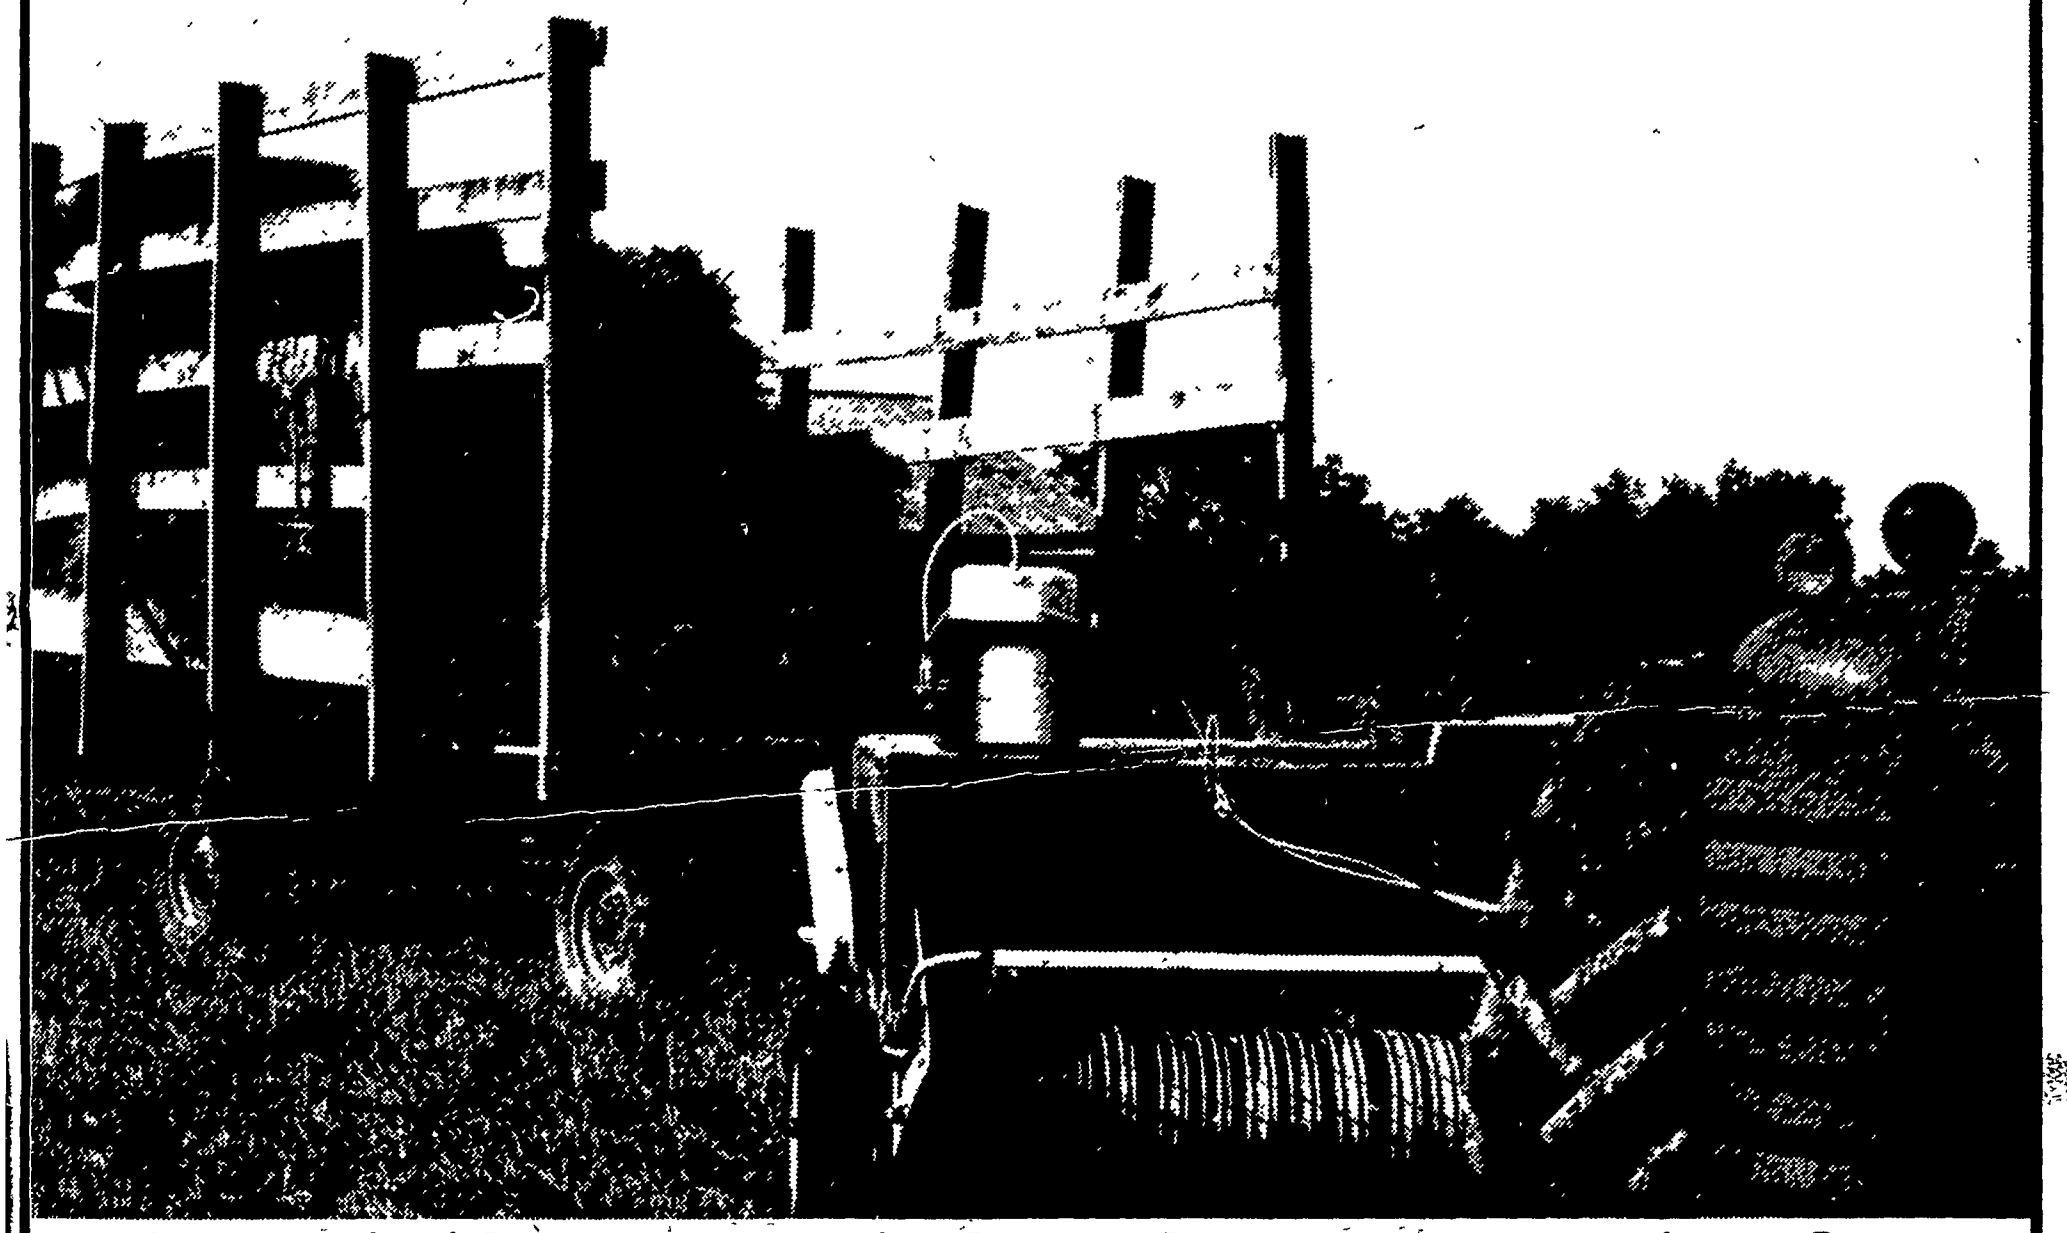
Beat the weather



Get the most feed value out of your hay with Beacon Hay Pre-Serv*

You get more milk per ton of hay when you treat your hay with Beacon Hay Pre-Serv. Hay Pre-Serv lets you cut hay as much as 26 hours earlier, at moisture levels up to 25%.

This means a larger hay crop, with less leaf loss and shattering, and less risk of weather damage. Hay Pre-Serv is easily applied to baled, chopped or stacked hay and prevents mold, spoilage, oxidation and excessive heating.

You get better color, improved palatability and more digestible nutrients in every ton of hay you cut.

If you grow succulent forage crops, make the most of them with Beacon Silage Pre-Serv.* With Silage Pre-Serv you can harvest at moisture levels from 40 to 70%, and get as much as 30% more feeding value per ton of roughage.

Andrew Stoltzfus' "Brook" pumped out the highest individual milk and butterfat record last month in the Berks Co. DHIA program. The five year old Holstein completed her 305-day record with 25,139 pounds of milk and 935 of fat.

Chalking up the second-highest record in both milk and fat production was Yost Brothers' "Begeta," who had 23,223 pounds of milk and 901 of fat to her credit for a 305-day lactation.

The following is the Berks County DHIA Report for the month of February, 1976. Only those herds averaging 1.5 per day or over are listed.

MUELLER
FRE-HEATER™

EXPLANATION OF THE REVOLUTIONARY NEW MUELLER "FRE-HEATER™" FOR THE DAIRY FARM

Bulk milk coolers on modern dairy farms remove heat from the milk promptly after it is produced. To accomplish this requires refrigeration machines and they are generally of the air-cooled type. Air-cooled condensing units literally "throw away" this valuable heat.

On these same farms, large amounts of hot water are needed for "prepping" the cows, washing the milk cooler, the pipeline milker, other equipment, and the milking parlor itself It is also advantageous to heat the cows' drinking water in winter.

The Mueller Fre-Heater conserves energy and provides "free" hot water by capturing the heat now wasted!

HERE'S HOW IT WORKS:

Rather than using noisy, dust-creating fans with fragile, dirt collecting air-cooled condensers, the refrigerant is routed to a specially designed condenser/heat exchanger and its heat is transferred to the water.

A thermostatically controlled valve delivers 145° F water to the storage tank.

In addition to the thermostatic valve, a mixing valve is provided to permit "prepping" temperature water

Thus, the Fre-Heater delivers two temperatures of water — prepping and washing.

Tests indicate the Fre-Heater consumes 10% less power than an air-cooled system . . . and you get Free Hot Water!

ELIMINATES REFRIGERATION SERVICE PROBLEMS!

The most common causes of slow cooling in bulk milk cooling systems are related to the air-cooled condenser

Three things which frequently reduce the efficiency are

1 Poor air circulation and recirculation
2. Fan motor failures
3 Dirty or clogged condenser fins

Air-cooled condensing units are generally installed out of doors in order to assure adequate air supply to the condenser. This exposes the compressor to extreme ambient temperatures. Starting problems and compressor failures have resulted and air-cooled condenser units are always noisy.

The Fre-Heater eliminates these problems because:

- There is no air-cooled condenser.
- The Fre-Heater is installed indoors.
- There are no fans to generate noise.
- The head pressure is very stable — assuring longer compressor life.
- There are *no* cold weather starting problems, plus

. . . the Fre-Heater conserves energy and produces Free Hot Water!

HOW MUCH HOT WATER CAN BE GENERATED?

There are many variables, so this question cannot be answered directly; however, a rule of thumb is that a Fre-Heater operating on 60° F. well water will produce a volume of 145° F. water similar to the amount of milk produced during a milking. In other words, if 100 gallons of milk per milking is produced, approximately 100 gallons of hot water (145° F.) will be generated during each milking.

Save Energy and get FREE HOT WATER..

MUELLER FRE-HEATER

WHAT SIZES ARE AVAILABLE?

MUELLER HIPERFORM BULK MILK COOLER

2, 3 and 4 H P units are available for either HiPerForm or conventional refrigeration systems

The 2 H P unit normally requires a 120 U S gallon water storage tank and the 3 and 4 H P size each normally require two 120 gallon water storage tanks (See typical installation diagrams on back)

The Mueller "Fre-Heater" can be used with either the Mueller HiPerForm Bulk Milk Cooler or with a conventional bulk milk cooler.

AFBF calls for estate tax reform

WASHINGTON - In a statement prepared for presentation at the opening of the House Ways and Means Committee's hearings on estate taxes Allan Grant, the president of the American Farm Bureau Federation said, "Efficient, productive commercial farming operations do not have large amounts of liquid assets that can be used to pay estate taxes."

Grant, a California rancher, advocated three reforms in the existing estate tax law:

(1) Raise the specific estate tax exemption from $60,000 to $200,000. This would adjust the estate exemption for the inflation which has occurred since 1942, when the $60,000 exemption went into effect. (The consumer price index (1967 - 100) was 48.8 ion 1942 and 161.2 in 1975. This means the purchasing power of $1.00 in 1975 was about equal to the purchasing power of 30 cents in 1942, and $60,000 divided by .30 equals $200,000.)

(2) Raise the maximum marital deduction from 50 percent of the value of the adjusted gross estate passed to a surviving spouse to $100,000 plus 50 percent of the total value of the adjusted gross estate. This would recognize the importance of partnerships between husbands and wives, and the special problems of wives who are widowed at an early age.

(3) Establish a procedure which would permit the executor of an estate to elect to have land used for farming, woodland, or scenic open space assessed for estate tax purposes on the basis of its current use rather than higher potential uses.

He endorsed bills introduced by Representative Omar Burleson (D., Texas) and approximately 100 other members of the House.

The Federation president said the Farm Bureau's recommendations for increasing the estate tax exemption and the marital deduction would apply to all estates.

"Our proposal with respect to the valuation of farmland, woodland, and open space would apply only to estates that own such land," he said, "however, we believe that it would serve the public interest by helping to maintain open space in urban areas without extensive public expenditures for land acquisition and maintenance."

Grant said estate and gift taxes are a relatively minor source of federal revenue. "The fact of the matter is that the basic purpose of the federal estate tax is to redistribute wealth rather than to raise revenue.

"Estate taxes have been a matter of increasing concern to Farm Bureau members," Grant declared. "Farming and ranching are predominately family enterprises, and farmers and ranchers are deeply interested in the orderly transfer of their businesses to succeeding generations."

Strasburg bank opens Millersville office

LANCASTER - The First National Bank of Strasburg has set March 31 as the Grand Opening for their newest office at Wabank Road and Barbara Streets, Millersville.

The opening ceremonies will begin at 11 a.m. with a ribbon cutting and appearances by local dignitaries, including retiring State Representative Sherman Hill of Millersville and Wilbur H. Stark, Lancaster's own "Ben Franklin".

The Grand Opening will revolve around a Bicentennial theme and a cannon will be fired to signal the official opening. Refreshments will be served by women from the Millersville Bicentennial Committee dressed in colonial costumes. The public is invited to attend the opening.

Colonial in design, the new Millersville office resembles the appearance of the Strasburg Bank's other branches. The one-story structure was constructed by H. W. Nauman and Sons, Inc.

The bank is a full-service office with six regular tellers' stations and two sit-down tellers' desks, a unique feature of the Strasburg Bank. Safety deposit boxes will be available at the new office.

Provisions have been made for three drive-in lanes to be operational and the ability to add a fourth lane when necessary. There will also be a walk-up window.

Access to the bank is from either Wabank Road or Barbara Street. Hours for the bank are as follows: Lobby - Monday through Thursday, 8 a.m. to 3 p.m., Friday 8 a.m. to 8 p.m. Drive-In Monday through Thursday 8 a.m. to 6 p.m., Friday 8 a.m. to 8 p.m. and Saturday 9 a.m. to noon.

What's New

Chisel Plow

The new No. 12 V-Chisel subsoil plow from Allis-Chalmers has 36 in. long shanks for greater penetration without trash build-up. Either five or seven shank units are available, with adjustable shanks for 20, 30 or 40 inch row spacing. One primary feature of the 1½ in. steel shanks are slip-on points, eliminating replacement of an entire shank. The shanks are further protected by shearbolts.

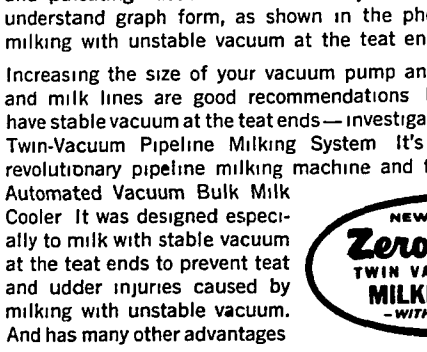
WE ARE CONTENDED COWS WITH THE Zero MILKING SYSTEM



Dairymen! LET US CHECK YOUR MILKING MACHINE'S PERFORMANCE!

NO CHARGE! NO OBLIGATION!

If you have a problem of teat and udder erosion in your herd—chances are you are milking with unstable vacuum And, as more and more animal health authorities have been agreeing that many teat and udder injuries—which have contributed to the spread of mastitis—have been caused by unstable milking vacuum you should have your milking machine's performance checked.

We'll be happy to do this for you with our DETCO Graph Machine It's a remarkable, new invention that records vacuum readings at the milker units attached to the teats, recording the milking vacuum and pulsating vacuum simultaneously And tells you in easy to-understand graph form, as shown in the photo above, if you are milking with unstable vacuum at the teat end

Increasing the size of your vacuum pump and the size of your air and milk lines are good recommendations But if you still don't have stable vacuum at the teat ends—investigate our ZERO CONCORD Twin-Vacuum Pipeline Milking System It's a combination of a revolutionary pipeline milking machine and the ZERO Completely Automated Vacuum Bulk Milk Cooler It was designed especially to milk with stable vacuum at the teat ends to prevent teat and udder injuries caused by milking with unstable vacuum. And has many other advantages

Shorthorn Association meets in Strasburg

The Strasburg Inn at Strasburg, will be site of the 28th Annual Meeting of the American Milking Shorthorn Society April 8-9-10, 1976. Also meeting will be the 2nd Annual Meeting of the International Illawarra Association.

Breeders and delegates from all over the United States and Canada will attend the three-day event at the Strasburg Inn headquarters. Activities will begin with a supper and special entertainment on Thursday evening, April 8. A family style breakfast will begin Friday's activities, with the annual meetings scheduled to start at 9:30 a.m. The annual breeders' banquet is scheduled at the Strasburg Inn on Friday evening.

The National Milking Shorthorn Sale will be held Saturday at the Guernsey Sales Pavilion with 14 promotional heifers and 40 bred and open heifers and cows to be offered. They are being consigned to 32 consignors from 14 states, including those as far west as Oklahoma, Arkansas, Iowa and Minnesota.

The present Milking Shorthorn breed is a dairy breed. It had its' beginning in England and was one of the first breeds imported into this country. Known commonly as the "Durham" she was the first "triple-threat" cow, furnishing the early settlers with meat, milk and power. The breed has traveled many routes and its popularity has varied with time and economics.

In the Eastern section of our country, they are still popular as ox teams. In 1915, a Milking Shorthorn club was formed to separate them from the Shorthorns of that day, and the breed became known as dual-purpose and was very popular during the age of diversified farming. During and after World War II, when this type of farming fell into disrepute compared with specialization, their appeal lessened.

Since that time, this breed has become the most versatile of any. They are better beef cattle than Shorthorns. They have been winning the lion's share at Shorthorn shows. They finish first in rate of gain, weight per day of age, etc., in feed lot tests.

On the other hand, using recent USDA figures, Milking Shorthorn bulls have produced double the increase in milk production of the average of the other dairy breeds.

Even the most enthusiastic Milking Shorthorn breeder does not rate his breed at the top, but he knows it is gaining rapidly. He also recognizes the economic value of their good dispositions and their outstanding herd health record.

For today's customer you need more than just a pump.

You need to sell the Myers System.

Apple production reviewed

HARRISBURG - Production of the York Imperial, the commonwealth's leading apple variety, was up 19 percent from last year, according to the Crop Reporting Service. York production, estimated at 137.5 million pounds, including unharvested production, accounted for 25 percent of the total state apple crop.

Pennsylvania retained first place this season in the production of York Imperials, accounting for over 39 percent of the United States total.

Golden Delicious remains the second largest producing variety in Pennsylvania, accounting for over 17 percent of the 1975 crop. Red Delicious and Stayman rank third and fourth, with 15 percent each of the total.

Nationwide, the 1975 commerical apple crop utilization was a record high 7.2 billion pounds, seven percent over the previous record of 6.7 billion pounds in 1969. The 1975 crop was 11 percent higher than the 1974 utilized production.

Utilized production in 1975 was 95 percent of the total apples produced compared with 99 percent of the total crop in 1974, but production increases were recorded for all varieties in 1975.

The most significant percentage increases were R. I. Greening, up 54 percent; York Imperial, up 30 percent; Northern Spy, up 28 percent; and Red Delivious and Jonathan, up 24 percent. Red Delicious continued as the leading variety, accounting for 35 percent of the 1975 production.

Broilers increasing; egg production down

HARRISBURG - Poultry production in Pennsylvania continued to increase during the week ending March 13, according to the Pennsylvania Crop Reporting Service.

Placements of broiler chicks were 1,494,000, an increase of 18 percent over the same week a year ago and two percent above the previous week. Average placements during the past ten weeks were 13 percent above a year earlier.

In the 21 key poultry producing states, placements were 65,519,000. This is 11 percent above the same week in 1975 and a gain of two percent over the previous week.

Average placements during the last ten weeks were ten percent above a year ago.

Pennsylvania layers produced 288 million eggs during January, down one percent from the previous month and one percent below a year ago, according to the Pennsylvania Crop Reporting Service.

The January average of 14 million layers is down two percent from December and one percent below a year ago.

Egg production per 100 layers during January totaled 2,052 eggs, about the same as a month earlier, and unchanged from the previous year.

The nation's laying flock produced 5,514 million eggs during January, a slight dip of one percent from the same month in 1975. Layers on hand during January averaged 280 million, down two percent from a year earlier.

The average rate of lay during the month was up one percent from January 1975.

OSHA publishes machine guarding standard

On March 9 the Occupational Safety and Health Administration added a new standard to Part 1928, Chapter XVII of Title 29, Code of Federal Regulations. The standard, called "Guarding of Farm Field Equipment, Farmstead Equipment, and Cotton Gins," includes the following major requirements that will affect farmers:

1. **That all farm field and farmstead equipment, regardless of date of manufacture, be provided with guarding of the power take-off device.**

Farm field equipment is defined as tractors or implements, including self-propelled implements; farmstead equipment means agricultural equipment normally used in a stationary manner, such as materials handling equipment.

Under this rule all equipment already on farms must have all power take-off shafts, including rear, mid - or side mounted shafts, guarded by a master shield or other protective guards. When the master guard is removed for any reason, the equipment must also include protection from the portion of the power take-off shaft which protrudes from the tractor. Signs must be placed on tractors and equipment specifying that the safety shields must be kept in place. The above portion of the standard becomes effective June 7, 1976.

2. **That all power transmission components on new farm field and farmstead equipment be provided with nip-point guarding.**

This portion of the standard is directed at the manufacturers of such equipment and specifies minimum strengths for guards and shields and defines other satisfactory methods of protection, such as guarding by location or railings. One special addition to farm equipment will deal with the situation where removal of a guard or access door will expose an employee to any component which continues to rotate after the power is disengaged. It will be the employer's responsibility to provide a readily visible or audible warning of rotation (employee must be able to see or hear it) and a safety sign that tells employee to look and listen for evidence of rotation and not to remove the guard or access door until all components have stopped. This portion of the standard also becomes effective after June 7 and it becomes the employer's responsibility to purchase only equipment that meets these rules.

3. **That means must be provided to prevent inadvertent application of electrical power to farmstead equipment.**

Effective September 7, 1976 all equipment (including equipment already existing on farms) must have methods to prevent one person from starting up a piece of equipment while another person is performing maintenance or service jobs. Such accidents must be prevented by:

a. providing an exclusive, positive locking means on the main switch which can be operated only by the person(s) performing the maintenance or service; or

b. in the case of materials handling equipment located in a bulk storage structure, by physically locating on the equipment an electrical or mechanical means to disconnect the power.

All circuit protection devices must be of the manual reset type except where the employer establishes that the use of the manual reset is not feasible. In this situation the employer must provide:

a. an electrical disconnect switch within 15 feet of each motor

b. a sign posted near each motor which warns employees that the motor could automatically start unless the electrical disconnect switch is utilized.

4. **That employees must be instructed in the safe operation and servicing of equipment which they operate.**

At the time of assignment and at least annually thereafter, the employer must instruct every employee in the safe operation and servicing of all equipment with which he is or will be involved, including at least the following safe operating practices.

a. Keep all guards in place when the machine is in operation.

b. Permit no riders on farm field equipment other than persons required for instruction or assistance in machine operation.

c. Stop engine, disconnect the power source and wait for all machine movement to stop before servicing, adjusting, cleaning, or unclogging the equipment, except where the machine must be running to be properly serviced or maintained, in which case the employer shall instruct employees as to all steps and procedures which are necessary to safely service or maintain the equipment.

d. Make sure everyone is clear of machinery before starting the engine, engaging power or operating the machine.

e. Lock out electrical power before performing maintenance or service on farmstead equipment.

Although OSHA will not require that employers document that employees have been instructed about safe operating procedures, it would be desirable for the farm employer to keep some record of this activity. Such records might prove useful in handling employee grievances, lawsuits or insurance claims.

Lamb flocks record low

There were 611,000 sheep and lambs on feed in the seven feeding States surveyed on March 1, a reduction of 14 per cent from the number being readied for slaughter market a year earlier and 32 per cent under the March 1, 1974 mark. The March 1, 1976 total was the lowest since the series started in 1960.

The number of sheep and lambs placed on feed during January and February, at 364,000 head, dropped 3 per cent from the same period a year earlier while the January - February marketings declined 2 percent to 787,000 head.

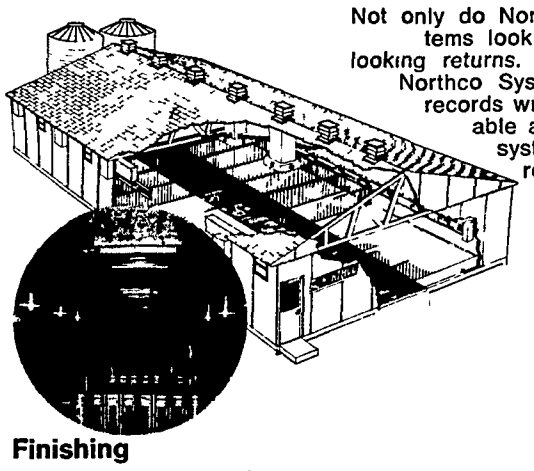
What a Good Lookin' Way to Increase Hog Profits

Northco Confinement Systems

Not only do Northco Hog Confinement Systems look good, they also pay good-looking returns. Ask anyone who owns a Northco System . . . his performance records will convince you. For a profitable and practical hog production system check out Northco Farrowing, Finishing, Nursery and Gestation Systems . . . they're all good-looking investments.



Farrowing
Northco Farrowing Systems provide complete control over sow and litter. Special pig brooders create 'zone heat' for the little pig area while sows remain cool

Finishing
All components work together to give you a complete system yet you're in complete control! Feed delivery is automatic, but easily regulated for individual pens. Check out the other components they all work to give you a good-looking, profitable system

Potting the pruned rose bushes are two horticulture students at Willow Street. Sam Fonzi (left) and Scott Groff dig in and fill the containers with soil. Both students are from Penn Manor High School.

Growing successful roses begins with knowledgeable pruning. Four floriculture students at Willow Street Vo-tech school work on the project with piles of the flowers behind them. Students (from left) are: Jackie Smith - Penn Manor; Kathy Axe - Penn Manor; Wendy Peifer - Penn Manor and Kathy Moyer - Lampeter-Strasburg.

Hort students work on preparing roses.

'Everything is coming up roses'

By MELISSA PIPER

WILLOW STREET — Spring is right around the corner and "everything is coming up roses" especially for the floriculture and horticulture students at the vo-tech school here.

A recent visit to the school found students busily preparing a large quantity of roses for potting. A wholesale dealer in the area who was closing shop, gave the school a large volume of the roses and the students have been working diligently to prune the bushes and plant them for use later in the season.

The work is being carried out in two new greenhouses recently completed at the school. All the work except some electrical contracting and land clearing was done by the students in the masonry, carpentry and horticulture classes along with aid from several other departments.

Cooperation has been the name of the game for these students and they're looking forward to a "rosey" future.

Instructors for the horticulture and floriculture departments are James Kerr and Gail Bushong.

Creating hanging baskets is a welcome relief from the rose business for Dale Herr (left) from Lampeter Strasburg and Lauren Martin - Lancaster Mennonite.

Kerstetter wants state farm lands kept productive, not 'paved over'

HARRISBURG — Pennsylvania Agriculture Secretary Raymond J. Kerstetter recently expressed his desire for state welfare lands being phased out of therapeutic farm programs to remain in agricultural use.

"Soon several thousand acres will be turned loose," said Kerstetter. "I would like to see these lands retained by the Commonwealth and leased to bonafide farmers. This is far more preferable to selling off the acreage for developers to pave over and black top."

Kerstetter was referring to the current phaseout by the Department of Public Welfare of eight farms operated by its mental institutions. Welfare officials have determined that inmates provide no savings nor derive any therapeutic benefits through their farming.

The eight farms total about 6,400 acres, some of which are prime farm land. They are located at Harrisburg State Hospital, Hollidaysburg State Hospital, Clarks Summit State Hospital, Fairview State Hospital, Pennhurst State School and Hospital, Philadelphia State Hospital, Torrance State Hospital and Warren State Hospital.

Kerstetter explained that the state Agriculture Department could serve as a custodian for the institutional lands.

"By leasing the land and farm buildings to farmers," said Kerstetter, "we are preserving the balance and fertility of precious farmland."

Kerstetter said farmers working the land could sell their produce to the institutions on a first option basis. "Or else," said the secretary, "the leasing farmers may be dairymen who want to plant the land in alfalfa or some soil-protecting cover crop."

As regards the farm at Harrisburg State Hospital, Kerstetter observed that the dairy barn could be converted into additional holding facilities for cattle being shipped overseas. "Cattle exports from Harrisburg International Airport are rapidly expanding," said Kerstetter. "We can use more holding space."

Also, Kerstetter noted, the surplus farmland can be used in farm training programs. "The main point to consider in all this," Kerstetter stressed, "is that the lands remain in productive agriculture."

Colonial garden workshopplanned

The Schuylkill County Cooperative Extension Service announces a 1976 "4-H Colonial Garden Project." The project will include growing herbs used in colonial days, vegetable, and strawberry gardening. 4-H clubs, scout troops, church youth groups, ecology clubs, and any other interested youth clubs may participate in this educational project. Leader workshops will be held March 29, 7-9 p.m. and April 5, 7-9 p.m. The workshops will cover the growing of herbs, vegetables, and strawberries as well as resources available for leaders working with youth groups interested in gardening. Mrs. Donald Coote, and expert on colonial living, will demonstrate growing herbs and dried flowers, uses of herbs and making potpourri. Interested adults must register by calling 385-3431 or writing to the Cooperative Extension Service, P.O. Box 404, Schuylkill Haven, PA 17972.

Invitations going out to FFA and 4-H clubs

PSU dairy science club preparing contest

April 10 has been set as the date for the Dairy Cattle Judging Contest to be held at Penn State's Dairy Production Center, University Park. It is the first event of the 51st Annual Dairy Exposition at the University and will include separate 4-H and FFA divisions along with 2 divisions for Penn State students.

Local FFA and County 4-H clubs throughout the Commonwealth have received invitations with applications to be completed and returned to Penn State. Late registrations will be accepted prior to the actual contest at University Park on Saturday, April 10. The contest is composed of ten classes representing the five major breeds and contestants are evaluated on oral reasons as well as placing of classes.

Last year, out of 21 4-H teams completing, the high team came from Lancaster County of which Richard Mellinger, Philip Crouse and Linda Kauffman were members coached by N. Alan Bair. Lancaster County also had Richard Mellinger capture the award for high individual overall in 4-H.

In the FFA division of 1975, Cloister's FFA "A" team representing Ephrata High School, captured first place in the overall judging. The members were David Haldeman, Daryl Martin, Henry Boyd and Harry Leninger coached by Lewis Ayers.

This year's contest is under the direction of Co-Chairmen Steve Lyon of Troy, Pa. and Larry Aaron of Lancaster County. The Penn State Dairy Science Club is presenting the Annual Dairy Cattle Judging Contest in which FFA and 4-H members will compete in separate classes, with Penn State students taking part in the amateur or professional divisions. The professional class includes Penn State students who have competed in intercollegiate judging or who have taken a course in dairy cattle judging.

Final contestant registration will be held prior to 10:00 a.m. on April 10. At 10:00 a.m. the contest will begin. Throughout the morning the judging of classes will be conducted, while the afternoon will be reserved for oral reasons to be given in Borland Laboratory. The scores will be tallied later that evening. Results of the contest will be available Monday, April 12. The awards will be presented at the annual awards banquet on the evening of May 1.

Contestants of the FFA division will present two sets of oral reasons, 4-H division members will present three sets of oral reasons, with professionals giving five sets. Four team members will comprise the teams in 4-H and FFA competition. The three highest scores of each team will be used in the score evaluation, the fourth team member will be the alternate.

There will be 12 awards and five rotating trophies offered in the competition. The high individual overall in 4-H and FFA and the high individual for each breed in 4-H and FFA divisions will receive awards. The rotating trophies will be given to the high 4-H team, the high FFA team, the high individual amateur, the high individual professional and the high individual professional in oral reasons.

Judges for the contest will be recipients of the Clyde N. Hall award since 1954. This award is given each year to the high individual on the Penn State Dairy Cattle Judging Team in intercollegiate competition.

The Penn State Dairy Exposition will also include a Dairy Princess Contest on April 22 with the climax on May 1, "Show Day." Events of May 1 will consist of a dairy cattle fitting and showing contest, a celebrity milking contest, a sorority milking contest, a fraternity milk chugging contest and a calf dressing contest. The annual Awards Banquet will be held the evening of "show day," Saturday, May 1, 1976.

Fair applications due

Interested organizations wishing to participate in the Pottsville Bicentennial Downtown Fair, Sunday, May 16, 1976, are reminded that the deadline for applications is April 16. Applications may be obtained at the Pottsville Bicentennial Headquarters, 16 North Centre Street, Pottsville, PA or by writing to Pottsville Bicentennial Fair Committee, P.O. Box 1776, Pottsville, PA 17901. Sites are available to ethnic groups, fire companies, service organizations, church groups, clubs, or arts and crafts individuals. Sites are being rented on a first-come frist-serve basis.

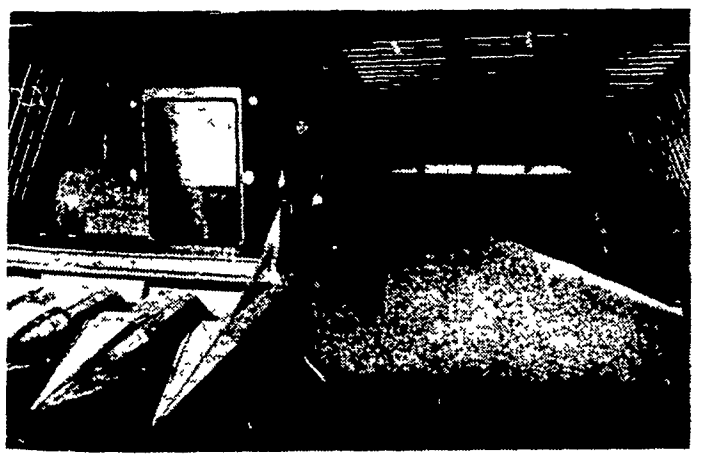
THERE'S GRAIN STORAGE AND THERE'S GRAIN STORAGE!



GRAIN BUILDINGS

BUTLER HAS THE BEST OF BOTH!

GRAIN BINS

Grain care specialist

Butler Agri-Builders® are independent businessmen, and members of a nationwide network of agricultural builders. Many are grain care specialists.

As to your Agri-Builder's services and skills: Ask other farmers about their Butler grain drying systems. See what they say about your Agri-Builder.

You'll likely find that the Agri-Builder who specializes in grain care systems can give you construction skills and services you just can't get from the sideliner who dabbles in grain drying every now and then.

He offers you a choice of many Butler drying systems:

One system combines a Butler Kan-Sun® continuous flow grain dryer and Butler grain bins. The Kan-Sun is a high-speed dryer that re-uses heat to save gas and save you money. Four sizes: capacities that can dry 2,700 to 6,400 bushels, removing 10 points of moisture from corn in a 15-hour day.

Another Butler system is Stor-N-Dry® in-bin drying. Available in a multitude of bin sizes, with corn drying capacities up to 3,500 bushels per day, reducing moisture from 25 percent to 13 percent. Butler Stor-N-Dry easily handles soybeans, wheat, milo and rice.

Also, the new Butler Kan-Sun batch dryer can be used when you need quick drying at a minimum investment.

And, remember, the Butler Agri-Builder, who has endeavored to build a reputation as a grain care specialist, wants to protect that reputation by putting together the best system for your needs.

Soil incorporation pays off in herbicide efficiency

When a herbicide is applied before planting and incorporated, the net result is good weed control when it's needed most: at the time the crop starts growing. This means crops get off to a vigorous start, high yielding stands are more easily established, and competition from grassy and broadleaf weeds for available soil nutrients, moisture and sunlight is largely eliminated. Controlling weeds early also frees growers for other important jobs during the busy spring season. Clean fields also make for faster, easier harvesting and less wear and tear on machinery.

Incorporation adds the extra insurance that the chemicals will be uniformly mixed into the soil at the right time and at the right depth for maximum weed control effectiveness. Mixed into the soil with a disc or power tiller immediately after application, the herbicide is protected against dissipation by winds, rains, or sunlight — all common drawbacks with herbicides that are surface applied. Further, incorporation removes the need to rely on rainfall to move the herbicide into the weed seed zone. It also eliminates the risk of too much rainfall preventing access to fields when necessary.

While minimum tillage practices have reduced mechanical cultivation in recent years, soil incorporation offers growers many important advantages in crop management and weed control efficiency. What's more, it's helping growers move to earlier and quicker planting.

According to agronomist Dr. D. R. Murphy, Stauffer Chemical Company, experience over the past few years has shown the tandem disc followed by a spike tooth harrow, or some other leveling device to be the most effective tool for adequately mixing the chemicals into the soil before planting. Power driven tillers are also recommended. When possible, application and incorporation should be done in the same operation. This, Dr. Murphy says, creates a chemical barrier across the full area of the field that controls weed growth, even deep germinating weed seeds must pass through the chemical as they grow toward the surface. Most herbicide specialists recommend concentrating the chemicals in the top two or three inches of soil to avoid dilution.

Incorporation equipment and the calibrated depth and uniformity of herbicide placement — can vary considerably. As a very loose rule of thumb, however, the most herbicide will be placed at about half the depth the equipment is operated. If the disc is set to operate four inches deep most of the herbicides will be deposited in the top two inches.

Tooling up for soil incorporation can be relatively simple and inexpensive. The first step, Dr. Murphy reports, is to check the adaptability of existing equipment. "Smaller acreages may require only a simple spray boom fitted to a tractor or tillage tools. The spray unit can be followed by a disc and harrow for immediate incorporation."

Another workable system consists of a tank or drum side-mounted on a tractor to feed a belly boom. Discs that follow should be set to cut slightly narrower than the spray pattern. Equipment designed for smaller farms can cost as little as $100.

Larger acreages require more elaborate systems with bigger tanks, pump, and spray boom fitted to either tractor or discs. Otherwise, the grower can use one of the variety of specialized kits. These are easily assembled units and include such features as adjustable booms that can be fitted to variously sized discs and incorporation equipment, low friction chemical resistant hose and uniformly engineered nozzles. Gandy units are often used to apply granular materials.

Field experience indicates that use of a spike tooth harrow after the disc improves the mixing action in the soil. A shallow set spring tooth harrow can also be used behind the disc with good results. Plant floats or cultipackers following the discs also help mixing and smooth the seed bed for planting.

Soil incorporation is a surer way to check weeds and it takes the environmental gamble out of chemical weed control. In the U.S. it has helped improve crop production in field corn, soybeans, alfalfa, cotton, tobacco, as well as a number of vegetable crops including dry and snap beans, sweet corn, sugar beets and tomatoes.

Dr. Murphy says crop-protection chemicals that are mixed into the soil "are less likely to be carried into the streams because they are beyond the effect of surface water or wind." He also points out the incorporation cuts down on chances of domestic animals or wildlife coming into contact with pesticide products.

Applying preplant incorporated herbicides is very compatible with normal fertilizer practices on some crops, such as corn. "For example, a wider use of preplant incorporated herbicides is anticipated on many crops, and preplant herbicides in combination with fertilizers is a natural union," he explained.

"Increasingly, applications are being made by custom operators or experienced personnel on large farms. Errors are minimized and good performance leads to increased use," Dr. Murphy said.

"The trend toward — and necessity for — larger farm units also will spur the trend toward herbicide-fertilizer combinations. To save application costs and soil structure, multiple trips over the field will have to be reduced as much as possible. Making one trip to put down and incorporate herbicides and fertilizer will gain popularity," he said.

South American adventure film slated for Sat.

Another in the series of Travel and Adventure programs sponsored by the Paradise Rotary Club will be held Saturday, March 27 at the Conestoga Valley High School, and will begin at 7:30 p.m.

Appearing in person to narrate his own film will be Rudi Thurau, explorer-photographer known primarily for his treks across South America, His motion picture presentation is called, "Adventure Across South America," and is said to feature some of his most exciting experiences. He has photographed the nearly impenetrable Amazon jungles, and then goes on to the world's highest lake, Titicaca. He also goes on to the ice fields of Tierra Del Feugo at the southern most tip of South America.

Using the most primitive means of transportation, he traveled for seven months down the Amazon River by means of raft and across the Andes on the world's highest railroad.

Leroy Shenk, president for the Paradise Rotary Club, expressed the groups high enthusiasm for the response to the Travel and Adventure Series. Shenk noted that each program witnesses an increasing attendance, and the accompanying proceeds will enable the club to continue its numerous community projects.

Tickets for the Travel and Adventure Series may be purchased at the door, $1.75 each for adults and students $1.00.

Conservation at 'Lindenhof' includes management of fields, pastures, woodland and water.

Coming to the United States as immigrants from Germany in 1950, the Lindes have owned this farm, "Lindenhof," for the past 20 years. Conservation of soil and water has always been practiced and now, nearly completed, the program includes 81 acres of contoured strips and 10,000 feet of terraces. The property is more or less shaped like the interior of a shallow bowl which is open at one end. All but the woodland in the distance is a part of "Lindenhof."

Conservation methods described

Editor's Note: This concludes the two-part story on conservation as practiced by the K.D. Linde family of Oxford R1. The Lindes were honored recently as being the outstanding cooperators in the Lancaster County Conservation District. A well-known Guernsey breeder whose DHIA average for 1975 is 13,463 pounds of milk and 612 of fat on 47 cows, Linde is recognized for being a conscientious manager of all his resources - in the barn and in the field.

By DIETER KRIEG

UNION - K.D. Linde has had a chisel plow for more than 10 years, but he doesn't use it very much. Doing most of his plowing with a roll-over moaldboard plow, the middle-aged dairyman says: "I'm not convinced that minimum tillage is the right application in our area, considering the heavy population of livestock." He does all of his plowing uphill and uses the chisel plow only during the Summer and Fall prior to planting alfalfa or rye.

The cropping program at "Lindenhof" includes three consecutive years of corn (two years for ear corn, with the third going for silage); two years of small grains and finally three years of alfalfa. "More than three years of alfalfa leads to too many problems," Linde added. All told he works with 98 acres of cropland on his 143-acre farm. Fields are divided into 25 strips, in contrast to just five fields when he moved here 20 years ago. He notes, however, that he may be able to cut back to 18 strips due to the elaborate network of waterways and terraces which have been installed. He has two waterways with six terraces leading to each of them, plus three more terraces in his permanent pasture.

Third-year corn fields are seeded with rye in the Fall as a cover crop. It's all plowed under the following Spring to add some extra humus to the soil and save a little on fertilizer costs. "One of the most important things about humus is that it holds moisture," Linde explained.

With a herd of 46 mature Guernsey cows and some youngstock on the farm, Linde has a source of fertilizer which has been an asset in the past but could develop into a problem in future years. Although he has incorporated every conservation technique to keep his resources on the farm, some work may still have to be done when the question of manure handling arises. Linde made the observation in view of federal and state legislation which will tighten manure disposal methods. Other than that, he considers his conservation practices to be pretty much complete. Like most farmers, he believes that legislation in this regard can be carried too far.

So far the dairyman-farmer-conservationist has been spreading manure on fields every day - unless there's bad weather. "There's no significant run-off problem now," he said. One thing Linde will avoid at all costs is spreading lime on fields which have received a good cover of manure. "Limestone deteriorates manure faster than anything else," he exclaimed.

Whether it's in the fields or pastures, a visitor to "Lindenhof" will find no soil erosion. "Always watch for erosion damage after a rain," Linde explained. If and when a chunk of soil is swept away - a not too likely occurence even during severe storms - Linde cuts strips of sod from safe areas, such as from fence rows, and repairs damaged areas immediately.

Evidence that the conservation system is working lies in the fact that there is no water running around the farm during a rain storm, "only a half hour after the storm," Linde said. He also points out that the spring in his pasture is running stronger than ever before - a sure sign that rainfall is being absorbed by the ground as it should be. A unique innovation surrounding the spring is Linde's home built pipeline-trough system to channel the water from one pasture to another on a definite path. It eliminates the usual soggy

Conservation

[Continued from Page 87]

areas associated with springs on most other farms.

Pasture management is a definite part of the Lindes' conservation program. There were two meadows here originally; now there are a total of 13 pasture lots. Of these, three are strictly for heifers, four are for use at night, and the remaining six are for day-time use. They encompass a total of 20 acres.

Advantages Linde cites for having "so many" lots are: Cows receive a new lot every two days whereby they can have new growth available and the chances of their trampling gullies into the ground are minimized. The younger growths of vegetation are also instrumental in achieving higher milk production, the well-known dairyman revealed.

To keep growth stimulated and keep unsightly spot-growths and weeds down, the Lindes clip their pastures approximately five times a year. Other management practices include liming every couple of years according to soil test results and spraying for garlic with Banvel. He's sprayed for the troublesome plant three consecutive years and claims there's hardly any of it left now.

Aware that a slight crack in the soil in the right place could develop into an erosion problem, Linde has even found a way to keep cowpaths from becoming gullies. The simple solution is placing old tires across them at several places. Cows will always walk around them - giving the bare soil a chance to accept vegetation.

All six of the day-time pastures have shade provided water running and to them either by natural or artificial means. Two lots receive their water by way of a spring which the Lindes have "harnessed" to flow on a definite tile and concrete path. A third lot receives its water supply from the pond by means of a siphoning mechanism. All other lots have water piped to them.

Another area of conservation found at "Lindenhof" is woodland management. A former landscape gardener in his native Germany, Linde is knowledgeable of what it takes to improve forested lands. He, his family, and resident helpers from Germany have planted dozens of trees in either woodland, on steep slopes in the pasture, or behind the barn as windbreaks. Reflecting on all of the family's accomplishments, he gives part of the credit to those young men from Germany whom he invited to America when his own children were too small to help.

The pleasant, mild-mannered Linde points out that different kinds of trees in woodland allow humus to mix better and create conditions which are less prone to diseases. Also, the pine trees which have been planted on the farm provide excellent cover for deer.

Linde sees a number of advantages to having a well-planned conservation program and there's no doubt in his mind that it's well worth the cost. He definitely recommends that farmers plan for conservation. Aside from soil, water and fertilizer savings, the family is aware of the improved appearance of the farm. Also, the lack of gullies has decreased the number of break-downs of equipment and accidents.

Not one to take all of the credit for "Lindenhof's" success for himself, Linde acknowledges the advice and help of various friends and organizations. The Lancaster County Conservation District, Soil Conservation Service, Extension Office, and his former landlord, Arthur Brown of Little Britain, received special mention.

"It gives me a great deal of satisfaction if everything looks neat . . . I appreciate very much to get such an award as an immigrant and I will do my best to keep America beautiful and productive" Linde concluded.

K. D. Linde, the 1976 Outstanding Conservation Cooperator for Lancaster County, adjusts the milker on one of his top Guernseys. The owners of the second-highest producing Guernsey herd in Pennsylvania, Linde and his family focus their managerial skills on all phases of farm operation. "Farming is observation from top to bottom, the same in the fields as in the cow stable," Linde says.

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted. (To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increased digestibility by 15 percent.
2. Increased weight gain for beef & hogs.
3. Increased butterfat in milk & egg production.
4. Improved animal health, reduced vet bill.
5. Eliminates hauling to the mill & back to farm.
6. Feed your own grown grain. (Not exchanged with others)
7. Beans remain whole. Store for months without losing any feeding value.

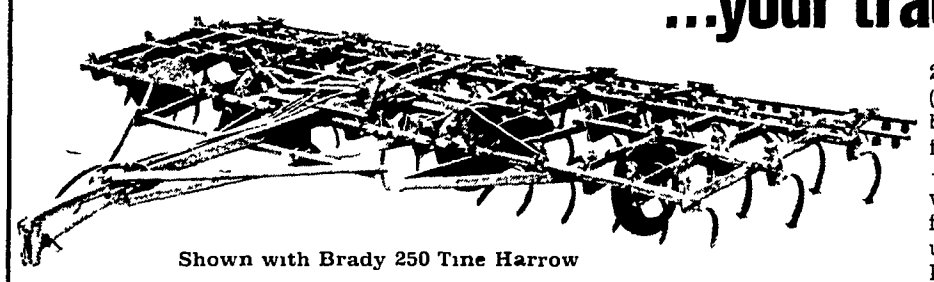
BREAK Your Yield Barrier!

BRADY® field cultivators

built for speed...strength...clearance...flexibility ...your tractor power

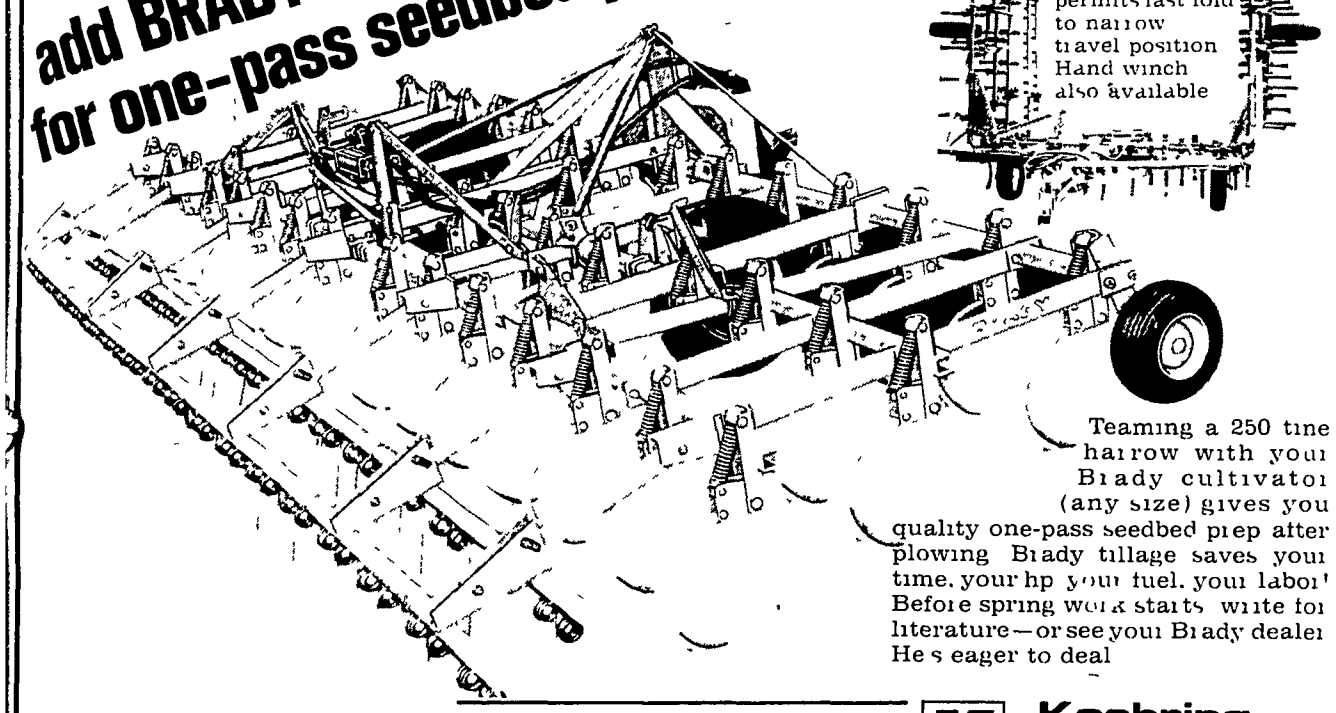


Shown with Brady 250 Tine Harrow

2540 Wide Wing field cultivator (23½ to 28½ ft widths) will match big tractor power and put your fields in good seedbed condition—fast. The big heavy-duty 2540 with flexible wings and 4-wheel flotation, will work your fields uniformly better than ever. Front rank spacing is 37½ inches, rear rank 24 inches. Shank spacing is 6 inches. Built "Brady rugged" on a welded 2½ in. square tubular steel frame.

2500 field cultivator (11½ to 16½ ft. widths) is built like the bigger 2540. Features same good trash clearances and shank equipment, same Brady exclusive rear mounted rockshaft that lifts the cultivator as it moves forward. Famous Brady strength too. Brady field cultivator shank (No. 69058) is guaranteed for life. Drawn and 3-point hitch models available.

add BRADY 250 tine harrow for one-pass seedbed prep



Hydraulic wing lift (optional) permits fast fold to narrow travel position. Hand winch also available.

Teaming a 250 tine harrow with your Brady cultivator (any size) gives you quality one-pass seedbed prep after plowing. Brady tillage saves your time, your hp, your fuel, your labor! Before spring work starts, write for literature—or see your Brady dealer. He's eager to deal.

Traditional crops still important in MD

Once renowned as the "Breadbasket of the Revolution" because it supplied large quantities of food to Washington's army, Maryland continues to produce an impressive amount of corn, wheat, and other grains, in spite of its small size and the incursions of urban sprawl.

The Maryland Department of Agriculture, citing farm production statistics gathered by the Maryland-Delaware Crop Reporting Service, says that farms around the state harvested 50,050,000 bushels of corn; 5,304,000 bu. of wheat and 8,904,000 bu. of soybeans, along with 4,300,000 bu. of barley in 1975.

Last year's crops of corn and soybeans slightly exceeded 1974 harvests, but yields of wheat and barley were not quite as large as in the previous year, due primarily to weather conditions just at harvest time. In the case of each of these four crops, acreage planted in 1975 was equal to or somewhat greater than in 1974.

A century or more ago, Maryland wheat was a leading crop. Now, however, farmers are devoting more land and attention to corn and the relative newcomer, soybeans, both of which are in demand as feedstuff for livestock and poultry. The Eastern Shore's poultry industry is Maryland's top agricultural enterprise, closely followed by dairy farming, which is largely centered in Central Maryland. Both of these farm industries create the demand for feed.

The Eastern Shore continues to lead all other sections of the state in corn and wheat production. And last year, Queen Anne's retained its leadership position with harvests of 4.9 million bu. of corn and 639 thousand bu. of wheat. Kent County ranked just behind Queen Anne's in corn, with a 4.7 million bu. crop. Carroll County was third with 4.6 million bu. But in wheat production, Frederick County was second with 578 thousand bu., while Carroll ran third with 533 thousand bu.

Dorchester is the state's leading soybean producer. Farmers there harvested over 1.4 million bu. in 1975. Next was Caroline with 1.3 million. Most of the state's soybeans are grown on the Shore. Western shore counties accounted for only 673 thousand bu., of 7.5 percent of the total crop.

In terms of acreage yield, Talbot led all counties with 100 bu. per acre of corn and 30 bu. of soybeans. But, Queen Anne's was in front in wheat, producing 36.4 bu. p-a. Three counties, Carroll, Frederick, and Howard, each produced 46 bu. p-a of barley, leading all other counties.

Jesus Tempted By The Pharisees

The Pharisees also with the Saducees came, and tempting desired him that he would shew them a sign from heaven

He answered and said unto them, When it is evening, ye say, It will be fair weather, for the sky is red

And in the morning, It will be foul weather today, for the sky is red and lowring. O ye hyprocites, ye can discern the face of the sky, but can ye not discern the signs of the times?

A wicked and adulterous generation seeketh after a sign, and there shall be no sign given unto it, but the sign of the prophet Jonas. And he left them, and departed.

Birth certificate guide published

HARRISBURG - State Health Secretary Dr. Leonard Bachman recently released a new consumer guide, "Applying for a Birth Certificate," an easy-to-understand set of instructions on how to apply for a Pennsylvania birth certificate.

"This handy free guide contains Vital Statistics addresses and telephone numbers for Pennsylvanians," Bachman said.

"I urge citizens to keep this card with their personal papers so they have the appropriate information when they need it."

The Pennsylvania Department of Health, the guide notes, issues approximately 600,000 birth certificates a year. If you want to get one, here is what to do:

1. Furnish your names, your father's name and your mother's maiden name, and where and when you were born.

2. Mail this information along with two dollars for each copy you want to any one of the Vital Statistic offices:

Central Office: Division of Vital Statistics, 101 S. Mercer St., P.O. Box 1528, New Castle, Pennsylvania, 16103, Telephone: (412) 658-2601.

Erie Branch Office: 521-522 G. Baldwin Building, 1005 State St., Erie, Pennsylvania, 16501, Telephone (814) 453-5661.

Harrisburg Public Office: Room 610, Health & Welfare Building, P.O. Box 90, Harrisburg, Pennsylvania, 17120. Telephone: (717) 787-8552.

Philadelphia Branch Office: 402 City Hall Annex, Philadelphia, Pennsylvania, 19107. Telephone: (215) 686-6240.

Pittsburgh Branch Office: Room 512, State Office Building, 300 Liberty Ave., Pittsburgh, Pennsylvania, 15222, Telephone: (412) 565-5113.

Scranton Branch Office: 804 Scranton National Bank Building, Scranton Pennsylvania, 18503, Telephone: (717) 961-4595.

By mail, the guide notes, it will take about two weeks to receive a certificate. Remember, a return address is necessary. If you're in a hurry, though, you can go in person to any of the offices for over-the-counter service and get your certificate in a day or so.

If you are a veteran or veteran's dependent, there is no charge for certificates, as long as you supply the veteran's name, rank, serial number, and what branch of the service along with your request.

If you were born in Pennsylvania before 1906, it gets a little more complicated, since the Department's records only go back to 1906. But you might get a copy of your birth certificate by writing to the Register of Wills, Orphan's Court, in the county seat of the county where you were born. Also, some cities in Pennsylvania maintain records back before 1906.

If a record of your birth was not filed, you can file a delayed certificate of birth by supplying some sort of recorded evidence to support your name, date of birth, and place of birth. You should know, though, that some Federal agencies will not accept a certified copy of a delayed birth certificate unless it had been filed shortly after you were born.

Bachman said "Applying for a Birth Certificate" is the third in a series of consumer guides issued by the Pennsylvania Department of Health. This new guide, and "What To Ask Your Doctor" and "Scabies" are available free by writing the Pennsylvania Department of Health, Bureau of Health Communications, P.O. Box 90, Harrisburg, Pennsylvania, 17120.

Potato stocks way down

HARRISBURG - Potatoes in Pennsylvania storages on March 1, 1976, totaled 1,035,000 hundredweight (cwt.), down 533,000 cwt. or 34 percent from a year ago, according to the Pennsylvania Crop Reporting Service.

This is next to the record low March 1 stocks of March 1, 1972 on the records beginning February 1, 1950.

Disappearance since harvest of 1975 crop potatoes totals 5,780,000 cwt., and compared with 5,792,000 cwt. for that period a year ago.

Stocks of potatoes for all uses held in storage by growers, local dealers and processors in the nation's fall production areas totaled 99.1 million cwt. on March 1, 1976, 4.9 million cwt. or five percent less than the previous record of 104.1 million on hand March 1, 1975. This is 22 percent above the March 1 stocks of 1974.

By regions, March 1 stocks in the eight eastern states were down 29 percent from a year ago; eight central states, down 23 percent; and in the eight western states, stocks were up eight percent, largely due to greater stocks in Oregon and Washington.

National disappearance of the fall 1975 crop totaled 168.7 million cwt., down seven percent from the 181.4 million cwt. moved during the same period a year earlier.

Egg board elects officers; adopts bylaws

WASHINGTON — The recently appointed Egg Board, which will administer the Egg Research and Promotion Order, held its first meeting here March 16 and 17.

After opening remarks by Assistant Secretary of Agriculture Richard L. Feltner and Agricultural Marketing Service (AMS) Administrator Donald E. Wilkinson, John P. Wallace of St. Petersburg, Fla. was elected temporary chairman and presided over the group while the bylaws were adopted. Following this, officers were elected as follows: John P. Wallace, chairman; Gerald C. Bookey, San Leandro, Calif., vice chairman; Norman J. Hecht, Walden, NY, recording secretary; and Clyde I. Springer, Lansing, Mich., treasurer.

An executive committee, composed of the board's officers and an additional two members, was elected to represent the six geographic areas under the order. The other committee members are Fred R. Adams, Jr., Jackson, Miss. and Herbert L. Steinbrueck, Troy, Mo.

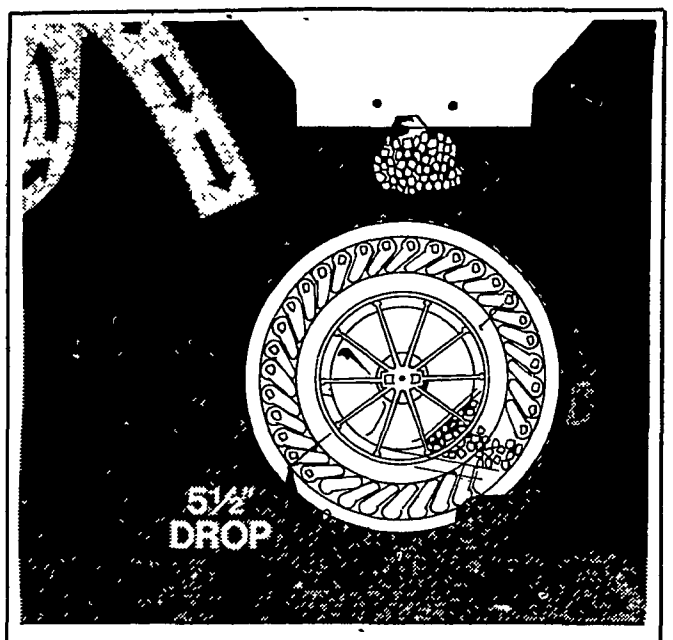
Five standing committees were established as follows: promotion and advertising - Donald J. Long, Burbank, Calif., chairman; research - Ernest E. Brown, Forest, Ill., chairman; finance - Roland H. Coles, Bent Mountain, VA, chairman; producer relations - Edward L. Houston, Lumber City, GA, chairman; and planning - Maurice J. Pickler, New London, NC, chairman.

The board reviewed rules and regulations which establish the procedure for collecting checkoff funds and which define responsibilities of producers and handlers. The board recommended that the rules be published by the Secretary of Agriculture as proposed rulemaking so that interested persons can submit comments. After receipt and review of comments, the regulations will be published in final form and the program implemented. Target date for implementation is midsummer or early fall.

The board authorized its executive committee to begin an immediate search for a general manager and approved a resolution accepting a loan of up to $100,000 from United Egg Producers to defray organizational expenses until the nationwide checkoff begins. Applications for general manager may be mailed directly to John Wallace, P.O. Box 7690, St. Petersburg, Fla. 33734.

The board directed that a temporary office be established in the Chicago area, and that Doug O'Banion of Sacramento, Calif. and James Fleming of Atlanta Ga. be retained as special consultants to the board to aid in operations until a permanent manager is hired.

The egg research and promotion program is designed to expand and improve markets for eggs, egg products, spent fowl (nonproductive laying hens) and products of spent fowl. Operational funds will come from an assessment of five cents per case (30-dozen) eggs marketed and will be paid by every producer who owns more than 3,000 laying hens. Rules proposed by the board will establish a uniform system of remitting assessments to the board. Produers who do not wish to support the nationwide checkoff program may receive a refund by applying directly to the board.



A real down-to-earth Air Planter

The Allis-Chalmers Air Planter has a seed drop of hust 5½." Closer than any other on the market today. What does this do for you? Well, the shorter the drop, the less chance there is for each seed to miss its target. Which also means more uniform spacing. And there's more Choice of unit drive or common drive Winkin Blinkin Monitoring Systems Electric motors that give you two-for-one savings Ask your Allis Chalmers dealer for more down to-earth facts.

Everything you've always wanted to know about sour colostrum but were shy to ask

By DONALD L. ACE
PSU dairy scientist

Souring or fermenting colostrum has become a fairly acceptable way of handling the surplus milk from fresh cows. Reports of its success as a suitable feed for the young calf outnumber, by far, the reports of disappointment. In the short time since the idea "caught on" there has been greater acceptance and more successful use of the soured product than total acceptance over these many years of using the fresh or frozen product. Tons of fresh colostrum have been wasted each year. This is too bad. It is a quality food for calves that cannot be bought at the feed store at any price.

Whole milk has been accepted as one of the best foods for growing young calves. However, in past years, milk replacers have been used in increasing quantities by dairymen who were looking for a lower cost food that would produce acceptable growth patterns. It has become increasingly difficult to obtain a quality milk replacer at a price that is competitive. Calf mortality rates often increased as the quality of milk replacer decreased. A survey of Pennsylvania dairymen indicated that those who fed whole milk had about five percent better calf livability. Now, with the price of whole milk steadily increasing it is not surprising that many dairymen have started using sour colostrum as a calf feed to replace some or all of the whole milk and milk replacer in their calf feeding program.

WHAT ARE SOME EXPECTED RESULTS?

1. Calves like sour colostrum. Growth rates have been nearly equal, compared to whole milk, when fed at normal dilution rates.
2. Nipple bottles or pails are advised over open pail feeding. Once in a while a calf will not accept soured colostrum. They don't object to the taste but the smell is different.
3. Most dairymen and most research workers report incidents of scouring to be nearly eliminated.
4. Labor in storing, handling and feeding the soured product is no greater than any method of calf feeding.
5. Calves generally eat dry feed quicker and in greater amounts. By five to six weeks of age the growth curve of sour colostrum and whole milk fed calves is equal.
6. A good producing cow will give enough surplus colostrum in the first eight milkings to feed the calf four or five weeks. With bull calves being sold most dairymen report enough colostrum available to feed calves to the weaning age.
7. The odor is not too objectionable to most people. It has a sour or acid odor that is usually not very noticeable unless you stick your nose in the container.
8. If allowed to crust over while fermenting or if a tight lid is kept on the plastic container, flies are not a major problem.
9. Expect some mold to form on the surface if colostrum is not stirred daily. It looks unappetizing to man but the calves don't mind it and it does not appear to be harmful when fed. However, in cases of extreme amounts of mold, skim it off and throw it away.

SOME SUGGESTIONS ON HANDLING SOUR COLOSTRUM

1. Preferred temperatures for fermenting is probably between 60 degrees and 80 degrees F. Under 60 degrees the rate of fermentation is slow, over 80 degrees there is very rapid fermentation and less desirable organisms can dominate the process. Don't allow your fermenting containers to sit in direct sunlight.
2. Plastic, 20 gallon (or less) garbage cans are ideal for containers. Bigger ones are too heavy to handle when full. Plastic bags may be used as a liner but are not necessary. Some say it's easier to clean up the mess if you can throw the plastic liner away and not have to scrub the container.
3. Keep a tight lid on the containers to prevent flies, rats and cats from getting in. Cats like the soured material.
4. No need to stir the contents of the container each day. Fill it and set it to one side to ferment.
5. It's best to use at least three containers. One to feed out of, one to be filling and one that is fermenting.
6. Stir thoroughly each time you prepare to feed the calves to mix the fat, curds and whey. The soured product separates into three layers, fat on top, whey in the middle and curds on the bottom.
7. Don't try to store fermented colostrum more than 14 to 30 days. It may not do any damage to feed older material to the calf but there probably is a degrading process that sets in after fermentation has completed. The quality of protein and other constituents may be lowered. The best suggestion would be to store in small enough containers that you could empty within a month from filling. The older it gets the more pronounced the odor becomes.
8. Thoroughly wash and sanitize the container before refilling.
9. Mold may form on the surface of the fermenting material and on the sides of the container you are feeding out of. We have not had any problems to date when it was stirred into the milk and fed to the calves. One always wonders though. If you have a question on feeding this mold, skim it off and discard it.
10. At Penn State we have used one of the old time metal milk can stirrers to mix the colostrum. If you don't have one, make a wooden paddle that will fit in the garbage can when the lid is on. Generally it can be left in the milk between feedings.
11. Don't mix milk from mastitic cows treated with antibiotics into the fermenting colostrum. The antibiotics will kill off the fermenting organisms and that's not good.

SUGGESTIONS ON FEEDING SOUR COLOSTRUM

1. The mixture of two parts colostrum to one part hot water is most often used. Research at Penn State indicates that satisfactory growth may be expected at that dilution rate. If the supply of fermented colostrum is unlimited you might consider a three to one dilution. If there is only a small amount available and, especially after the calf has started eating a little grain, you can mix the colostrum and hot water on a one to one basis.
2. Do not feed more than eight to 10 pounds of the mixture per day during the first week. Even with soured colostrum it is better to underfeed than overfeed in early life. A generally accepted feeding schedule is 10 percent of the bodyweight but not more than 10 pounds per day. Weigh both the calf and the feed. That's good advice no matter what your liquid feeding program is.
3. Provide extra water between feedings beginning at one week of age. Wait an hour or so after feeding the milk to put fresh water in the calf bucket. If a little hungry, the calf will eat grain and not fill up on water.
4. Be clean. Sanitize all feeding equipment in the same manner that you sanitize milking equipment. Sour colostrum is not a substitute for good management.
5. Feed the mother's milk fresh to your calf the first three days. Sour colostrum won't completely replace the new milk for the new calf.

WHY DOES SOUR COLOSTRUM WORK?

1. The curd particles formed in the stomach when fresh milk is ingested may be the size of a walnut or an egg. Curd formed from soured milk resembles grain size particles, almost flakey in nature, and is more easily digested.
2. Some of the organisms that are normally found in fresh milk will not survive in the soured product where pH level reaches 4.0 or lower. Thereford there are fewer "bad guys" present to cause digestive upsets and scouring.
3. Reports indicate that sour milk fed calves develop a better digestive system. The Lactobacillus bacteria that dominate in soured milk appear to have a beneficial effect on the GI tract.
4. Calves fed soured milk have a different bacterial make-up in the GI tract. The "good guys" predominate and there are fewer "bad guys" present. Organisms that commonly cause enteritis and scouring cannot grow at the pH of sour colostrum and are thus eliminated as a cause of these diseases.

Berks Dairy Club meets

A reorganizational meeting of the Northern Berks 4-H Dairy Club was held at the home of Mr. and Mrs. Elmer Bashore, Bethel R1 recently.

During the business meeting, officers were elected. Mark Wix was elected president and shares his slate with Jeff Smith - vice president; Debbie Stump - secretary; Doug Soluday - treasurer and Mark Moyer as reporter.

The next meeting will be held April 2 at the home of John Stump near Bernville. A demonstration on chipping and showing calves will be included in the program.

Correspondence courses offered

Seed catalogs, seed displays, and home gardening centers are clues that it's time to start planning the home vegetable garden. Penn State offers a comprehensive guide to vegetable gardening which discusses varieties and soil fertility and preparation.

Important guidelines are given on when, where, and how to plan. Detailed tables give approximate planting dates, probable harvesting ranges, probable yields, and seeds required. Gardeners who like to get an early start will find the course helpful because one lesson in this 7-lesson correspondence course discusses raising seedlings and using artificial light.

To obtain a copy of this correspondence course, send your check for $4.00 payable to Penn State, to Vegetable Gardening, Box 5000, University Park, PA 16802.

xxx

Farmers are large users of capital and find it impossible to finance these needs from capital solely owned by farmers. Farm Financial Management, a new Penn State correspondence course, shows where to find credit, how to get it, and how to use it effectively.

The role of capital in operating the farm business, sources of capital available to the farmer, and credit practices of different agricultural lenders are described. Costs of using credit, why costs differ among different types of loans, credit instruments, and legal aspects of using credit are detailed.

Guides to using credit such as selecting a lender, returns, repayment capacity, and risk-bearing ability are examined. Illustrations are given of how to determine the amount of debt which can be financed by the farm business.

The setting up, purpose, and use of a net worth statement is explained and illustrated. The importance and use of an annual financial statement showing where receipts come from and where expenses occur is discussed. The relationship of cash flow month-to-month and year-to-year to effective financial management is explained.

To assist you in this ability to obtain and make wise use of credit, send $4.50 to Farm Financial Management, Box 5000, University Park, PA 16802. Make check payable to Penn State.

xxx

Campers who have spent vacation time searching for a place to park the trailer or set up the tent may think it would be profitable to open their own campground. A Penn State Correspondence Course on Campground Development tells you how to do it.

The advantages and disadvantages of a campground as a family enterprise are discussed. The course analyzes current trends in recreation, discusses the potential market, and suggests several factors the successful campground operator must consider: location, type or terrian, health requirements, and personal characteristics.

This 9-lesson course discusses the cost of developing campgrounds and offers not only suggestions for water, sewage, and electrical installation, but also specific plans for site development.

To obtain a copy of this course, write Campgrounds, Box 5000, University Park, PA 16802. Make your chack for $5.00 payable to Penn State.

xxx

Not all dogs can be trained to sit on your lap, watch your house, or hunt in the field. Selection of a breed depends on the purpose for which the dog was bred. A Penn State Correspondence Course on "Dogs - Their Care and Training" is designed for the kennel owner as well as the one-dog "pet" owner. The course teaches the care, feeding, training, and handling of dogs - for hunting, show, and companionship.

Other lessons concern types, breeds, and registration, selecting a dog, shelters, grooming and feeding, pregnancy, and diseases and parasites. This 13-lesson course also has a dog obedience training lesson booklet for beginners, graduate beginners, novices, and graduate novice instruction.

To obtain a copy of this course, write Dogs, Box 5000, University Park, PA 16802. Make your check payable for $7.00 to Penn State.

Pork producers hold meeting; voluntary check-off increased

The increase in the voluntary check-off level by pork producers per market hog highlighted the activities of the recent American Pork Congress held in Indianapolis March 9-11.

The move was made by delegates attending the National Pork Producers Council's annual meeting held in conjunction with the APC. Nearly 12,000 persons attended this year's Congress.

Delegates seated Ron Liittjohann of Colorado, Laurence E. Jestice of Delaware, Fred Haley of Georgia, Howard Tiegs of Idaho, John Saunders of Missouri, Carson Rogers of Nebraska, Herbert Schick of Pennsylvania, Sam Sprager of Texas, Sam Johnson of Washington Tom Owens of Wyoming and Rick Maloney of the National Association of Swine Records to the NPPC Board of Directors.

Liittjohann, Jordan and Bill Buller of South Dakota were elected to the NPPC's executive board. Saunders was elected to the executive board filling the unexpired term of Leroy Vollmer of Missouri.

In a later meeting of the new NPPC Executive Board, Virgil Rosendale of Illinois and John Soorholtz were elected president and vice-president of the NPPC respectively for 1976. Rosendale succeeded Gerald Beattie of Nebraska.

The dime check-off will be initiated July 1. Two cents of the dime will go to the National Live Stock and Meat Board and the remaining eight cents will be divided between the NPPC and it's 35 member states. Voluntary check-off funds are used for production-research and promotion by the NPPC and to work on member development by the state organizations.

The proposed division of funds between national and member states would be the same for all states. However, the amount returned to states reduces on a constant ratio per hog as that state is credited for a higher number of hogs. The whole program will be reviewed in two years.

The delegates also adopted a five cent feeder pig check-off at the first point of sale. Two cents would go to the NPPC and three cents would be returned to the state of origin.

A resolution was introduced by the Illinois delegation and passed by the delegate body that formed a NPPC Standing Pseudorabies Committee which would initiate and coordinate research on the swine disease. The disease has become a major problem to Midwest pork producers.

Terri Ward of La Moille, Illinois, an 18 year old freshman at the University of Illinois who likes to show pigs, was crowned 1976 National Pork Queen March 10 during the annual American Pork Congress Banquet.

Terri will reign throughout this year as the nation's pork producers "Ambassador of Goodwill." She will appear on radio and television and make personal appearances to consumer audiences throughout the country.

What's New

Slow Release Chemcial

SRC-101, the modern chemical and fertilizer delivery system, is easy to use and mixes readily with all chemicals and most fertilizers. It is also non-corrosive and non-toxic. It is ecologically sound in that it holds chemicals in place and reduces leaching, run-off, and drift.

Added to herbicide, insecticides, fungicides, defoliants, and most fertilizers, SRC-101 surrounds or Encapsulates these materials and controls the amount of these materials released at any one time . Release is activated by moisutre in the form of rainfall, dew, irrigation, etc. SRC-101 continues to give a sustained release of chemicals and fertilizers at a rate which makes these materials readily available, in usable amounts, to the root zone of the plant.

This greatly reduces losses from leaching, drift, and decomposition and keeps chemicals in place and available to the plant. The end result is safe, extended control, which can result in greater protection of your crops, enhanced performance of your chemicals.

The product is marketed by the Scientific Research Company ALVA, Oklahoma. Distrbuted locally by Melvin Weaver, R1 Box 529 Manheim, Pa.

Brandt critical of plans to cut state-run farming operations

HARRISBURG - A fullscale investigation of plans to eliminate farm production on state institutional grounds, proposed by Rep. Kenneth E. Brandt, R-Lancaster, has been unanimously approved by the House.

Brandt said his resolution would empower the House Agricultural Committee to study current farm programs at both Welfare and State Correctional institutions with a view to determining their worth to the taxpayers.

Specifically, the study will seek answers to these major questions:

(1) Whether or not the phasing out of the institutional farm program will increase the cost of state governemnt.

(2) Whether or not innovative methods or farm management and the application of new technology have the potential for significantly increasing the productivity of the farm programs, and

(3) Whether or not the Department of Agriculture should be vested with any statutory authority with respect to the operation and management of the farm programs.

"A serious doubt has arisen as to the merits and soundness of the Department of Public Welfare Institutional Farm Program and the Correctional Industries Farm Program," Brandt said.

"Because of this, I believe the Agriculture Committee should investigate the entire situation in light of the recent trend toward a stronger awareness between food producers and consumers."

Brandt pointed out that eight of the remaining 18 welfare farm operations are to be phased out be the end of April.

"At one point one hospital farm produced 65 per cent of the food consumed at the institution," he added. "The Agriculture Committee should look into this situation and determine the reasoning behind the decision to close down operations which are producing so much of the food needed," he said.

Brandt said, "we are all aware that the Governor and the Department of Agriculture has been actively building support for a World Food Policy. In 1973, seven regional Food Conferences were held across the Commonwealth, culminating in the World Food Conference held in Rome in 1974.

"Last year the Governor supported the recommendations made by the Pennsylvania Delegation to the World Food Conference, while in 1975, the Department of Agriculture sponsored the first successful *antiinflation garden* program in Pennsylvania

Brandt, who has been a long time supporter of the institutional farm program, said that the Shapp Administration did in the past urge such programs as the antiinflation home garden but recently introduced the plan to scrap the Welfare and State Corrections farm complexes.

"This complete turnabout is still another example of how the Shapp Administration says one thing and means another," he added. "The plan to scrap the programs is another example of the constant deception and mystique surrounding Governor Shapp."

"In light of the Administrator's past policy in regard to the food crisis, I find it hard to understand the rationale behind it's position to phase out our State Welfare Institutional Farm Operations.

"It is my hope that this study by the full House Agricultural Committee will provide possible solutions to keeping these farms in operation on a modernized, efficient basis."

"SPECIAL SALES"

DAIRY DISPERSAL

SATURDAY, APRIL 3rd

AT 12:30 P.M.

At West Clifford, Pa. on Elk Mountain Road. Take Exit No. 64 off Rt. No. 81, go 3 miles East on Rt. No. 106 to West Clifford. Susquehanna Co. Arrows!

72 HOLSTEINS (4 REG.)

38 - Mature cows, 6 - Bred heifers, 10 - Open heifers, 12 - 8 month heifers and 6 started calves. About ½ of this young dairy is either fresh in last 30 days or soon will be. The other ½ bred for fall and vet examined. Lots of 80 lb. plus, cows here and a group of A.I. sired 1st calf heifers that are exceptionally big, fancy and freshening right now. Heifers really well started and grown. Just a real nice herd of quality, productive cattle. Interstate charts.

Maryland bull sale not as bullish this year

This year's sixth annual statewide sale of performance-tested beef herd sires was less favorable for consignors than the one a year ago, according to William A. Curry, Extension livestock specialist at the University of Maryland in College Park.

And over-all averages and top individual prices were considerably below the record levels of 1973 and 1974. This year's sale average of $531 for 32 bulls was about in line with the 1975 average of $548 for 41 bulls.

Top-selling bull this year was a 7/8 Limousin yearling consigned by Keystone Limousin farm of Newville, Pa. It went for $1,125 to Charles McDonald of Martinsburg, W. Va.

Two other bulls sold for $1,000 or more. One was a Simmental yearling consigned by Beechdale Farm of Bird-in-Hand. It was purchased for $1,030 by MarLee Farm of Woodsboro.

Tops among the traditional English breeds was a two-year-old Angus bull consigned by Enterprise Farm of Cecilton. It went for exactly $1,000 to Merle Ferguson of Mechanicsville.

Sale averages by breeds were as follows: 2 Hereford - $700 each; 3 Simmental - $617 each; 2 Chianina - $563 each; 17 Angus - $504 each; 4 Polled Hereford - $478 each; 3 Charolais - $355 each.

The sale was held March 6 at the University of Maryland's animal science and horse research farm southeast of Ellicott City.

110 HEAD OF HOLSTEIN COWS 110

Tested for Interstate Shipment - Pregnancy checked

Fifty head fresh since January 1st. All others fresh in the fall and bred back for fall freshening this year.

Majority are first and second calf heifers. Some milking with third calf and just a few older.

Good udders - a quality young herd. Some are bred to a Kingpin son and some are bred to A. I. bulls.

A Complete Dispersal! The herd is being dispersed because of the owner's recent serious accident, making it impossible for him to continue dairying at present.

AGWAY

HERE'S A PROFIT-MAKING TIP FOR LIVESTOCKMEN . . .

WHEN IT COMES TO BEEF FEEDS, CONSIDER:

Agway 32% Beefmix - Protein 32% , Fat 2% , Fiber 9%

Brings cattle to market weight more quickly than grains alone. Here's why: It is fortified with vitamins A and D and the essential trace minerals. Contains a balance of proteins, including urea, which stimulates rumen activity.

Agway 55% Beefmix - Protein 55% , Fat 1% , Fiber 7%

This weight-raising ration contains 15,000 units of vitamin A and 30,000 units of vitamin D per pound. Only one pound per day will fatten beef fast, at a low cost per pound of animal gain.
